

Full Stack Java Developer

Email: chakravarthibodapati@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/chakravarthi-bodapati/>
Mobile: +1 9373055648

PROFESSIONAL SUMMARY

Skilled Full Stack Java Developer with Overall 4 years of experience in designing, developing, and deploying scalable enterprise applications using Java/J2EE, Microservices, AWS, Azure, and front-end frameworks. Expertise in React.js, Angular, Node.js, Spring Boot, Hibernate, and DevOps tools. Proficient in cloud-based architecture, containerization, CI/CD, Agile methodologies, and security implementations. Strong analytical and problem-solving skills with a deep understanding of distributed systems, high-performance computing, and API development.

TECHNICAL SKILLS:

Programming Languages: Java, J2EE, Python, C, C++, PL/SQL

Web Technologies: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular, React.js, Redux, Vue.js, TypeScript, Node.js, REST, SOAP

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, JPA, Struts, Express.js, Next.js, Flask, Django

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Jenkins, Terraform, Ansible, CI/CD, OpenShift

Databases: Oracle, MySQL, SQL Server, PostgreSQL, MongoDB, Cassandra, DynamoDB

Messaging & Caching: RabbitMQ, Kafka, Redis, Memcached

Testing & Tools: JUnit, TestNG, Selenium, Postman, Mockito, Cucumber, Cypress

Version Control & Build Tools: Git, Maven, Gradle, Bitbucket, Jenkins, GitHub

Operating Systems: Windows, Linux, Unix, MacOS

PROFESSIONAL EXPERIENCE:

Client : Alliant Group, Houston, TX

Full Stack Java Developer | Mar 2024 – Present

Created a

real-time

investment

trading

dashboard with Spring

Boot,

Node.js,

and

Express.js for facilitating effective trade execution and portfolio management.

Built

an interactive UI

with

Angular

14,

Vue.js,

and

TypeScript featuring real-time

stock

price

feeds, interactive charts, and market analytics.
Implemented microservices

architecture

with

Kafka

and

RabbitMQ

for

low-latency

trade

processing

and event-driven transaction management.
Migrated

trading

applications

to

Google

Cloud

Platform

(GCP) with

Kubernetes

and

Terraform

for

automated infrastructure management.
Combined

OAuth

2.0,

JWT,

and

Spring

Security for

secure

authentication

and

role-based

access for administrators, traders, and analysts.
Set

up and

orchestrated containerized

applications using

Docker

and

Kubernetes

for

high

performance

and
reliability.
Developed

RESTful

APIs

for

retrieving

real-time

stock

market

data,

historical

trade

analysis,

and algorithmic trade execution.

Streamlined

CI/CD

pipelines

using

GitHub

Actions

and

Jenkins

for

enhanced

deployment

efficiency

and minimized system downtime.

Environment: Java, Spring Boot, Angular 14, Vue.js, Node.js, Express.js, MongoDB, PostgreSQL, Google Cloud Platform (GCP), Azure Functions, Kubernetes, Terraform, Kafka, RabbitMQ, Jenkins, GitHub Actions, RESTful APIs, OAuth 2.0, JWT, Docker, CI/CD.

Client : Express Scripts(remote)

Full Stack Java Developer | Jun 2023 – Feb 2024

Designed and implemented a Microservices-based architecture with React.js and Spring Boot, improving system modularity and maintainability.

Developed various Single Page Applications (SPA) using React.js, Redux, and React Router, enhancing front-end performance and usability.
Migrated on-premise applications to

Azure Cloud, implementing CI/CD pipelines using Jenkins and GitLab CI/CD for automated deployments.
Implemented

API

Gateway

and

service

mesh

patterns

to

enable

secure

and

efficient

microservices communication across multiple teams.

Integrated

event-driven

services

using

Kafka,

ensuring

real-time

data

processing

and

system

synchronization.

Developed

RESTful

services

with

Spring

MVC

and

JAX-RS,

streamlining

backend

operations

and

improving API performance.

Optimized SQL queries and database indexing strategies, reducing query execution time and enhancing

database efficiency.

Enhanced

security

with

OAuth

2.0,

JWT

authentication,

and

Azure

AD

integration,

ensuring

secure application access.

Environment: Java, Spring Boot, React.js, Redux, Node.js, Azure, Kubernetes, Kafka, RabbitMQ, OAuth 2.0, Jenkins, MongoDB, PostgreSQL, CI/CD, API Gateway, Azure AD

Smartron, India

Java Developer | January 2020 – Jun 2022

Developed RESTful

and

SOAP-based

web

services

for

enterprise

applications, enabling seamless

data exchange and integration.

Developed

dynamic

UI

components

with Angular, Bootstrap,

and

jQuery

for enhanced user

interaction

and

experience.

Configured

and

maintained

CI/CD

pipelines

with Jenkins,

GitLab CI/CD,

and

Azure DevOps

for

continuous delivery and automation.

Developed

and

maintained

cloud-native

applications

with AWS

Lambda,

S3,

and
DynamoDB, streamlining
serverless operations.
Integrated

JMS

for

asynchronous

communication

among

microservices,

improving

system

efficiency.
Used

Elasticsearch

and

Kibana

for

log

gathering
,

analysis,

and

real-time

system

monitoring.
SQL
and
NoSQL

databases

were
optimized and

modeled
to
maximize data

storage,

retrieval,

and
processing efficiency.
Developed

GraphQL

APIs

for effective
data

querying

and

manipulation
to achieve

optimal

API
performance.

Environment: Java, Spring Boot, Angular, Node.js, AWS, Lambda, Elasticsearch, PostgreSQL, DynamoDB, Docker, Git, Jenkins, GraphQL, Kubernetes, SOAP, RESTful APIs

EDUCATION:

Masters: University: Northern Arizona University, Computer Science, Flagstaff, AZ –
2024 Bachelors: University: RVR & JC College Of Engineering , Computer Science,
India - 2021

CERTIFICATIONS:

Successfully

Completed

Certification

Course

in

The

Joy

of

computing

using

python

conducted

by NPTEL

in November 2019.

Successfully

Completed

Certification

Course

in

Introduction

to

Block

Chain

conducted

by NPTEL

in November 2020.
