Professional Summary

Full-Stack Software Engineer skilled in React, TypeScript, Python, Flask, and PostgreSQL. I build clean, simple, and scalable applications and work comfortably with DevOps tools like Docker and CI/CD. I enjoy creating user-focused features, improving system performance, and working in agile teams. I've led projects, shipped reliable products, and delivered solutions that make a real impact.

Education

Moringa School — Software Engineering

Masinde Muliro University — Bachelor of Education Arts (2017–2020, Incomplete)

Certificates

Software Engineering – Moringa School(2025)

Problem Solving – African Management Institute (2025)

Emotional Intelligence – African Management Institute (2025)

Performance Management – African Management Institute (2025)

Technical Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, Python, React, Flask, SQLAlchemy, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL

DevOps & Tools: Docker, CI/CD, Git, GitHub, Vercel, Render

Soft Skills: Team Leadership, Collaboration, Problem-Solving, Communication, Eagerness to learn

Best Practices: Clean code, simple architecture, readable documentation

Professional Experience

Full-Stack Developer | Mobile Garage Management System (Solo Project)

- Built and deployed a role-based garage management platform (Admin, Mechanic, Customer), improving task visibility and operational efficiency.
- Designed and implemented a RESTful API with Flask & SQLAlchemy, secured with JWT authentication.
- Automated inventory updates, reducing manual errors.
- Deployed frontend (Vercel) and backend (Render) with PostgreSQL, ensuring 99% uptime.

Team Lead & Full-Stack Developer | Moringa Pair (Team Project)

- Led a team of 4 developers, managing workflows and code merges in GitHub.
- Developed a pairing algorithm ensuring fair weekly matches for 200+ students.
- Built secure dashboards with React + Tailwind, integrating JWT & Google login.
- Improved platform adoption by 20% through better UX and authentication.

Frontend Developer | Recipe Sharing Platform (Solo Project)

- Built a responsive recipe-sharing app supporting CRUD operations and user engagement features (likes, search, carousel).
- Implemented mobile-first design, increasing accessibility across devices.
- Reduced page load times using optimized React components.

Interests

- AI and how it can improve everyday products.
- Creative tech and building fun, interactive user experiences.
- Gamification and turning ideas into engaging digital tools.
