

GANESH YALAVARTHI yalavarthiganesh358@gmail.com LinkedIn +16673695021	
I am a results-driven Business Data Analyst and AWS Certified Solutions Architect Associate with expertise in business intelligence, data governance, integration, modeling, and analytics. Skilled in Excel, SQL, Python, Tableau, Power BI, Azure, and AWS, I specialize in automation, reporting, and delivering actionable insights through advanced visualization and exploratory data analysis. With hands-on experience in Microsoft BI tools, Agile methodologies, and User Acceptance Testing (UAT), I ensure efficient project execution and stakeholder alignment. I also bring strong supply chain and 3PL exposure, including ERP systems such as SAP , Dynamics, and KPI reporting across inbound, outbound, and return workflows, driving improvements in inventory accuracy, operational efficiency, and compliance.	
Education: University of Maryland Baltimore County Master of Science in Management Information Systems (3.64/4.0) Specializations: Data Science and UX Design	Baltimore, MD Jan 2023 - Dec 2024
Certifications: AIGPE™ Certified Six Sigma White Belt, 2025 AWS Certified: Solutions Architect Associate (SAA-C03), 2024 CompTIA Network+ ce Certification, 2024 Oracle Database SQL Certified Associate (IZO-071), 2023 Microsoft Certified: Azure Fundamentals (AZ-900), 2022 Microsoft Certified: Power Platform Fundamentals (PL-900), 2021 Microsoft Certified: Dynamics 365 Core Finance and Operations (MB 300), 2021	
Work Experience: Account Analyst Intern Arvato (Client – Microsoft Supply Chain)	Louisville, KY May 2025 – Jul 2025
Responsibilities: - Built reporting solutions using Excel VBA, Power BI, SharePoint, and Power Automate, reducing manual reporting effort by 70% and providing leadership with real-time, data-driven insights to improve inventory accuracy and productivity. - Designed and deployed low-code workflows in Power Automate for quality alerts, approvals, and operational tracking, shortening response times and enabling faster decision-making across cross-functional teams. - Developed interactive Power BI dashboards to consolidate KPIs, trend analysis, and compliance metrics, improving business transparency and reducing reliance on manual spreadsheets and emails. - Analyzed large datasets from SAP (Inbound, Outbound, Returns) and ERP systems to generate operational KPIs, uncover process inefficiencies, and provide actionable insights for warehouse, logistics, and supply chain operations. - Collaborated with compliance and quality teams to reconcile SAP transactions, ensuring audit readiness, policy compliance, and minimizing data discrepancies. - Documented workflows and deviations, supported root cause analysis, and implemented corrective measures to improve inventory accuracy, reduce errors, and enhance process efficiency.	
Business Data Analyst VITG Corp	Baltimore, MD May 2024 – May 2025
Responsibilities: - Designed Power BI dashboards to visualize procurement and spend patterns, enabling executives to perform trend analysis, vendor negotiations, and budget forecasting, resulting in a 25% improvement in financial planning accuracy. - Conducted advanced data analysis using SQL, Python (Pandas, NumPy), and Excel (pivot tables, VLOOKUP, custom functions) to identify anomalies, sales trends, and financial discrepancies, enhancing forecasting precision and compliance reporting reliability. - Leveraged advanced Excel to reconcile management and regulatory reporting, uncovering financial discrepancies exceeding \$400M, which improved data integrity, compliance accuracy, and executive decision-making. - Developed a geospatial analytics tool using Amazon Bedrock, Folium, and spatial datasets to extract coordinates with 95% accuracy, allowing stakeholders to visualize regional performance and make data-driven market-entry decisions. - Partnered with cross-functional teams in Agile sprints (Jira, Confluence) to define KPIs, document requirements (BRDs/FRDs), and automate dashboards, reducing stakeholder reporting turnaround by 35%. - Authored process documentation and contributed to data quality rule definitions and validation checks, strengthening audit readiness and regulatory compliance accuracy. - Executed User Acceptance Testing (UAT) on reporting automation workflows to validate alignment with business and compliance needs, improving reporting accuracy and reducing reconciliation errors by 30%.	
Functional & Operational Analyst Accenture	Hyderabad, India May 2021 – Jan 2023
Client- Avanade Managed Services (Microsoft) Domain – Medical and Automobile - Facilitated requirements workshops with finance, supply chain, production, and operations teams, aligning Dynamics AX (SCM & Finance) capabilities with business needs across medical and automobile clients. - Conducted gap analysis and prepared functional specifications that optimized procurement, production planning, inventory management, and order-to-cash workflows improving efficiency and reducing cycle times. - Played a key role in the migration of Dynamics AX to Sage ERP, leading data reconciliation, process validation, and SIT/UAT coordination with finance and supply chain teams across multiple sites, ensuring smooth cutovers and minimal downtime. - Supported industry compliance standards, including HIPAA for medical data privacy and automotive quality standards (ISO/IATF 16949), by incorporating governance practices and ensuring ERP workflows met audit and regulatory requirements. - Led recurring project review meetings with cross-functional stakeholders to monitor ERP migration progress, resolve blockers, and align on next-phase action items. - Executed SIT/UAT test scripts for Dynamics AX supply chain modules (procurement, production, inventory), tracked and documented defects in Jira, and secured successful test sign-offs.	

