

FARUQ AKERE

Charlotte, NC 28078 | +1 (469) 657 - 5121 | Akerefaruqo@outlook.com

Summary

Analytical Supply Chain Analyst with over 3 years of experience in turning complex inventory and logistics data into clear, actionable plans that improve service, free working capital, and reduce operating costs. Experienced with end-to-end ERP environments (SAP, Oracle), advanced Excel modeling, and BI tools such as Power BI and Tableau to forecast demand, optimize safety stock, and monitor vendor performance. Adept at cross-functional collaboration—partnering with Purchasing, Finance, and Operations to streamline procurement workflows, automate manual reports, and drive continuous improvement initiatives. Known for strong problem-solving skills, data-driven decision-making, and the ability to communicate insights that keep product flowing smoothly from supplier to customer.

Skills

- SAP ERP
- SAP S/4HANA & ECC
- Order Management
- Microsoft Office Suite (Excel, Access, Word, Visio, PowerPoint, Project)
- Pivot Tables
- VBA
- Power Query
- SQL
- Power BI
- Tableau
- Data Visualization
- Data Wrangling
- Root Cause & Variance Analysis
- Demand / Supply Planning
- Inventory Management
- Cross-Functional Collaboration
- Strong Communication Skills

Experience

DATA ANALYST / INVENTORY ANALYST | 08/2024 - 04/2025

Hyster-Yale Materials Handling - Greenville, NC

- Maintained a living database of more than 400 freight contracts, leases, rate sheets, and rail-car repair agreements, which gave the Logistics Manager a single source of truth for upcoming renewals and saved roughly 8 hours in manual look-ups each month.

- Built an Excel dashboard with dynamic charts and slicers that displayed on-hand versus open purchase orders for 4 regional warehouses, planners now relocate slow-moving stock or pull forward replenishment in under 30 minutes, which prevented stock-outs on high-turn items.
- Authored Tableau workbooks that refreshed daily from SAP ERP tables and flagged variances in fill rates, lead times, and safety-stock breaches.
- Analyzed inventory across 12,000 SKUs in SAP ERP to align safety stock with service targets at 4 distribution centers, cutting stock-out events from 65 to 18 per month.
- Resolved purchase-order issues in partnership with warehouse and accounting teams, cleared receipt and invoice discrepancies within 48 hours and prevented payment holds that previously delayed vendor shipments.
- Led quarterly business reviews with Purchasing, presented scorecards that highlighted vendor lead-time drift and recommended action plans that improved on-time inbound performance to company target levels.

SUPPLY CHAIN ANALYST | 08/2022 - 08/2024

Diamond Logics – Dallas, TX

- Reviewed safety-stock tables weekly using sell-through trends, market insights, and sales-force input, and maintained fill-rate performance within executive goal range throughout seasonal peaks.
- Built a Power BI control-tower that blended SAP exports and POS feeds, giving planners real-time views of on-hand days of supply and open orders, which cut manual report prep by 10 hours each month.
- Partnered with Sales to produce rolling unit forecasts at SKU and product-line level, incorporating promotions, assortment resets, and store-count shifts.
- Tracked weekly inventory position for 3,500 high-velocity SKUs with Excel PivotTables and VLOOKUP, flagging low-cover items two days sooner than prior process and preventing line-down events in the DC network.
- Reconciled unit demand plan to financial forecast each month and published accuracy metrics to leadership, enabling early course corrections where variances exceeded tolerance.

Education and Training

East Carolina University - Greenville, NC | Bachelor of Science

Industrial Distribution & Logistics

Certifications

Lean Six Sigma || Professional Scrum Master || Microsoft Office Suite

Leadership

Eta Omicron Chapter of Alpha Kappa Psi Fraternity – VP of Alumni Relations, Pledge Educator ||
