Professional Summary

Data science undergraduate with growing experience in statistical modeling, data visualization, and machine learning. Comfortable working with tools like R, Python, and Julia, and eager to apply data science methods to real-world problems. Committed to collaborative research and clear communication of analytical insights.

Education

University of California-Riverside

September 2020 - June 2025

Bachelor of Science in Data Science | Riverside, CA | GPA: 3.54

Skills

- **Programming Languages:** Julia, Python, R
 - **Soft Skills:** Communication, Problem Solving, Public Speaking, Teamwork
 - **Relevant Coursework:** Intro to Big Data Management, General Statistical Models, Data Analysis Methods, Statistical Forecasting Techniques, Statistical Consulting, Nonparametric Techniques
-

Experience

Women in Data Science (WiDS) conference

April 2023

R Workshop Leader

- Led an introductory R workshop, teaching dataset manipulation and visualization using the tidyverse package.

Twitter Data Analysis Project

March 2024

Researcher

- Collaborated with a team to clean a dataset of 10,000 tweets for topic modeling analysis.
- Used Scala and SparkSQL for data preprocessing and feature engineering.

Reddit Search Engine Project

May 2024

Researcher

- Collaborated with a team to develop a search engine using data scraped from Reddit.
- Utilized the Reddit API to scrape posts and comments from 100 top subreddits.

UCR RISE Undergraduate Summer Research Program

June - August 2024

Researcher

- Worked with a faculty mentor to develop a novel graph model for clustering AI-generated and human-written research abstracts.
- Built a web scraper to collect abstracts from thousands of scientific articles.
- Used Julia, Python, and R for data wrangling, text mining, and model creation.
- Documented work and findings in a research report and presented a poster at the RISE symposium.

Diabetes Diagnosis Regression Project

March 2025

Researcher

- Collaborated with a team to understand how physical factors affect a person's diabetes diagnosis.
 - Utilized R for data cleaning, exploratory data analysis, and model selection.
 - Interpreted results to determine the influence of each factor.
-

Leadership & Involvement

Mu Sigma Rho National Honorary Society for Statistics

November 2023 - Present

Science Olympiad Volunteer

February 2024

- Event proctor and grader for the UCR Highlander Invitational.
