SUMMARY

Acquired **over 8 years** of proficiency in data analysis, R&D, implementing Machine Learning & AI algorithms to enhance operational efficiency with a focus on financial planning and analysis (FP&A), engineering design and production. Seeking a role as a **Senior Analyst** to leverage skills in procurement, revenue and credit risk modeling, compliance and project-level reporting, and financial performance assessment.

EDUCATION

University of Cincinnati	Cincinnati, Ohio
<i>Master of Business Analytics (STEM), Data Science</i>	12/2024
Manipal Academy of Higher Education	Bengaluru, India
<i>Post Graduate in Banking & Finance</i>	12/2017
Manipal Institute of Technology	Manipal, India
<i>Bachelor of Engineering – Mechanical Engineering</i>	05/2013

SKILLS

Tools: Autodesk Inventor, AutoCAD, Productstream Professional, Dassault CATIA, Creo, SAP ECC, Python, Tableau, QlikView, SQL, Power BI, MS Excel, Actimize, Databricks, JIRA, MS Project, MS Visio, Alteryx, SAS Viya Workbench.

Techniques: Regression Analysis, ETL, DCF, LBO, SMOTE, FinTech, Vendor Management, Procurement, Quality Control, Logistics, Project Finance, Contract negotiation, Big Data, Data Visualization, Data Mining, AML Monitoring, KYC Compliance, Credit Risk Assessment, Credit Underwriting, Financial Modeling, Balance Sheet Analysis, CAPM, GAAP, 3PLs, Sprint.

WORK EXPERIENCE

Graduate Assistant	08/2023 – 04/2024
<i>University of Cincinnati</i>	Cincinnati, OH

- Deployed a churn model using SAS Viya Workbench for a leading Pittsburgh based commercial bank, with 93% accuracy, 86% precision and 89% recall with AUC-ROC above 0.87, reducing customer churn by 15% for FY 2024.
- Built an ensemble model to predict firm bankruptcy with 91% accuracy, analyzed financial indicators using SAS EM, improving classification precision by 16% over baseline models.
- Optimized Kroger's product placement through Market Basket Analysis, boosting cross-selling by 11%.

Financial Analyst (Credit & Compliance)	10/2017 – 07/2023
<i>Bank of Baroda</i>	Vadodara, India

- Conducted technical appraisals for 160+ industrial loan proposals, achieving 96% accuracy in feasibility assessments by analyzing machinery specifications, production capacity, and project viability, ensuring robust loan sanctioning decisions.
- Facilitated 60 million USD in project financing for manufacturing units across steel, chemical and automotive sectors, increasing zonal revenue by 14% by aligning technical evaluations with financial risk assessments for high-value loans.
- Led site inspections for borrowers across industrial hubs, identifying 7 million USD in undervalued assets for loan restructuring, collaborating with legal teams to renegotiate terms and recover funds effectively.
- Supported NPA recovery by disposing of seized machinery worth 9 million USD at 92% of appraised value, managing auctions and negotiations with buyers to maximize returns and reduce the bank's financial exposure.
- Evaluated collateral assets worth 30 million USD, including heavy machinery and industrial plants, improving recovery rates by 22% for non-performing loans through precise valuation and market analysis during asset recovery processes.
- Mitigated technical risks in MSME loan portfolios through detailed audits of machinery performance and manufacturing processes, identifying inefficiencies and recommending upgrades to enhance borrowers' repayment capacity.
- Trained 35+ bank staff on mechanical asset valuation and risk assessment techniques over 20 sessions, boosting team productivity by 32% and enhancing their ability to handle technical aspects of industrial loans independently.
- Collaborated with corporate credit teams to structure 18 million USD in syndicated loans for renewable energy projects, ensuring technical compliance with solar and wind equipment standards, contributing to a 15% portfolio growth.
- Utilized Nice Actimize for fraud detection in 50+ high-value loan accounts, identifying suspicious patterns with 90% accuracy, which prevented potential losses of 3 million USD and strengthened compliance protocols.
- Created Power BI dashboards to visualize loan portfolio performance for 5 branches, reducing reporting time by 40% and enabling real-time insights into 50 million USD of industrial loans for senior management.

Data Analyst	01/2016 – 12/2016
<i>WOSCA</i>	Keonjhar, India

- Collaborated with healthcare providers to collect and analyze data aimed at improving living conditions and promoting healthy lifestyles in rural areas.
- Analyzed and visualized previous revenue and sponsorship data using Tableau and Python, aiding in targeted healthcare initiatives impacting over 5,000 beneficiaries, which led to a 13% increase in sponsorships.
- Optimized agricultural initiatives using XGBoost algorithm, resulting 17% increase in crop yields by identifying factors such as weather trends, soil properties, fertilizer inputs & irrigation schedules.

Operations Analyst

06/2014 – 12/2015

Lechler India Private Limited

Mumbai, India

- Spearheaded the foundation of 1st and only R&D unit in India.
- Deployed Lean Manufacturing to streamline production, ensuring timely delivery and continuous improvement through iterative development cycles.
- Oversaw planning & scheduling on regular production aimed at reducing delivery lead times.
- Performed demand forecasting to align production schedules with market needs, reducing inventory costs by 18%.
- Applied computational fluid dynamics with statistical and regression analysis on design data, developing three high-efficiency industrial nozzles that increased market share by 6.5%.

Junior Analyst

09/2013 – 03/2014

Trident Limited

Budhni, India

- Utilized SAP MM module to optimize inventory management leading to 11% decrease in storage costs.
- Leveraged QlikView to create interactive dashboards, enhancing visibility into supply chain performance and identifying Kaizens for areas for improvement.
- Implemented TPM strategies, employed demand forecasting, and executed ABC and VED analysis, leading to a 12% reduction in stockouts and an 7.5% decrease in carrying costs.
- Managed third-party logistics (3PL) relationships, improving delivery times and reducing logistics costs by 11%.

ACADEMIC PROJECTS**Analytics Consultant (Capstone)**

08/2023 – 12/2024

University of Cincinnati

Cincinnati, OH

- Developed a Rental Price Predictor as part of a machine learning project using AdaBoost, LightGBM; implemented ensemble techniques to achieve an R^2 of 0.797, accurately forecasting rental prices across Ohio.
- Deployed an interactive web app to predict diabetes using XGBoost, leveraging key health indicators, achieved 88% accuracy in classifications, enhancing early detection potential by 30% for simulated cases.
- Designed and deployed a weather prediction model for Cincinnati as part of a capstone project, leveraging time series analysis and machine learning techniques to deliver accurate short-term forecasts.
