

Ganesh Sathvik Palempati

Java Full Stack Developer

+1 316-992-1521

Sathvikganesh2001@gmail.com www.linkedin.com/in/ganeshsathvik-palempati/

SUMMARY

- Around 4 years of professional experience in web-based enterprise applications as a **Java Full Stack Developer**.
- Expertise in design, development, testing, deployment, integration, documentation of different **software applications**.
- Proficient in developing scalable applications using **AWS, Google Cloud Platform (GCP), and Pivotal Cloud Foundry (PCF)**.
- Experienced in **AWS Cloud platform** and its features which include EC2 AML, security groups, EBS Cloud watches, AWS Config, Auto-scaling, IAM and AWS S3
- Expertise in **Front-End Technologies** like **React.js, Angular, JavaScript, HTML5, and CSS3**.
- Proficient in **Java 8+, Spring Boot, Microservices, and RESTful API development**.
- Knowledgeable in Big Data technologies like **Snowflake, Hadoop, and Spark** for large-scale **data analytics** and **data warehousing**.
- Experienced in leveraging **CI/CD** tools like Jenkins, Team City, and Octopus for automating deployment pipelines.
- Skilled in writing automated test cases using frameworks such as **xUnit, Mockito, and TestNG** to ensure defect-free application delivery
- Skilled in **Agile, Scrum methodologies**, and implementing **CI/CD pipelines** using **Jenkins, Docker, and Git**.
- Strong expertise in relational and **NoSQL databases**, including **Oracle, PostgreSQL, MongoDB, and Cassandra**.
- Adept in creating, managing, and deploying RESTful APIs and Web APIs using **ASP.NET Core** and **Spring Boot**.
- Expertise in building **WSDL, SOAP** and **RESTful** implementation of using Jersey, Apache Axis, Spring Web Services.
- Worked with Software Development **Life Cycle SDLC** Requirements Specification, Design documents and writing Test cases - Waterfall to Agile methodology.
- Hands-on experience with **C#, .NET Core/MVC, and Blazor/WASM** for robust application development.
- Solid understanding of source control tools like **GIT** and advanced **SQL** for query optimization and **database design**
- Strong troubleshooting skills to debug and resolve production issues, ensuring minimal downtime.
- Complete understanding of the DevOps process with continuous integration using **Jenkins, JIRA, GIT, CHEF**.
- Experienced with RDBMS implementation and development using **Oracle, My SQL, MSSQL and DB2**
- **Proficiency in Cloud Technologies: AWS (EC2, S3, Lambda, RDS, IAM, API Gateway, CloudFormation), Azure, and Google Cloud.**
- **Strong knowledge of OOP, Data Structures, Algorithms, Multi-threading, Memory Management, and Concurrency.**
- Expertise in database modelling and development using **No SQL** Database such as **MongoDB and Cassandra**.
- Experience in using version control and configuration management tools like **GIT, SVN and CVS**.
- Experience in using the tools like **Ant and Maven** for build automation.
- Extensive experience in testing on multiple operating systems including **Linux, Unix, Sun Solaris, and Windows**
- **Experience in the Banking and Finance domain and familiarity with security best practices, authentication (OAuth 2.0), and DevOps automation.**

TECHNICAL SKILLS

- **Programming Languages:** Java, J2EE, PL/SQL, Python, C, C++, .NET, ASP.NET, C#, Power BI, micro-Visio, Salesforce, SAP, SAP3, Swift
- **Cloud Services:** Amazon Web Services (AWS). Azure, Platform (GCP), Pivotal Cloud Foundry (PCF)
- **Front-End:** React.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, jQuery
- **Scripting Languages:** XML, XHTML, HTML, CSS, JavaScript, AJAX, jQuery,JSON,Angular2.0,Bootstrap,NodesJS,Next.js,reactJS,Typescript
- **Tools:** Junit, Selenium web Driver, TestNG, Protractor, Mockito, ERP.
- **Frame Works:** Struts, Spring, JSF, JPA, EJB and Hibernate, JMS, Spring MVC, Spring Security
- **Web Services:** SOAP, UDDI, WSDL, JAX-RS, JAX-WS, RESTful Web services, AWS, Microservices.
- **Databases:** Oracle 11g, MySQL, PostgreSQL, DB2, MongoDB, Cassandra.
- **Big Data Technologies:** Big Data frameworks like Hadoop and Spark, Data Lake, Snowflake, Cassandra, MongoDB, Synapse.
- **Debugging Tools:** JIRA, Jenkins, CHEFF.
- **DevOps and CI/CD:** Docker, Kubernetes, Jenkins, Git, GitHub, GitLab, Bitbucket.
- **Version Control:** Git, Tortoise SVN, CVS, Bamboo.
- **IDE Tools:** Eclipse, Net beans, IntelliJ, IBM RAD, ANT, Maven, STS, Visual Studio (2.1), Eclipse (2021-09), Google Collab (2024), Xcode(12.5).
- **Application Development:** Agile Methodologies (Scrum, Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD), Continuous Integration/Continuous Deployment (CI/CD), SCM.

