## Professional Summary

---

Detail-oriented Java Full Stack Developer with nearly 2 years of industry experience designing, developing, and maintaining scalable enterprise web applications. Skilled in Java, Spring Boot, and RESTful services on the backend, with strong front-end expertise using React.js and JavaScript. Experienced in Oracle and PostgreSQL databases, Agile practices.

## Technical Skills

---

**Languages:** Java, C#, Python, JavaScript, SQL (MySQL, PostgreSQL, Oracle)

**Frontend:** React.js, HTML, CSS, JavaScript, Chart.js

**Backend:** Node.js, Spring Boot, .NET Core, REST APIs

**Database:** MongoDB, Oracle DB, MySQL, PostgreSQL

**Tools & Platforms:** Git, DevOps, Agile (Scrum), Power BI, Tableau, Postman

## Professional Experience

---

### Java Full Stack Developer, CSG International

Aug 2021 – June 2023

Developed enterprise telecom applications with end-to-end functionality using Java, Spring Boot, React.js, and RESTful APIs. Built backend microservices using Spring Boot for customer billing, service activations, and plan configurations. Designed responsive front-end modules in React.js to enhance the SingleView user interface for customer service operations. Developed reusable React components and integrated them with RESTful APIs. Led the integration of Oracle and PostgreSQL databases by writing complex stored procedures and optimizing SQL queries and Participated in Agile sprints, including daily stand-ups, sprint reviews, and planning sessions.

### Teaching Assistant – Java Programming, GITAM University

Nov 2020 – June 2021

Conducted Java programming lab sessions for undergraduate students, focusing on OOP concepts, error handling, file I/O, and Java collection frameworks. Mentored project teams to apply core programming skills in building Java-based applications and guided them in debugging and optimizing their codebase. Supported the course instructor in evaluating assignments.

## Projects

---

### SmartExpense – Expense Tracker Web App

Jan 2022 – Feb 2023

*Tech Stack:* React.js, Node.js, Express.js, MongoDB, JWT, Chart.js

Developed a responsive MERN stack web application that enables users to log, manage, and visualize daily expenses. Implemented secure authentication using JWT, designed dynamic dashboards with Chart.js, and created modular REST APIs for expense categories and filtering. Deployed using Heroku and connected to MongoDB Atlas for scalable cloud storage.

### EduResults Portal – Academic Results Management System

Aug 2020 – Dec 2020

*Tech Stack:* C#, .NET, Oracle DB, HTML/CSS/JS

Led a 5-member team in developing a role-based web application for securely managing and publishing academic results. Designed front-end forms and backend logic, wrote complex SQL queries for data retrieval, and implemented access control and audit logging for administrators and students.

## Education

---

### Master of Science in Computer Science, Florida State University

Aug 2023 – Dec 2024

GPA: 3.75/4.0

Relevant Coursework: Software Engineering, Database Systems, Machine Learning, Advanced Operating Systems

### Bachelor of Technology in Computer Science and Engineering, GITAM University

2018 – 2022

GPA: 8.35/10.0

Relevant Coursework: Data Structures and Algorithms, Database Management System, Computer Networks
