Results-oriented Software Quality Assurance Engineer with 4+ years of experience in ensuring the delivery of high-quality software products. Transitioning back into the industry after a career gap, I have recently acquired the certification in Agile Testing and automation from University of Washington. I specialize in implementing comprehensive testing strategies, test planning, defect tracking, quality assurance methodologies conducting rigorous quality assessments, and collaborating closely with cross-functional teams to drive process improvements. I am excited about embracing new opportunities for growth and actively seeking roles in Quality Assurance where I can make meaningful contributions.

Certifications	≡ Agile Software Testing & Automation (University of Washington) (December 2021)
	The course was designed to explore the role of Automation testing and quality assurance in the software development life cycle with an emphasis in agile development.
	≡ Google Project Management - Professional Certification (October 2022)
	The program is a 6 courses certification encompasses Creating risk management plans; Understanding process improvement techniques; Managing escalations, team dynamics, and stakeholders; Creating budgets and navigating procurement; Utilizing project management software, tools, and templates; Practicing Agile project management, with an emphasis on Scrum
	≡ Google Data Analytics – Professional Certification (December 2023 - In progress)
	Program is 8 course professional certificate covers how to visualize and present data findings in dashboards, clean and organize data for analysis, and complete analysis and calculations using spreadsheets, SQL and R programming, presentations and commonly used visualization platforms

Education	BSc. (Hons) in information technology 2004-2008
	Punjab University College of Information Technology, Pakistan

Professional Experience	QA/ Testing Analyst - Rage Custom (Contract) (October 2023 – May 2024)
	RAGE Custom is an e-commerce platform dedicated to revolutionizing the online shopping experience of sports equipment and apparel. With innovative approach to e-commerce, offering extensive customization options of sports equipment like never before.

- ≡ Developed and implemented comprehensive testing strategies to verify the functionality and the performance of the redesigned website across various devices and screen sizes.
- ≡ Conducted rigorous testing of key workflows, features and CX, including UI redesign, product customization tools integration, LLM based chatbots and checkout process streamlining.
- ≡ Documented and reported on testing results, providing valuable insights to guide decision-making and continuous improvement efforts.
- ≡ With target launch of April 2024 I lead the successful beta testing of the redesigned website by ensuring a bug-free, performance-optimized, and user-friendly online platform.

	Innovation Group (https://www.innovation.group/) (Dec 2008 – Dec 2013)
--	---

The Innovation Group plc is a global provider of software solutions to the insurance, fleet, automotive and property insurance industries operating in 8 of the top 10 global insurance markets. I started as a QA Analyst and worked in variety of roles mainly as QA but also established a team of technical writers.

Projects	Homesite Insurance Boston, US (Nov 2012 – Dec 2013)
	QA and Test Lead I was responsible to lead the QA (quality assurance) and UAT (user acceptance testing) phases while managing a team of QA engineers.

- ≡ Created and managed the QA roadmap and worked with various teams and stakeholders in different geographic regions (UK, USA, and Pakistan) to successfully launch the product.

- ≡ Gathered and documented the functional and non-functional requirements.
- ≡ Worked with Operations teams in claims department to successfully complete UAT (User acceptance testing).
- ≡ Designed and developed the test plan and testing strategies.
- ≡ Executed various tasks including extensive test script writing, requirement analysis, use-case identification, scripts execution, defect reporting, defect management, sanity testing and smoke testing
- ≡ Was responsible for bug triaging by working with engineering and business teams.
- ≡ Performed DB (Database) testing using SQL to execute test scenarios.
- ≡ Responsible for communicating status to all stakeholders at regular cadence.

Innovation Policy
QA Engineer

(June 2011 – Nov 2012)

Worked as part of the global product team to launch Innovation Policy. The product provides its client an extensive Policy/Quote creation, maintenance and billing of different line of business in insurance domains such as Auto, property.

- ≡ Worked as part of the QA team for a thorough testing of the Innovation Policy product.
- ≡ Conducted workflow, application UI and backend testing of the policy application.
- ≡ Assisted in identifying requirements for testing, developing test plans and scripts and coordinating regression testing as required.

Innovation Insurer
Technical Writing lead

(Dec 2008 – May 2011)

Lead a team of 4 technical authors to develop product user manual. Innovation insurer is an enterprise insurance product having four modules i.e. claims, policy, billing and configurator. The company was launching a web-based solution from a prior desktop version.

- ≡ Researched and presented the tool comparison to the leadership.
- ≡ Hired and trained a team of technical writers.
- ≡ Devised guided training and interactive exercise plan to train my Technical authoring team.
- ≡ Worked with product owners, UX designers to deliver a user friendly, context-driven help and user manual for Innovation insurer in multiple output formats.
- ≡ Worked with compliance to review for standards and accuracy of technical documentation.
