SUMMARY

Full-stack web developer experienced in Python, Flask, JavaScript, and automation. Skilled at building real-world apps that connect people, automate workflows, and integrate data sources. Passionate about learning, solving problems, and shipping clean, reliable products.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C++, C#, SQL, HTML, CSS

Frameworks / Tools: Flask, React, Tailwind, Puppeteer, Git, Heroku / Netlify, PostgreSQL, SQLite, Supabase

Other: REST APIs, Scraping & Automation, Raspberry Pi prototyping, Agile workflows, AWS, .NET

PROJECTS

Livi — Student Roommate & Housing Matching App | HackMESA Winner

- Built a full-stack Flask app that matches students by lifestyle and location, with role-based portals for roommates and landlords.
- Integrated Puppeteer scrapers for live rental listings and implemented mutual-confirmation logic with personalized housing suggestions.

FENYX — AI-Driven Marketing & Content Automation Platform | Ongoing

- Built an AI web app for automated content generation and social media scheduling.
- Designed backend workflows for targeted marketing and cross-platform publishing.

Bonito Bot

- Prototyped a Raspberry Pi robot body with voice control software and sensors.
-

EXPERIENCE

Freelance Web Developer — Self-Employed (2022 – Present)

- Designed and deployed client websites and full-stack apps using Flask and React.
 - Automated content gathering and publishing workflows using Python and Puppeteer.
 - Communicated directly with clients to define requirements and deliver iterative solutions.
-

EDUCATION

Los Angeles Pierce College — B.S. in Computer Science (2024 - Present)

Coursework: Data Structures, Algorithms, Web Development, Embedded Systems

ACHIEVEMENTS

- Winner — HackMESA Hackathon for *Livi* (Student Roommate App)
 - Completed IBM and online developer certificates (listed on portfolio)
-

Languages: English (fluent), Farsi (fluent)
