ACADEMICS

- Florida Atlantic University** Boca Raton, Florida, USA
Masters of Science - Computer Science Current GPA: 4.0/4.0 August 2022 - May 2024
- Velagapudi Ramakrishna Siddhartha Engineering College** Vijayawada, AP, India
Bachelor of Technology - Electronics and Communication Engineering; GPA: 3.6/4.0 July 2016 - September 2020

SKILLS SUMMARY

- Languages:** Python, C, SQL, MongoDB, HTML, CSS, JavaScript, React (basics)
- Libraries:** NumPy, NLTK, Pandas
- Web Frameworks:** Flask
- Softwares & Tools:** Jira, Siebel 21.9, Tableau, GitHub, MySQL, SQLite, Microsoft Excel, Jenkins.
- Platforms:** Windows, Web, Linux, Visual Studio Code, AWS (Basics), GCP(Basics)
- Soft Skills:** Leadership, Team Player, Adaptability, Communication, Public Speaking, Time Management

CERTIFICATIONS

- MongoDB Certification:** Completed the "MongoDB Python Developer Path" course in association with MongoDB University. (December 2023).
- AWS Certification:** Completed the "AWS Cloud Technical Essentials" course in association with Coursera. (December 2021).
- Python Certification:** Completed the "Python for Everybody" specialization course in partnership with Coursera, the University of Michigan. (April 2020)
- Flask Framework Certification:** Completed the "Flask Essential Training" course in collaboration with LinkedIn. (April 2020).

HONORS AND AWARDS

- On the Spot Team Awards:** Received two on-the-spot team awards within a three-month period at TCS for promoting seamless collaboration, leading to heightened team efficiency and project success. (January 2022 - March 2022)
- Project Level Appreciation:** Commended at the project level early in my TCS career for rapid learning and adaptation, earning appreciation for swiftly acquiring and applying new skills. (January 2021)
- TCS Case study Appreciation:** Received appreciation from the TCS Xplore team with a score of 85 out of 100 for satisfying all of the prerequisites and completing the case study with Python (July 2020)

EXPERIENCE

- Graduate Teaching Assistant, Florida Atlantic University, Boca Raton** On-Campus
Teaching Data Structures and Algorithm Analysis in Python (Spring, Fall semesters) January 2023 - Present
 - Organized weekly office hours for students to help with Python and data structures related doubts. Also, organized interactive discussion boards to dive deeper into the topics discussed in the class.
 - Conducted lab sessions for hands-on practice with a focus on data structures using Python.
 - Assisted the professor in designing practice worksheets and assignments for the students to create a strong knowledge of the essential concepts in Python and data structures.
 - Grading Assignments, Mid-Term Exams, and Final Semester Exams.
- Software Engineer, Tata Consultancy Services, Hyderabad, India** Offshore
Software Engineer (full-time) September 2020 - August 2022
 - Developed software solutions for a Belgium-based integrated telecommunications sales and services provider, "Proximus," mainly focusing on the sales application using Python, Siebel CRM (Oracle tool), SQL, HTML, CSS, JavaScript, and Agile methodologies.
 - Created Python scripts that interact with REST APIs to exchange data and to create new customer data and order records, resulting in a 30% reduction in the manual customer data creation.
 - Crafted sleek order screens, transforming JavaScript vanilla templates into tailored solutions. Developed core validation scripting rules, business services, API calls, and ordering workflows, which are used as order validations before order submissions.
 - Implemented code reusability and reduced bottlenecks, which increased ordering time efficiency by 10%.
 - Designed, developed, and integrated the sales applications using Siebel Tool, OpenUI, SQL, and scripting technologies. Maintained client relationships by identifying client needs and delivering on-time results.
 - Conducted regular sanity checks as a senior single point of contact (SPOC) during deployment processes.

PROJECTS

- **View My Images:**

- Developed a web application using Python Flask, HTML, CSS, JavaScript and hosted it using the Google Cloud Platform.
- Using this application, the user can securely signup, login, upload, download, and delete the images from the dedicated storage folders created for each user.
- Leveraged GCP functionalities for hosting, employing CICD, autoscaling, and traffic management.
- Integrated the Firebase API for user authentication, account creation, and secure login and utilized the GCP Datastore to store extracted image metadata. Utilized GCP Cloud Run to ensure scalability and efficient deployment.

Tech Stack: Python, Flask, HTML, CSS, JavaScript, GitHub, GCP Datastore, GCP Storage, GCP CloudRun, Firebase, Secret Manager (September 2023 - December 2023)

- **NFL Player Statistics:**

- Designed an interactive consolidated tableau dashboard, including six worksheets. Used Microsoft Excel to pre-process the data.
- Worksheets include the Individual Player Statistics worksheet, the Player Performance Parameters worksheet, the State-Wise Player Count worksheet, the College Wins and Losses worksheet, the College Wins vs. Losses worksheet, and the Top N Colleges worksheet.
- This provides the NFL draft selectors with detailed information regarding a player and helps them make a decision about choosing a player for their team.

Tech Stack: Tableau, Microsoft Excel (April 2023 - April 2023)

- **Student Management System:**

- Developed a dynamic web application hosted on the Heroku platform to facilitate seamless communication between parents and class teachers regarding students' performance.
- Implemented secure access for parents to view their child's academic details through a dedicated student login. Additionally, incorporated features enabling teachers to efficiently manage attendance and grades through a secure teacher login.
- Built the application with Python and Flask, leveraging SQL for the secure storage and retrieval of student information.
- Utilized Flask's session-based authentication method to grant secure access for both parents and teachers.

Tech Stack: Python, Flask, HTML5, CSS, JavaScript, SQL, Heroku, GitHub (November 2022 - December 2022)

- **Hospital Management System (Case Study):**

- Implemented using Python and Flask to create a robust and user-friendly web application.
- Functionalities include maintaining the day-to-day state of a patient's admission, medications, and diagnostic records of every patient until discharge.
- Utilized database for efficient storage and retrieval of patient data.

Tech Stack: Python, Flask, HTML5, CSS, SQL. (July 2020 - July 2020)

VOLUNTEER EXPERIENCE

- **Treasurer Department Cultural Club (Athisaya)** Vijayawada, AP, India
Planned and conducted various cultural events and games and served as Treasurer for a year. Jan 2019 - Sept 2020
- **Make A Difference (MAD)** Vijayawada, AP, India
Served as a Math Academic Support Volunteer and a Transition Readiness Wing-Man June 2018 - June 2020
- **National Service Scheme (NSS)** Vijayawada, AP, India
Organized events, conducted and participated in awareness campaigns, and distributed food. Jan 2017 - May 2020
