Professional Profile

A versatile and dedicated software developer with over 5 years of experience in designing and developing complex systems. With a background in the Department of Defense industry, I have built a strong track record in software development, problem-solving, and effective team collaboration. Skilled in creating innovative solutions using various programming languages and system design techniques. I'm passionate about providing exceptional customer service and communication, and I'm eager to continue excelling while contributing my technical expertise to drive organizational success and my personal growth.

Education

Florida International University (FIU) — *Bachelor of Science in Computer Science*
Graduation: May 2023 | GPA: 3.280

January 2021 to May 2023

The Citadel / Senior Military College — *Charleston, South Carolina*

May 2019 to December 2020

Miami Dade College (MDC) — *Dual Enrollment Program / Early Admission*

Professional Experience

Bursor & Fisher PA
Data Analyst (Full-time)

Feb 2025 - Present

- Would generate HAR files and analyze data to see for PII (personally identifiable information) leakage that would make certain websites viable for lawsuits
- Would make in-house Developer Tools via VSCode for personal/team use to make scraping and searching for sights and keywords much easier. Were also used to hash, encode, unhash, and decode certain PII or confidential website selections.

Would write reports based on data found in network traffic to be utilized by firm lawyers during class action lawsuits

Department of Defense / National Security Agency — Fort Meade, MD
Software Developer (Full-time)

May 2023 - May 2024

- Developed and implemented software solutions for national security systems.
- Contributed to the creation of graphical user interfaces (GUIs) and file management functions.

Software Developer Intern – STOKES Scholarship

- July 2019 - May 2023

- Created a GUI for RF interface and implemented a file-saving function ensuring files are linked correctly through their names.
- Developed a program to process JSON file inputs, apply user-selected modular settings, and return the modified files.
- Ensured visuals and window designs in group projects adhered to GUI guidelines.
- Completed various Linux courses provided by the agency.

-

Technical Skills

- **Programming Languages:** Java, C, C++, Python, JavaScript, HTML, CSS
- **Software Development:** Linux/Windows Software Development, Object-Oriented Programming (OOP), Multithreaded Programming, Agile Methodologies, Version Control (Git)
- **Web Development:** HTML, CSS, JavaScript
- **System Design & Debugging:** Debugging, System Design, Data Structures, Algorithms
- **Specialized Skills:** Semiconductor Industry-Oriented Development

Certifications

- Autodesk AutoCAD Certified User
 - Statement of Eligibility in Mathematics Grades 6-12 — Florida Department of Education
-

Leadership & Awards

- **Eagle Scout** — Boy Scouts of America (National, 2018)
 - **Black Belt (Shodan Ho)** — Joshinmon Shorin Ryu Karate-Do (2013)
 - **National Honor Society**
-

Internship Experience

- **Department of Defense / National Security Agency** — *Software Developer Intern (STOKES Internship)*
 - **Miami Dade Youth Commissioner District 11th** — *2018-2019*
 - **President's Volunteer Service Award** — *2017, 2018 National*
 - **Motorola Solutions Mentoring Program** — *Summer 2018*
 - **Norwich University Summer Future Leader Camp** — *Summer 2018*
 - **Cadet Basic Training, Extreme Military Challenge** — *Summer 2017*
-

Languages

- **English:** Fluent
 - **Spanish:** Fluent
