520 Peachtree Street Nicholasville, KY 40356

Candidate for M.S. in Finance. Expected to Graduate in May 2027

Georgetown University McDonough School of Business

Previously an analyst with over 5 years of experience specializing in financial and data analytics, resource management, and strategic decision-making. Most recently serving as a dedicated member of the Pari-Mutuel Wagering and Compliance team at the Kentucky Horse Racing and Gaming Corporation, leveraging my expertise in data analytics to drive insights and optimize financial performance within the dynamic horse racing industry. Proficient in utilizing technical tools including Tableau, Excel, R, SQL, PowerApps, Power Automate, Power BI, Python, and Oracle databases to extract actionable intelligence and support strategic initiatives. Committed to delivering comprehensive and impactful results through meticulous analysis and cross-departmental collaboration.

Resource Management Analyst, Kentucky Horse Racing and Gaming Corporation *Lexington, KY — September 2023 - Present*

- Maintained and analyzed large-scale databases which kept track of daily wagering activities across all horse racing events in Kentucky.
- Investigated discrepancies relating to customer codes and over time resolved these by collaborating with external operators.
- Developed and implemented complex Tableau dashboards utilizing multiple SQL queries to automate data collection, analysis, and visualization processes.
- Achieved significant reductions in account discrepancies within the \$6.8 billion historical horse racing industry, decreasing total discrepancies from \$40 million to \$15,000 through meticulous reconciliation and process improvements.
- Performed cash flow analyses and balanced settlement accounts for statewide advance deposit wagering of \$170 million, decreasing discrepancies from \$6.5 million to \$200,000, marking a 97% reduction.
- Created advanced logic models using Tableau's calculated fields to enhance reporting capabilities.
- Handled sensitive, confidential state-level financial information in compliance with regulatory guidelines to ensure data integrity and security.
- Collaborated closely with state-licensed operators to conduct on-site audits, ensuring regulatory compliance and addressing excise tax filing discrepancies.
- Utilized MS Power Automate to streamline data flows from FTP servers to internal databases, enhancing operational efficiency and data accuracy.
- Developed innovative tools using PowerApps to enhance data analysis and audit capabilities, driving continuous improvement initiatives across the organization.
- Established robust data quality assurance protocols, ensuring data accuracy, completeness, and reliability across the division.

The Resource Group: Spend Management Solutions

Data Analyst *September 2022-January 2023* • Researched and analyzed medical equipment and logistics solutions as a Data Analyst at Change Management Solutions within the Resource Group, a \$7 billion organization that reduces waste.

- Ensured adherence to federal guidelines on HIPAA, maintaining the confidentiality and security of healthcare-related data.
- Contributed to change management solutions within the organization through data analysis and research activities.

Partners for Rural Initiatives, Berea KY

Data Program Associate *March 2019-September 2021* • Data mining, data modeling, ANOVA, pivot-tables, V/H Lookups, Data-tables, Solver, and Data analytics package using Excel, Tableau, R and other data tools.

- Trained teachers in partnering K-12 schools to use a reading module and provided technical support for them.
- Mentored children from partnering K-12 schools by facilitating a visit to Berea College.
- Supported the update/standardization of internal audit for the database of the organization. • Collaborated with programmers and different staff in the field to make database system improvements. • Oversee updates to annualized monthly performance metrics for the organizational learning and practice team. • Provide consultation for incoming data and communicating with partners.
- Created demographic, educational, and economic data reports for eastern Kentucky, which helped fund a brand-new grant funding.
- Constructed visually interactive geographical maps on Tableau and Carto.
- Created standardized surveys using Qualtrics to get data from over 4 grant areas, and over 100 schools.
- Providing ad-hoc database support.

Berea College, Berea KY

Annual Giving Associate – Development Office *June 2018-December 2018* • Fundraised over \$6,000 by cold-calling donors and alumni for Berea College that helped other students get a full-ride education.

- Analyzed giving data for recent alumni donors.
- Provided the Director of Annual giving with standardized reports of monthly donations.
- Utilized Oracle database for prospect research.
- My capstone research was on alumni donations to my alma mater using econometric analysis.

Education : Berea College, Berea, Kentucky (December 2018)

Major: B.A. in Economics with a concentration in Statistical Methods and Models

Minor: Asian Studies and Japanese

Languages: English, Bengali, and Japanese
