

YASH GABALE

Atlanta,GA | (470) 907-0068 | yashgabale44@gmail.com | Portfolio | Linkedin | Github
Open to work for Full-Time or Contract(W2) | Open to Relocation

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, PHP, SAML.

Web Technologies: HTML,CSS, NodeJS, React.

Relational Database: SQL **Non- Relational Database:** MongoDB

Cloud Infrastructure: AWS Services, Google Cloud services.

Tools: Kali Linux, Wireshark, Microsoft Office tools, Figma, SIEM, Google Chronicle, IAM .

PROFESSIONAL EXPERIENCE

Software Engineering Intern, Gigaplex Academy, Atlanta,USA

Sept 2025 - Current

- Developing and integrating a custom payment solution using **WordPress** and Stripe **RESTAPI** to automate the flow of transaction data between client bank accounts and the bookkeeping system.
- Redesigning key front-end components to intuitively introduce and showcase new product features to users

Graduate Research Assistant, Kennesaw State University,GA

Aug 2024 to May 2025

- Researched different user-centric methods for mental health app development, utilising **Java**.
- Conducted a systematic literature review across 10+ academic databases, reducing 10,000+ articles to 900 using **Excel** and **Python**, eliminating 91% redundancy through advanced transformation data cleaning.
- Shortlisted 30 eligible studies and co-led student/stakeholder interviews, applying communication and multitasking skills to wireframe a prototype using Figma.
- Contributed to UI/UX design and developed prototypes for a mobile app; supported usability testing, leading to a 25% boost In user satisfaction during early iterations, consider user feedback.

Full-stack developer, Sahyadri Aerospace, India

Aug 2022 to Aug 2023

- Developed and deployed a web-based customer support portal that replaced the legacy email-driven system, enabling customers to raise and track issues in real time. Reduced resolution time by 30% 3 days to 2 days, boosting customer satisfaction and operational efficiency.
- Engineered responsive, scalable front-end applications using **HTML, CSS, JavaScript, React.js** and integrated backend services with **Node.js** and **PostgreSQL**, ensuring high performance, reliability, and maintainability.
- Contributed to the full SDLC in an Agile environment, collaborating with cross-functional teams and co-designing **CI/CD** pipelines to enable faster, secure, and reliable deployments aligned with DevOps best practices.

EDUCATION

Master's of Science in Information Technology

Atlanta,GA

Kennesaw State University,

Jan 2024 to May 2025

Coursework: Business Analysis, Data visualisation, Practical Data Analytics, Ethical Hacking, Information security concepts & administration, IT design studio.

Bachelors in Electronics and Telecommunication Engineering

India

Savitribai Phule Pune University,

July 2018 to July 2023

Coursework: Data structures and algorithms, Object-oriented Programming, Fundamentals of Java programming, Advanced Java Programming, Database Management system, Cloud Computing, Deep Learning.

RESEARCH PRESENTATION

Emily Espinoza, Yash Gabale, Kanu Priya Singh. (2026, Accepted). **Designing Technology with**

Empathy: Insights from Students Navigating Mental Health in College. In 2026 American Educational Research Association (AERA) Annual Meeting, Los Angeles, CA.

PROJECTS

Blockchain-Enabled Facial Identification System for Secure Enterprise Access

Jan 2025 to May 2025.

- Password-less facial-ID login secured by an Ethereum smart contract replaces passwords for Users, Admins, and Super Admins.
- React + Developed REST APIs on Node.js front-end/back-end, Solidity contract on Ganache, activity logs enriched via Web3, all reverse-proxied through Nginx and secured with Let's Encrypt on an AWS EC2 instance; challenges such as address reuse, CORS, EIP-1559 gas issues and SSL setup were resolved during development.
- Five teammates shipped the full system and docs on schedule in a 12-week agile sprint.

HEAL Web-Based Healthy Living Platform

Aug 2024 to Dec 2024

- Created a platform using the MEAN stack to promote healthy living.
- Enabled users to purchase nutritious food from various merchants.
- Designed and deployed RESTful API, implemented CRUD operations.

CARIT – Center for Applied Research in Information Technology

Jan 2024 to Apr 2024

- Created a website to expedite department hiring and verify student eligibility.
- Utilized **HTML, CSS, PHP, and JavaScript** for web development
- Potential to reduce hiring decision time by 30%..

TRAINING AND CERTIFICATION

- Google certified - Professional Cloud Security Engineer
