EDUCATION

University of Illinois Chicago

Master of Science in Computer Science

Expected: Dec 2025

GPA: 3.72/4.00

- TOP-UIC double degree program, two Master's degrees in two years.

Politecnico di Torino

Master of Science in Computer Engineering

Expected: Dec 2025

GPA: 3.74/4.00

- Specialistic Track Computer Graphics and Multimedia.
- TOP-UIC scholarship and EXTRA-UE scholarship awarded.

Politecnico di Torino

Bachelor of Science in Computer Engineering

2020 - 2023

GPA: 3.7/4.00

- Exchange program at Mississippi State University in Fall Semester 2022, awarded with a scholarship.

EXPERIENCE

Data Management and Workflow Automation

2023

DENSO Thermal Systems

Poirino, Italy

- Worked for IT department, mastering management software, collaborating on workflow creation, enhancing user interfaces, and utilizing SQL for data management and reporting.
- Automated workflows used in a business unit of 200+ employees.

RESEARCH EXPERIENCE

Reserch Assistant

2025 - Present

University of Illinois

Chicago, Illinois

- Designed and developed a crowdsourced, data-driven React Native app (Expo) to quantify flavor perception in oncology patients. In collaboration with MD Anderson Cancer Center.
- Built a companion web-based visualization dashboard using React and D3.js to explore user-reported taste ratings across multiple sensory dimensions and support clinical insights.

PROJECTS

AI-Powered Chatbot

2024

- Developed an AI-powered chatbot for AROL Company, leveraging RAG and NLP to enhance customer interactions and support automation.
- The system processes data from 700+ machines, providing real-time insights and responses.

Game Web App

2024

- Collaborated with a team of four to design and develop an interactive multiplayer game.
- Led the development of the game's core functionalities using JavaScript and React, and implemented WebSocket protocols to facilitate seamless real-time communication between players.
- Successfully delivered a robust and secure application comprising 70,000+ lines of code.

Real-Time Face Recognition

2024

- Built a real-time face recognition system in Python, using OpenCV and the LBPH algorithm, implementing data collection, model training, and live recognition modules, achieving 98% accuracy.

Prodhero

Since 2021

- Co-founder of a photo and video production aimed at creating content for various activities and individuals. Successfully served 50+ clients, reaching an audience of 2M+ people.

PUBLICATIONS

- **Flavor Charter:** Development of a Smartphone App for Quantifying Food Flavor, Francesco Botto et al, pp. 1-8, Workshop on Computational Gastronomy: Data Science for Food and Cooking (CoGamy) at the International Conference on Data Mining (ICDM) 2025

SKILLS

- **Technical skills:** full-stack development, web development, neural networks, computer architectures, 3D design, computer vision, algorithms and data structures, data visualization.
- **Programming Languages:** JavaScript, Java, C, C++, Python, SQL, HTML, CSS, ARM, 8086
- **Frameworks:** React Native, Expo, React.js, Node.js, Express.js, Pytorch, Firebase, D3.js
- **Languages:** Italian (native), English (professional knowledge, IELTS 8), Spanish (basic knowledge)
