SUMMARY

Senior Data scientist with 7+ years of experience utilizing technical business analytics foundation including Python programming, SQL database management, and data visualization tools, to provide insightful conclusions from big data for organizational strategic decision making.

TECHNICAL SKILLS & CERTIFICATIONS:

Data Analysis: Python(Libraries: Pandas, Numpy, Pyspark, SparkSQL, docX, SpaCy, Keras, TensorFlow, SciKitLearn, etc.) R, Scala, web scraping, Statistical models including hypothesis testing, data modelling using AMPL, Elasticsearch, Amazon S3, DataBricks, Jupyter

Database Management: MySQL, PostGreSQL, Microsoft SQL Server, DynamoDB

Data Visualization: Tableau, Matplotlib, ggplot, plotly.Dash

Certification(s): Six Sigma Yellow Belt Certification

EXPERIENCE

Bana Solutions, Mclean VA

Agile Team Lead/Lead Data Scientist – Defense Innovation Unit

November 2024 – Present

- Lead a cross-functional team of 6 (data scientists, software engineers, and UI developers) in the design and development of a web-based biothreat surveillance platform
- Perform a range of data analyses—from exploratory and descriptive to inferential—providing actionable insights to inform system design and public health decision-making
- Report analytical findings directly to leadership and key stakeholders, influencing strategic direction and project priorities
- Regularly engaged with clients to gather requirements, clarify technical uncertainties, and ensure alignment with mission objectives
- Ideated the structure of the online platform, translating conceptual goals into actionable development plans, including the creation of epics, user stories, and tickets for agile sprint planning
- Demonstrate proof-of-concept and incremental product updates, incorporating feedback to refine functionality and user experience
- Manage the integration of geospatial analysis tools, dynamic querying, and data visualization features to support monitoring and gap identification in biothreat testing capabilities

Booz Allen Hamilton, Arlington VA

Data Scientist – Chief Digital & Artificial Intelligence Office

January 2023 – November 2024

- Modify existing pandas code to use PySpark, reducing run time by over 80% overall performance
- Update existing code with comments and annotations in docstring format to promote clarity, readability and collaboration across teammates
- Create unit test using Pytest to maintain functionality of scripts and baseline functions following code revisions
- Acquire data by creating pipelines, using API calls and scheduling regular jobs, enabling analyst to perform on readily available up-to-date data

Deloitte, Rosslyn VA

Data Scientist – CARE/Model Foundry

August 2022 – January 2023

- Create python scripts to manage data quality and ensure proper data ingestion, using libraries such as re and NumPy
- Lead and develop solutions for Family Reunification workstream by seeking resources, engaging stakeholders and creating back-end flags to improve UI/UX

- Scrape data from the web using selenium and google driver to build a recommender system for an intra-organizational social network

Data Scientist – FOIA Litigation

September 2021 – July 2022

- Interview stakeholders to determine desirability, feasibility and data requirements for dashboard visuals
- Design data pipeline for exporting tables directly from user interface into Azure Database system
- Clean, prepare and join data, using Python and SQL to develop linked visuals for dashboard compilation upon ingestion in Tableau
- Collaborate with engineering team to provide more optimized relevant search experience for documents using Elasticsearch

Data Scientist – Financial Audit

January 2020 – September 2021

- Created and presented Interactive Tableau Dashboards, showcasing product and create entity relationship diagrams assisting in the Extraction Transfer and Load process
- Lead ETL efforts from multiple source systems to a central cloud location simplifying monthly financial reconciliation process and providing audit requisitions
- Cleaned, prepared and wrote data into tables using Databricks to enable data querying compatibility
- Facilitated organization of scripts using sphinx docstring format for cohesive and efficient coding
- Scraped data from webpage and performed key word analysis using spaCy
- Provided clients with need-based updates, reporting issues and practical workarounds to development

CGI Federal, Fairfax VA

Business Analyst

June 2018 – January 2020

- Lead data migration team in warehouse migration efforts by detailing the mapping process on a document and holding working groups for new employees
- Managed and updated relational database
- Modeled and Constructed functional reports from database information using Oracle SQL
- Tested, Verified, and assisted with business development efforts for clients using Momentum Product Suite
- Designed and created entity relationship diagrams assisting in the Extraction Transfer and Load process
- Served as a subject matter expert for client, researching, analyzing and reporting product issues to development team while providing workarounds when possible

EDUCATION

The College of William and Mary, Raymond A. Mason School of Business

Master of Science, Business Analytics

May, 2018

GPA: 3.80

The College of William and Mary

Bachelor of Business Administration, Accounting

May, 2017

GPA: 3.53

Study Abroad: University of Exeter, Exeter, United Kingdom

June, 2016

Interests: Dance, Nutrition and fitness, travelling
