- **LIBRARIES:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, Algorithms.
- **SOFTWARE TOOLS:** SQL Server, MySQL, Mongo DB, SSIS, SSAS, Data warehouse, Talend, Machine Learning.
- **VISUALIZATION SOFTWARE:** MSBI, Power Bi, Tableau, Flourish, Microsoft Office, Data wrapper.
- **CLOUD TOOLS:** Microsoft Azure, AWS

RELEVANT WORK EXPERIENCE

Summit Global Consulting
Data Analyst Intern

Boston, Massachusetts
January 2025 - April 2025

- Integrated 10+ public datasets using SQL and Python in Power BI for city-wide analysis and standardized reporting.
- Analyzed \$50M+ in government funding using Excel and R, uncovering financial patterns and insights.
- Developed Power BI dashboards to enhance access to government contracts for 1,000+ minority-owned businesses.

Think and Learn India Pvt. Ltd.
BI Development

Hyderabad, India
October 2021 - March 2023

- Engineered data workflows using Derived Column, Lookup, and Conditional Split transformations, handling over 1M records and improving data accuracy by 20%.
- Orchestrated SSIS packages to integrate multiple data sources, applying transformations such as Data Conversion and Merge, resulting in a 30% increase in processing efficiency.
- Collaborated with the sales team to develop a Power BI dashboard, crafting 30+ SQL queries on production databases, resulting in a 15% increase in revenue, a 20% boost in conversion rates, and enhanced sales productivity.

Metafin Consulting India Private Limited
Associate Analyst

Hyderabad, India
December 2020 - August 2021

- Extracted, cleaned, and consolidated data from 5+ sources, including databases, Excel files, and CRM systems, into Power BI, boosting reporting accuracy and efficiency by 20%.
- Engineered automated data transformation workflows using Power Query, slashing data processing time by 30% and accelerating the generation of actionable insights.
- Designed 15+ interactive dashboards and delivered tailored reports to 20+ stakeholders, enhancing data accessibility by 35% and driving strategic decision-making.

TECHNICAL PROJECTS

HR Analytics Employee Attrition & Performance Using AWS and Power BI

September 2024 - December 2024

- Devised a scalable AWS data pipeline to process and analyze HR data, uncovering key employee attrition insights.
- Utilized advanced SQL transformations to integrate datasets and optimize OLAP structures for precise analytics.
- Created interactive dashboards to visualize attrition trends, empowering HR teams to enhance retention strategies.

Design and Implementation of a Clinical Trial Data Warehouse

September 2024 - December 2024

- Architected a data warehouse integrating over 1 million clinical trial records for centralized management.
- Optimized ETL workflows with SQL transformations, improving data quality and cutting processing time by 40%.
- Delivered OLAP-ready datasets powering 20+ clinical KPIs for trial success and site performance insights.

Explainable AI in EEG-Based Seizure Detection

January 2024 - April 2024

- Developed a hybrid feature extraction framework using wavelet transforms, entropy measures, and CNN features.
- Implemented SHAP and LIME to provide global and instance-level interpretability for seizure predictions.
- Achieved improved model sensitivity (40%) and specificity (70%) using Random Forest and CNN models.
- Identified critical biomarkers (e.g., delta band power) to enhance clinical trust and decision-making.

LICENSURE

- [Microsoft Certified Power BI Data Analyst Associate and Completed Data Analytics Internship at KPMG](#)
