Building transactional web applications that power rail revenue systems, with expertise in Python APIs and AWS cloud deployment. Passionate about creating seamless customer experiences through robust backend systems and intuitive interfaces.

TECHNICAL SKILLS

Frontend: JavaScript, React, HTML5/CSS3, Accessibility Standards

Backend: Python (Django, FastAPI), Node.js

Cloud: AWS (API Gateway, EKS, IAM), Docker, Kubernetes

Data: SQL, Oracle PL/SQL, PostgreSQL

DevOps: GitHub Actions, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Full Stack Developer | Koyetech, Connecticut

2024–Present

- Architected RESTful APIs using FastAPI handling 1,200+ TPS during peak hours
- Containerized microservices using Docker achieving 99.98% deployment consistency
- Implemented JWT authentication reducing security incidents by 40%
- Mentored 2 junior developers in code reviews and AWS best practices

Data Engineer & Analyst | Infosys, Bengaluru

2021–2022

- Optimized PL/SQL procedures accelerating nightly batch processing by 65%
- Developed Python ETL pipelines processing 500K+ daily fare transactions
- Created React dashboard visualizing revenue trends for executives

PROJECTS

Fare Validation Gateway | FastAPI, AWS EKS

- Designed low-latency API processing 800+ validations/sec
- Implemented Redis caching reducing database load by 35%
- Configured AWS API Gateway with custom authorizers

Revenue Analytics Portal | Django, Oracle

- Built interactive visualizations of fare collection metrics
- Developed predictive models for ticket sales forecasting
- Ensured WCAG 2.1 AA compliance for accessibility

Cloud Migration Initiative | AWS, Terraform

- Containerized legacy apps using Docker
- Orchestrated deployment via Kubernetes
- Implemented IAM policies for least-privilege access

EDUCATION

M.S in Information Technology

2024

Arizona State University | GPA: 3.4

B. Tech in Electronics and Communication Engineering

2021

Reva University | GPA: 3.2