- **Methodologies:** Agile (Scrum), Test-Driven Development (TDD), Behavior-Driven Development (BDD)
- **Web/App/DB Servers:** IBM WebSphere, WebLogic, Apache Tomcat, JBoss.
- **AWS:** EC2, Auto scaling, Docker, IAM, VPC, SNS, Lambda, AWS SDK'S, Elastic cache, Ops Works, Security Groups, DNS, Route53, Cloud Formation, RDS, Dynamo DB, Storage Gateway, API Gateway, Cloud Watch
- **Tools and Platforms:** HexaTime for time management and productivity tracking, Apache Kafka for data streaming
- **Other Tools:** Microsoft Office (Excel, Word, PowerPoint, Access), D365, Advanced Excel (Pivot Tables, VLOOKUP)

EDUCATION

Master's in computer sciences

Wichita State University, KS, USA

📅 01/2023 - 05/2024

Bachelor's in computer sciences

Amrita Vishwa Vidyapeetham, Karnataka, India

📅 03/2018 - 01/2022

EXPERIENCE

Innovative Physical Therapy

Lead Java Full Stack Developer

📅 05/2024-Current 📍 KS

- Design and manage the medical healthcare software, ensuring it meets the needs of the organization. Adopt the existing software to meet current and future requirements, ensuring scalability and flexibility.
- Designed and managed **OT solutions** for medical healthcare software using **Microsoft Azure**, ensuring seamless **integration with IIoT and PCN system**
- **Designed and developed enterprise healthcare applications using Java 8, Spring Boot, and React.js.**
- Designed front-end screens using **JSP, JSTL, Servlets**, and **HTML5**, integrating with **RESTful APIs**.
- Developed large-scale data pipelines with **Apache Kafka** and **Snowflake** for real-time processing.
- Configured deployment pipelines and version control systems using **Jenkins, GIT**, and **Docker**
- Developed and deployed **RESTful Microservices** for seamless integration between medical data processing modules.
- Created Web APIs using **ASP.NET Core** for modular backend services, ensuring seamless integration.
- Enhanced application testing with unit and integration tests using xUnit and **TestNG frameworks**.
- Defined **AWS Security Groups** which acted as virtual firewalls that controlled the traffic allowed to reach one or more **AWS EC2** instances.
- Created **responsive and interactive UI components** using **React.js** and **Angular**.
- Developed **Azure-based edge computing solutions**, optimizing **real-time industrial data** processing.
- Developed cloud-native APIs and services using **Spring Boot/Java**, ensuring high availability and scalability across distributed systems.
- Implemented **Azure IoT Hub** and **Azure Digital Twins** to model complex industrial environments and monitor operational efficiencies.
- Leveraged **Snowflake** to enhance data warehousing capabilities, optimize query performance and reduce storage costs by utilizing cloud-native architecture.
- Involved in developing **UI** using **Spring MVC** framework, **JSP, JSTL, HTML5, CSS, Java script, JQuery, AJAX** and **React.js**.
- Created Reusable Modules and Custom Directives in **Angular** which got used in various places of application.
- Implemented **AngularJS** Controllers to maintain each view data. Implemented Angular Service calls using Angular Factory tested all application controllers extensively with AngularJS built-in testing facilities.
- Used design patterns like **Singleton, Data Access Objects, Factory** and **MVC patterns**.
- Testing and production support of **core java** based **multithreading ETL** tool for distributed loading **XML** data into **GCP database** using **JPA/Hibernate**.
- Created responsive and interactive user interfaces using React, enhancing user experience and engagement.
- Developed **microservices** with Spring and tested the application using Spring Boot.
- Used **Spring Core annotations** for **Spring Dependency Injection, Spring MVC** for **Rest API's** and **Spring Boot** for **microservices**.
- Development of cloud hosted web applications and **REST APIs** using Spring Boot with embedded **Tomcat**.
- Deployed and managed microservices using Kubernetes, enabling automated scaling, self-healing, and seamless deployments.
- Deployed the application on **Amazon Web services (AWS)** and used it to provide a large computing capacity for scalable solutions.
- Deployed applications into Continuous integration environments like **Jenkins** to integrate and deploy code on CI environments for development testing
- Implemented **CI/CD pipelines** using **Jenkins, Docker**, and **Git**, ensuring automated deployment and high system availability.
- Integrated **Kafka and Snowflake** for real-time data processing and analytics.
- Collaborated with **business stakeholders** to create an **OT technology roadmap**, aligning with strategic business goals.
- Led OT security initiatives, ensuring **regulatory compliance** with **NIST, ISA/IEC 62443**, and **O&G safety standards**.

