Professional Summary

Results-driven and analytical **Data and Business Analyst** with a Certificate in Data Analytics and Database. Eager to leverage expertise in SQL, Python, R, Excel, Power BI, and Tableau to transform complex data into actionable insights that drive business growth and optimize decision-making. Proven ability in data cleaning, visualization, and statistical analysis, committed to solving business challenges through data-driven strategies.

Education & Certifications

Saddleback College, Mission Viejo, CA Certificate in Data Analytics and Database | **Completed: Jan 2026** Relevant Coursework: Introduction to Data Science, SQL & Relational Databases (mastered complex querying for large datasets), Excel for Data Analytics (developed advanced modeling and reporting techniques), Data Visualization Tools (Power BI, Tableau - created interactive dashboards).

Azad University, Tehran, Iran, Masters of business Administration (MBA) Marketing | **Completed: Sep 2022**

Azad University, Saveh, Iran, Undergraduate | Materials Engineering | **Completed: Sep 2006**

Google Data Analytics Professional Certificate (90% complete, expected July 2025)
Microsoft Excel for Data Analytics (completed via LinkedIn Learning)

Technical Skills

Languages: SQL (complex queries, joins, subqueries), Python, R **Data Tools:** Excel (VLOOKUP, PivotTables, Power Query, Power Pivot), Tableau, Power BI **Databases:** Microsoft SQL Server, MySQL **Other Tools:** Microsoft Office Suite, Google Sheets, Git

Projects

Retail Sales Dashboard (Power BI)

- **Developed** an interactive Power BI dashboard using sample sales data to visualize trends, regional performance, and key performance indicators (KPIs).
- **Implemented** dynamic slicers and charts that **improved data exploration efficiency by 30%**, enabling stakeholders to identify underperforming regions and product lines.

- **Facilitated** more agile business decisions, **identifying opportunities for a projected 5% increase in regional sales.**

Customer Churn Analysis (Excel + SQL)

- **Analyzed** customer data using SQL queries and Excel dashboards to **identify underlying churn patterns** and root causes.
- **Suggested** data-driven retention strategies based on insights, **projected to increase customer lifetime value by 10%.**
- **Applied** critical thinking to translate complex data findings into actionable recommendations for business stakeholders.

Professional Experience

Independent Data Analyst Consultant | Remote Jan 2024 – Present

- **Cleaned and transformed** diverse datasets from public sources using Excel and SQL, **improving data integrity by identifying and correcting over 200 data errors per dataset.**
- **Created** summary dashboards to **present complex insights to non-technical audiences, streamlining data interpretation and reducing meeting preparation time by an average of 2 hours per presentation.**
- **Utilized** data visualization tools to communicate key findings, **enhancing stakeholder understanding and decision-making.**

Core Competencies

- **Data Cleaning & Preparation:** Proficient in ensuring data accuracy and readiness for analysis.
- **Dashboard Development:** Skilled in creating intuitive and impactful data visualizations.
- **Reporting & Visualization:** Expert in translating complex data into clear, actionable reports.
- **Exploratory Data Analysis (EDA):** Adept at uncovering patterns and insights from raw data.
- **Statistical Analysis Basics:** Foundational understanding of statistical methods for data interpretation.
- **Problem-Solving:** Proven ability to identify, analyze, and resolve complex data-related challenges.
- **Critical Thinking:** Strong capacity for objective analysis and informed decision-making based on data.
- **Communication & Team Collaboration:** Effectively conveys technical information to diverse audiences and collaborates with cross-functional teams.
- **Attention to Detail:** Meticulous in data handling, analysis, and reporting to ensure accuracy.
