PROFESSIONAL SUMMARY	Strategic Business Analyst with 4+ years bridging the gap between business goals and technical execution across banking and insurance sectors. Proven success in Agile environments leading requirements gathering, backlog grooming, and UAT to improve process efficiency and product quality. Adept at transforming stakeholder needs into clear user stories and actionable insights.
EDUCATION	Hunter College, CUNY, New York, NY <i>Bachelor of Arts in Computer Science</i>
TECHNICAL SKILLS	Tools/Platforms: JIRA MS Visio Axure RP MS Excel Power BI Google Suite Languages: SQL C++ HTML CSS React JS Methodologies: Agile Scrum Waterfall
CORE STRENGTHS	• Experience working within the Software Development Life Cycle (SDLC) and ensuring all responsibilities were fulfilled in each phase • Facilitated Joint Application Development (JAD) sessions with project stakeholders and IT team to gather, document requirements and translate them into User Stories • Experience working with both offshore and onshore team members and assist them with additional clarification of the requirements and Acceptance Criteria • Modeled the proposed application and functional workflow by using various UML diagrams and Wireframes that best meets user requirements and feasible for QA and Development team • Experience in creating Test cases and assisting in User Acceptance Testing (UAT) sessions prior to going Live, and ensuring functionality does not have any bugs
PROFESSIONAL EXPERIENCE	Business Analyst Consultant Santander Bank, New York, NY <i>January 2023 – Present</i> Led a project to automate late fee enforcement for merchant services clients, replacing a manual and inconsistent process, which resulted in an 18% decrease in late payments and a 12% recovery in previously uncollected fees over the following quarter. <u>Responsibilities:</u> • Lead JAD sessions with stakeholders, interviewed various business clients to analyze business requirements, and recommended unique technological improvements to team workflows. • Manage product backlog in JIRA, collaborating with stakeholders to prioritize features and streamline release planning.

- Experience in gathering and documenting business requirements and translating them into User Stories and Acceptance Criteria.
- Participate and facilitate Agile ceremonies such as Daily Stand-Ups, Sprint Planning, Retrospectives, and Demos to report progress and reduce roadblocks.
- Collaborated with QA and Product teams to uncover edge case failures during UAT, reducing production defects by 35% over 2 release cycles.
- Create project plans and identify implementation risks, addressing gaps before they impact timelines or budgets.
- Delivered clear wireframes and workflow diagrams that accelerated development timelines by 20% by reducing back-and-forth and ambiguity in requirements.
- Coordinate across offshore and onshore teams to ensure shared understanding of user stories and acceptance criteria.
- Supported UI/UX validation and contributed UML diagrams and wireframes to guide frontend design and development.

Junior Business Analyst

American Family Insurance, New York, NY

April 2021 – December 2022

Supported the rollout of a live chat and notification system to improve client interactivity during the claims process. The enhancement enabled real-time communication and status updates, leading to improved customer satisfaction and greater transparency.

Responsibilities:

- Facilitated requirements gathering sessions with business stakeholders to define project scope, identify gaps, and clarify workflows.
- Authored comprehensive Business Requirement Documents (BRDs) and user stories to support seamless handoff to development and QA teams.
- Conducted process analysis that identified 3+ operational bottlenecks, leading to streamlined workflows and reduced manual effort.
- Provided data-driven recommendations that enhanced claims process efficiency across internal teams.
- Coordinated backlog grooming sessions and sprint planning with Product Owners to prioritize feature delivery and reduce scope creep.
- Led sprint review meetings to demo deliverables, gather feedback, and inform future sprint planning.
- Collaborated with QA to ensure traceability of requirements, supported UAT efforts, and helped reduce issue resolution time by 25%.