- Applied **HexaTime** for project time management, streamlining workflows and tracking productivity across Agile sprints.
- Integrated **ActiveMQ** and **spring JMS API** to send and receive message for the application's **restful API**
- Enhanced application security by implementing **Spring Security** and **OAuth 2.0 authentication**.
- Experience in design and development of **Web services, JAX-RPC, JAX-WS, RMI, JTA, JMS and XML, XSD, XSLT, X-Path**.
- Used **JIRA** tool for Issue/bug tracking, monitoring of work assignment in the system.
- Experience on implementation of version control software **GIT** repositories.

CVS Health

Java Full Stack Developer

📅 05/2023-04/2024 📍 NJ

- Developed scalable web services using **Spring Framework** and **ASP.NET Core**, focusing on **RESTful APIs**
- Provided technical support and debugging expertise, ensuring resolution of production issues.
- Designed scalable OT applications integrating **PCN architectures** with **cloud-based monitoring systems**.
- Utilized **GCP** for multithreaded **ETL processing**, **streamlining data** transformations and **storage**.
- Managed and optimized database operations in Oracle and PostgreSQL, ensuring high availability.
- Developed **microservices architecture** using **Spring Boot** and **ASP.NET Core** for **secure data exchange** between OT and IT environments.
- Integrated CI/CD pipelines using **GIT**, **Docker**, and **Jenkins** for seamless application deployment.
- Integrated **real-time industrial data pipelines** with **Apache Kafka** for high-throughput data processing.
- Deployed microservices on **Pivotal Cloud Foundry (PCF)**, ensuring resilient and fault-tolerant applications by leveraging PCF's managed container orchestration.
- Worked on Amazon **AWS cloud services** like Writing Lambda functions for producing data from different sources, S3 as
- Developed Angular module to dynamically update pages based on data from **REST services**.
- Developed large-scale **Big Data pipelines** for real-time data processing using Apache Kafka and Spark, enabling data-driven insights.
- Used advanced level of **jQuery, AJAX, Angular Js, Bootstrap and CSS layouts**.
- Utilized React components, hooks, and state management to build modular and maintainable code.
- Developed the presentation layer using **Spring MVC**, Spring Core for Inversion of Control (IOC), and application Context of Spring Framework in the project.
- Integrated **Snowflake** and **Data Lake** as a data repository for high-performance analytics, providing secure and scalable access to data across business units.
- Ensured **OT security compliance** through IAM, network segmentation, and encrypted communication channels.
- Integrated Apache Kafka for real-time data streaming and Apache Pulsar for messaging, enhancing high-throughput data processing and reducing latency.
- Migrated existing on-premises infrastructure into cloud using **AWS, Azure** and **GCP** its associated Services.
- Azure Resource Manager (ARM) provides security, auditing, and tagging features to help you manage your resources after deployment. Performed software engineering with **TDD, CI/CD** for high-quality code and faster delivery.
- Implemented the entire application using Core java, java Collections and **Spring MVC** design framework.
- Used Spring Core annotations for Spring Dependency Injection, **Spring MVC for Rest API's** and Spring Boot for micro services.
- Experience in **NoSQL** database like MongoDB installation, configuration and in designing MongoDB multi-shared cluster and monitoring with MMS.
- Installed the **WebSphere MQ** and involved in configuring MDB listeners, JMS resources, and queues and integrating with the WebSphere Application Server.
- Used **HexaTime** to track project milestones and manage time allocations within the team, ensuring on-time delivery and efficient resource management.
- Configuring WebSphere Application Server on multiple platforms for both horizontal and vertical scaling for Workload Management.
- Experience in working with NoSQL Database like **MongoDB** to manage extremely large data sets.

