SUMMARY

Results Driven Data Scientist with a background in Actuarial Science and Statistics. Proven track record of delivering operational improvements, including a 20% increase in registration efficiency and a 60% rise in program retention through statistical modeling and data validation. Experienced in SQL, Python, and R, with a focus on solving cross-functional data issues and transforming feedback into strategic product and process insights.

TECHNICAL SKILLS: Python (Pandas, NumPy, Scikit-learn)|AWS|SPSS| SQL| R | Excel (VBA, PivotTables)| Tableau |Power BI |GitHub |Data Cleaning & Validation| Exploratory Data Analysis| Statistical Modeling| Time Series Forecasting

EDUCATION

University of New Haven, West Haven, CT | **Master of Science, Data Science | GPA: 3.84/4.0** May 2025
Kwame Nkrumah University of Science and Technology | **Master of Science, Accounting and Finance | GPA: 3.61/4.0** May 2022
Kwame Nkrumah University of Science and Technology | **Bachelor of Science, Actuarial Science** June 2017

RELEVANT EXPERIENCE

JEDI Student Ambassador (Office of the Provost) | University of New Haven Feb 2024 – Present

- Analyze data using Excel, Python (Pandas), and SPSS, identifying trends such as a 35% student demand for more career networking events and presenting findings to the Dean of Engineering, leading to strategic program adjustments.
- Prepare data-driven reports consolidating survey insights, program evaluations, and benchmarking research from 5 peer institutions by using Power BI and Google Sheets to visualize trends, informing provost's office and offering policy updates.
- Create interactive data visualizations using Tableau and Python (Matplotlib, Seaborn), presenting complex findings in an accessible way to ensure key stakeholders can comprehend information and facilitate data-informed updates

Regulatory Data Analyst | Allied Health Professions Council, Ghana Dec 2020 – Jul 2023

- Standardized data entry procedures through Excel Macros for a database of over 3,000 allied health professionals to streamline registration efficiency by 15%
- Conducted trend analyses on demographic and performance data to diagnose, create and implement a new virtual registration option for 300+ women without access to technology
- Reduced inquiry resolution time by 30% by developing a FAQ system and tracking common registration issues, improving communication with professionals.

Data Analyst | Ho Technical University, Ghana Dec 2018 – Dec 2020

- Increased enrollment by 60% over two years by collaborating with leadership to redesign the statistics curriculum, introducing new course combinations like Statistics and Finance to make programs more accessible and appealing to students.
- Streamlined departmental operations by creating a centralized database of all lecturers and professors in Microsoft Access, documenting academic backgrounds, qualifications, and institutions, which improved data retrieval efficiency by 30%.
- Presented complex data insights on student admissions through visual reports and dashboards, improving stakeholder understanding and enabling faster, data-driven decisions by 25%.

LEADERSHIP /ACTIVITIES

- University of New Haven | Graduate Student Council |Vice President, Diversity & Inclusion: Partner with university stakeholders to address and resolve graduate student concerns.
- University of New Haven | African Graduate Students Association| Director of Welfare: Oversee logistic planning and coordination of resources to ensure seamless execution of campus wide community events.
- Royal Statistical Society | Active Member: Contributing to discussions on statistical literacy and best practices in data.