- Developed end-user training guides and delivered workshops for finance, warehouse, and production floor teams, improving ERP adoption and reducing support tickets by **20% post-go-live**.
- Designed low-code automation solutions using **Excel VBA and Power Automate** to streamline reporting and approvals, reducing reporting cycle times and eliminating manual errors.
- Acted as a **Tier 2 escalation** point for Dynamics AX users, **reproducing issues, conducting root cause analysis**, and **coordinating fixes** with IT, increasing system stability and user satisfaction.
- Collaborated in Agile sprints to manage Dynamics AX user stories in **Jira**, accelerating delivery of enhancements through iterative testing, stakeholder feedback, and continuous improvement.

Data Analyst

IRIX Technologies

Hyderabad, India

Jun 2020 – May 2021

- Assisted in **data collection, cleansing**, and **preparation** using **SQL Server, Snowflake, Excel**, ensuring accurate datasets for reporting and analysis.
- Built **Power BI dashboards** and **SSRS reports** to monitor sales, financial KPIs, and supply chain performance, enabling managers to track trends and make data-driven decisions.
- Wrote **SQL queries** for extracting, joining, and validating data from SQL Server and Snowflake, supporting reconciliation efforts and root-cause analysis of discrepancies.
- Collaborated on a **data migration project to Azure Cloud and Snowflake**, assisting with dataset transfers, access controls, and validation checks to ensure business continuity.
- Partnered with senior analysts to design **weekly operational scorecards**, reducing manual reporting effort by 25% and improving vendor and inventory visibility.
- Performed **ad-hoc analysis in Excel (pivot tables, lookups, macros)** to detect anomalies in procurement and spending, supporting cost optimization initiatives.
- Contributed to **workflow automation prototypes in PowerApps**, digitizing manual approval processes and improving turnaround time for business requests.
- Authored **training guides and quick-reference documentation (SOPs)** for BI dashboards and reporting workflows, improving adoption and reducing repetitive support tickets.
- Participated in **Agile project ceremonies** (daily standups, sprint planning, retrospectives), supporting iterative delivery of data and reporting solutions.
- Proficient in all phases of the software development life cycle (**SDLC**), including design, development, testing, and deployment.

Technical Skills:

Programming & Automation: Python (Pandas, NumPy), R, C#, Java, JavaScript, SQL, Scala, HTML, CSS, VBA, SAP ABAP

Databases & Data Warehousing: SQL Server (SSIS, SSRS), PostgreSQL, MySQL, MongoDB, Snowflake, BigQuery, Cassandra, Azure Data Warehouse, Azure Analysis Services

ETL & Data Engineering: SSIS, Informatica, Apache Spark, Hive, Impala, DBT, Dataiku, SQL Server Data Tools

Data Analytics & Visualization: Power BI, Tableau, Cognos, Advanced Excel (Pivot Tables, VLOOKUP, Macros), MS Access, SQL Profiler

ERP & Supply Chain Systems: Microsoft Dynamics 365 (SCM, F&O, CRM, WMS), SAP S/4HANA (EWM, VMS, MM), Oracle EBS

Cloud & DevOps Platforms: AWS (EC2, S3, Lambda, RDS, IAM), Azure (Data Factory, Intune, Entra ID), Google Cloud Platform (GCP), Terraform, Jenkins, Docker, Git (GitHub, TFS, VSTS)

Governance, Compliance & Process: Data Governance (Collibra), Audit Support, Supply Chain Governance, Lean Six Sigma, SLA Monitoring, ITIL/ITSM Practices, Risk & Controls, Change Management, Standard Work Documentation

Project Management & Collaboration: Agile, Waterfall, MLOps, Jira, Confluence,Trello, Microsoft Project, MS Visio, SharePoint, Microsoft Office Suite, Microsoft Outlook, Microsoft PowerPoint, Microsoft Excel

Awards & Volunteering:

- Volunteer Intern – Flow AI (2025): Supported a SaaS web application project by improving database performance and assisting in testing and deployment tasks.
- Customer Support Worker – Compass Group (2024): Helped customers with food service inquiries and created a welcoming dining experience as part of a student community support program.
- Promotion – Accenture (2022): Advanced from **associate-level to analyst role** within a year, recognized for strong work ethic, problem-solving, and collaboration with teams and clients.
- Guinness World Record Contributor – Accenture (2022): Participated in a global company initiative that set a world record for the Largest Online Photo Album of People, showing teamwork and unity.
