Strategic Financial Analyst with expertise in financial modeling, budgeting, forecasting, and data analysis, supporting cross-functional teams in decision-making through detailed reporting and performance tracking techniques.

EDUCATION

Northeastern University | Boston, USA

January 2023 – June 2024

Master of Professional Studies in Analytics

Relevant Courses: Python Analytics Systems, Machine Learning, Database Management Systems, Artificial Intelligence, Business Intelligence and Project Management, Probability and Statistics, Enterprise Analytics, Data Mining, Big Data

WORK EXPERIENCE

Programmer Analyst

March 2022 - July 2022

COGNIZANT TECHNOLOGY SOLUTIONS, Hyderabad, INDIA

- Coordinated a significant project to design and build a strong database management system that reduced data handling operations, **increased data retrieval speeds by 40%**, and efficiently supported important business tasks
- Collaborated effectively with cross-functional teams to meticulously evaluate data requirements, resulting in the design and delivery of scalable, customized database solutions that were precisely aligned with the objectives of the project

Data Analyst

January 2020 – March 2022

MEDISTAR ENTERPRISES, Hyderabad, INDIA

- Led financial reporting and variance analysis** for the organization, identifying key cost-saving opportunities and supporting a **32% increase in revenue** by refining pricing strategies and enhancing client targeting.
- Compiled comprehensive budgeting and forecasting reports** to guide executive decisions, offering insights that improved cost management by 15%, leading to improvements and contributing to a 26% increase in overall satisfaction
- Developed an analytics dashboard** to monitor inventory levels and optimize stock availability, leading to proactive restocking and contributing to a **15% improvement in inventory turnover rates**.
- Collaborated with cross-functional teams** to deliver actionable reports, supporting timely decision-making and achieving a **98% success rate** in project deadlines.

Financial Analyst Portfolio Management – Self Employed

March 2019 – Present

- Managing a \$250K** diversified fund, conducting in-depth analyses of stock market trends and financial metrics to inform investment decisions, achieving an **average annual portfolio growth of 18%**. Consistently outperformed the S&P 500 index by an average of **5% annually** by segregating funds according to risk tolerance and diversification
- Applied technical analysis techniques, including chart patterns and indicators, alongside fundamental analysis by evaluating company **financial statements**, industry trends, and economic indicators to identify investment opportunities
- Utilized advanced statistical models and financial analysis tools, including **Excel and Python**, to predict market movements and optimize portfolio performance. Leveraged platforms like Bloomberg and Yahoo Finance for real-time data analysis, achieving a **56% return on a single investment**

SKILLS

Programming Python, SQL, R

Data Visualization Tableau, Power BI, Qlik, Alteryx

Financial Analysis Budgeting, Forecasting, Variance Analysis, Financial Modeling, Balance-Sheet Analysis

Software SAP, Microsoft Office, Microsoft Excel, Microsoft PowerPoint, Microsoft Dynamics 365, CRM

ACADEMIC PROJECTS

HR Analytics Dashboard

- Developed an interactive dashboard based on the Amazon Human Resource dataset highlighting crucial KPIs for over 1400 employees. This visualization greatly simplified decision-making in attrition and performance management
- Optimized operational efficiency by 15% and reduced data analysis time by 30%, allowing management to make more timely and informed choices about employee compensation and performance measures

Stock Price Prediction

- Implemented advanced statistical models, like Linear Regression, KNN, and ARIMA, to predict the Nasdaq 100 index.
- Achieved a predictive accuracy of 73%, demonstrating the model's durability in projecting future pricing patterns, this accuracy was crucial for data-driven decision-making, improving investment strategies and market positioning

Blue Bike Trip Analysis

- Analyzed 400,000 trip data, focusing on frequency and duration patterns in undocked, circular, and long-route trips
- Pinpointed peak BlueBikes usage times correlating with office hours, offering critical insights for operational planning
- Examined route popularity & station utilization across different rider types, for infrastructure & resource distribution