HDFC Life

Java Developer

📅 01/2021-12/2022 📍 India

- Designing **Class diagrams** and **Collaboration diagrams** using **UML** for system architecture.
- Gathering requirements and managing the design, development, and unit testing phases of application development, Unit testing and Bug fixing
- Developed **Microservices architecture** using **Spring Boot** and **ASP.NET Core** for scalable healthcare applications.
- Utilized **GCP for multithreaded ETL processing** with JPA/Hibernate, streamlining data transformations and storage solutions within cloud environments
- Implemented **REST APIs** to facilitate seamless communication between backend services and front-end applications.
- Designed cloud-native solutions in **PCF** for secure deployment of Java applications, leveraging PCF's platform services to manage application lifecycles effectively.
- Developing front-end web pages with **HTML5, CSS3, JavaScript**, and **jQuery**, delivering dynamic and responsive user experiences.
- Developed the application with Continuous Integration and Deployment using **Jenkins and AWS**

- **Improved system reliability through performance tuning, database optimization, and code refactoring.**
- Deployed the application in JBOSS server using Elastic Bean Stalk in **AWS** for a scalable and flexible infrastructure.
- Developed **web services** using **Spring Framework, Spring Boot, and Hibernate**, optimizing performance and scalability.
- Writing **JSP screens** and **Java Beans** for core business modules, enhancing functionality and operational efficiency.
- Optimizing **Cassandra** queries and configuring data replication strategies to improve data availability and retrieval speed.
- Implementing **Spring Boot Microservices** for message processing within a **Kafka** cluster, ensuring scalability and reliability.
- Designing Servlets and Objects using **J2EE standards** Take ownership of writing automated test cases using **Selenium Web Driver** and TestNG framework in Java. Used **Jenkins** for continuous integration and test automation.
- Perform functional testing of SOAP and **RESTFUL Web Services** using **SOAP UI Tool**.
- Using **Azure** Functions to integrate applications and run backend processes according to schedules without provisioning/managing servers.
- Setting up a **Continuous Delivery pipeline** with **Docker, Jenkins, and GitHub**, streamlining the deployment process and enhancing productivity.
- Utilized JAVA and HTML to design website page to make advertisements easier for users to View.
- Involved in walk through with the analysis for Use Cases and feasibility scope.
- Used Agile methodology for the iterative application development, weekly sprints, stand up meetings and customer reporting backlogs.
- Using **Agile methodology** with iterative development, including weekly sprints, stand-ups, and maintaining backlogs for effective project tracking.
- Developed front-end using **JSPs, HTML** and used **JavaScript** for client-side validations.

International Conference on Computing Communication and Networking Technologies (ICCCNT)

Research Assistant

📅 08/2020-12/2020 📍 India

I worked as Research Assistant for the project " RESNET-50, CNN and HNN Medical Image Registration Techniques for Covid-19, Pneumonia and Other Chest Ailments Detection".

- Involved in requirements gathering in design, development, Unit testing and Bug fixing.
- Developed the main page using **HTML5, CSS3, jQuery, and JavaScript**, enabling doctors to upload lung or chest X-ray images for diagnostic analysis.
- Created RESTful APIs to support **machine learning** models for medical imaging applications.
- Implemented backend services using **Java Spring Boot**, facilitating the processing and analysis of uploaded images using machine learning models.
- Developed **RESTful APIs** for seamless communication between the front end and back end, enabling efficient data transfer and retrieval.
- Conducted thorough unit testing and debugging to ensure high-quality code and optimal functionality of the application.
- Focused on creating a user-friendly interface to enhance the user experience, ensuring ease of use for medical professionals.
- Worked closely with team members to document design specifications and project updates, promoting transparency and knowledge sharing throughout the development process.
- Managed the storage and retrieval of image data and patient information, ensuring compliance with data protection regulations.
- Analyzed application performance and implemented optimizations to improve load times and overall responsiveness.
