EDUCATION

Texas State University

Graduation: May 2022

Bachelor of Business Administration, Computer Information Systems

Relevant Coursework: Agile Software Development, Test Automation, Project Management, Quality Management, Data Analysis, Business Intelligence, Cyber/Network Security User Interface Design (UI), User Experience (UX), System Integration Testing (SIT)

Technical Skills: **Python** (Beginner), **C#** (Intermediate), **SQL** (Intermediate), **Java** (Beginner)

Others: Agile TA Explorer, Enterprise Design, Scrum, Jira, Mural, Microsoft Azure DevOps, SNOW

EXPERIENCE

Accenture | Technical/Business Analyst

February 2022 – Present

- Collaborated with cross-functional teams to gather and analyze business requirements, translating them into clear technical specifications.
- Created detailed documentation for test cases, process flows, and user stories in Agile environments.
- Supported sprint planning, backlog grooming, and daily stand-ups to ensure alignment between business goals and technical delivery.
- Utilized tools like JIRA, Confluence, Excel, and Power BI to track progress, manage requirements, and visualize insights.

EF Johnson Technologies | Software Test Engineer II

May 2023 – November 2023

- Structured and conducted assessments using **Python**, **Perl**, and **Linux** to verify that radios comply with EF Johnson's quality, security, performance, and architectural criteria.
- Developed and executed comprehensive test plans, test cases, and test scripts for radios and Stargate consoles.
- Collaborated closely with cross-functional teams to understand product requirements, identify potential issues, and ensure timely defect resolution.
- Conducted regression testing to validate new code changes and ensure the stability of existing functionality.

General Motors | Software Test Engineer

February 2022 – May 2023

- Organized and performed test activities to ensure applications meet GM IT standards for quality, security, performance, and architecture requirements with SCD and CS teams.
- Performed ambiguity reviews of business and software requirements, executed tests, log defects, and reported test metrics and status to project teams.
- Facilitated software test strategy, including test process deliverables, test metric definitions, and industry report definitions.
- Built test plans using standard templates defined by the organization and worked with more experienced test leads to assist in test strategy and process improvements spanning functional, regression, and automation testing.

IBM | Windows Admin

January 2019 – February 2022

- Worked as Team Lead performing resource planning, deployment, tracking, and reporting for all assigned team members with Agile methodologies including weekly sprints with mural and scrum.
- Investigated server, database, and networking performance problems: recommended performance improvement solutions with windows and Linux.
- Oversaw ticketing in **SNOW**, manage escalations, and post incident reporting.
- **Reduced number of cases by creating master templates to streamline processes.**
- **Provided cross-cultural expertise and international team requirements for new international project rollout.**

PROJECTS

Health App: UI Designer

- Created user experience (UX) concepts within a webpage or product; ensured intuitive and easy interactions and alignment with overall vision.
- Designed the aesthetics: layout menus, drop-down options, colors, and fonts.
- Conducted testing and assessed user experience across completed applications, websites, and software.

Website: Software Test Engineer (Java)

- Evaluated new and existing programs to identify and help remove bugs, glitches, and other user experience issues.
- Ensured changes/updates in the website met set standards and specifications.
- Utilized monitoring and reporting tools like AzDO and drive optimization.

Website: Python Grade Calculator

- Coordinated with front-end developers and development teams to determine application requirements.
- Developed back-end components to improve responsiveness and overall performance.
- Integrated user-facing elements into applications.

LEADERSHIP

Non-Profit Organizations | Event Coordinator/Organizer

June 2021 - Present

- Trained and Managed Volunteers across multiple initiatives — creating onboarding systems, delegating responsibilities clearly, and nurturing leadership in others through mentorship and positive reinforcement.
- Supported Teachers as a dedicated note-taker for intensive seminars — demonstrating attention to detail, strong communication, and the ability to handle responsibility under pressure.
