Work Experience

NLP Support Analyst [Contract, Remote] | *Iodine Software, Austin, TX* January 2025 – Present

- Maintain NLP dictionaries via SQL; added 200+ terms, boosting terminology recall by 12%.
- Develop Java 8 regex omission patterns that cut false positives by 9%, improving model precision.
- Conduct multi-document testing to validate modifications and ensure consistency in production.
- Utilize MacOS Terminal, Git (GitLab), SQL, and Java for efficient development, managing tasks in Jira.
- Optimize clinical NLP models by enhancing term recognition and contextual sensitivity for improved extraction accuracy in healthcare data.

Data Science Intern | *Spring Venture Group, Kansas City, MO* June 2024 – August 2024

- Improved ML model by adding 20+ features, boosting accuracy by 3.6% and increasing conversion rates.
- Defined scope for a binary classification model to align training and production data.
- Leveraged SQL, XGBoost and SageMaker to extract insights and build highperformance model on large dataset
- Selected evaluation metrics (Brier score, ROC-AUC, log loss) for calibration.
- Built scalable data pipelines with Redis and Pydantic for validation.
- Collaborating with cross-functional teams to support data initiatives

Technical Skills

Data Science & Analytics: Data Mining, Data Cleansing, Data Visualization, Neural Network, Predictive Modeling, Statistical Analysis, Statistics, Clustering, Classification, Relational Databases.

Programming Languages: Python, SQL (Query Languages), R, Excel (Learning).

ML Frameworks/Packages: PyTorch, Scikit-learn, XGBoost, NumPy, Pandas.

Tools & Platforms: SageMaker, PowerPoint, Git (Github/Gitlab), Jupyter Notebook, Jira, DBeaver.

Visualization Tools: Plotly, ggplot2, Matplotlib, Seaborn, Tableau(learning).

Soft Skills: Problem Solving, Collaboration, Critical Thinking, Communication Skills.

Education

Master of Science in Data Science Aug. 2022 – Dec. 2023
The University of Iowa; Iowa city, IA

Bachelor of Science in Mathematics Aug. 2019 – Dec. 2021
California State University of Northridge; Northridge, CA

Relevant Projects

Predicting Used Car Price Using Machine Learning | [GitHub](#)

- Developed predictive models (Regression, Decision Trees) for used car prices, achieving $R^2 = 0.89$.
- Performed data cleaning, preprocessing, feature engineering and transformation to handle inconsistencies in data.

Travelers Modeling Competition (Kaggle) | [GitHub](#)

- Applied advanced Machine Learning techniques to predict auto insurance claim costs, achieving $MSE = 0.007$.
- Addressed zero-inflated data through critical analysis and targeted preprocessing.

Infographic Analysis: Criminal Behavior Patterns and Trends in Iowa | [GitHub](#)

- Collecting, cleaning, and analyzing large datasets identifying trends, patterns, and key insights.
- Communicated complex data through analytical Skills, clear reports and presentations for diverse audiences.

T1w-T2w MRI image Translation Using GANs | [GitHub](#)

- Developed a Conditional GAN for T1w-to-T2w MRI image translation, achieving an SSIM of 80-81%.
- Utilized Python and PyTorch for deep learning model development and extensive data manipulation.
