SUMMARY

Experienced full-stack developer specializing in integrating AI-driven solutions into web applications. Proficient in using modern technologies like React, Node.js, and Express to build scalable applications, with a strong foundation in both relational and NoSQL databases. Known for creating intelligent applications that enhance user experiences and automate workflows. Eager to leverage expertise in AI and the basics of AWS to contribute to a forward-thinking development team. In addition to the projects listed below, my portfolio includes: a digital clock app with a Chatbot, and an Apple clone (see the link above).
