

BHARGAVI GATTI

Stillwater, OK (USA) | 405-269-2976 | bhargavigatti9@gmail.com | <https://www.linkedin.com/in/gatti-bhargavi/>

SUMMARY

Analytical Data Analyst with 3+ years of experience in SQL, Power BI, Tableau, and Python, specializing in transforming complex data into actionable insights. Skilled in developing 25+ interactive dashboards, automating ETL workflows, and reducing data latency by 40%. Strong foundation in statistical analysis, predictive modeling, and reporting automation, with a proven ability to deliver data-driven strategies and collaborate across teams.

EDUCATION

Master of Science in Management Information Systems, Oklahoma State University, Stillwater, OK
Bachelor of Technology in Civil Engineering, Sri Venkateswara College of Engineering and Technology

May 2025
May 2020

WORK EXPERIENCE

Graduate Teaching Assistant, Oklahoma State University | Stillwater, OK

Aug 2024 – May 2025

- Assisted in teaching data wrangling, Python, SQL, and data visualization to 60+ students, helping them develop real-world problem-solving skills and applying theoretical concepts to practical datasets.
- Contributed to preparing and grading assignments, exams, and lectures, while providing one-on-one support for coding challenges and detailed feedback on analysis projects to enhance student comprehension and technical abilities.

Business Data Analyst, Cognizant Technology Solutions

Feb 2022 – July 2023

- Designed and implemented 25+ interactive dashboards using SQL, Power BI, and Tableau, delivering actionable insights that improved operational efficiency by 30% and enabled faster, data-driven decisions.
- Led the automation of ETL workflows using Oracle Data Integrator (ODI), reducing data processing time by 40% and ensuring 99% accuracy in a centralized data warehouse, enhancing data reliability and accessibility.
- Conducted in-depth data analysis with Oracle Business Intelligence (OBI), identifying 15+ market trends and producing reports that influenced strategic decisions, while collaborating with cross-functional teams to optimize reporting processes and improve organizational efficiency.

Data Analyst, Test Yantra Software Solutions

Mar 2021 – Jan 2022

- Spearheaded the development and ongoing maintenance of efficient data pipelines and interactive dashboards using Microsoft SQL Server and Power BI, enabling real-time data-driven decision-making across multiple internal analytics teams.
- Designed and implemented custom visual reports to track KPIs, optimizing workflows and improving operational transparency, which empowered departments to make informed decisions quickly.
- Partnered with cross-functional stakeholders to collect requirements, develop wireframes, and deliver customized dashboards aligned with business goals, significantly enhancing departmental performance.

ACADEMIC PROJECTS

Predictive Analytics Term Project, Oklahoma State University

Spring 2025

- Led the analysis of a real-world dataset using KNIME, applying the CRISP-DM framework to preprocess and clean data, ensuring accurate data transformation for predictive modeling.
- Developed and evaluated multiple machine learning models, including MLP, Logistic Regression, Decision Tree, and Random Forest, using cross-validation, data balancing, and performance metrics (accuracy, sensitivity, specificity, and ROC curve).
- Delivered a professional report and presentation, summarizing key findings, model evaluation, and actionable insights, effectively communicating results to stakeholders.

Advanced Data Wrangling Project Term Project, Oklahoma State University

Spring 2024

- Handled 50,000+ accident records by cleaning and normalizing CSV data, creating structured schemas, and inserting data into both SQL Server and MongoDB using Python for hybrid data storage and analysis.
- Designed and implemented a complete ETL pipeline with Python to transform multi-source datasets, achieving 98% data accuracy and enabling seamless cross-database querying (SQL + NoSQL).
- Utilized MongoDB for flexible data modeling, schema validation, and advanced aggregation to uncover accident hotspots and improve urban safety planning recommendations by 25%.

Data Visualization Project | Supermarket Sales Analysis, Oklahoma State University

Fall 2023

- Analyzed supermarket sales data to identify key trends in revenue, customer behavior, and product category performance across different branches and customer segments.
- Designed and developed interactive Tableau dashboards for visualizing KPIs such as sales by region, profit margins, customer types, and payment methods, enabling data-driven insights.
- Delivered actionable insights that highlighted high-performing segments and suggested optimization strategies, demonstrating proficiency in dashboard design, storytelling with data, and visual analytics.

TECHNICAL SKILLS & CERTIFICATIONS

Technical Skills: SQL, PL/SQL, Python (Pandas, NumPy, Scikit-learn), Power BI (DAX, Dataflows), Tableau (Storytelling, Dashboards), MongoDB, Microsoft SQL Server (2019/2022), MySQL, Oracle Business Intelligence (OBI), Oracle Data Integrator (ODI), Hadoop, KNIME, Excel (PivotTables, Power Query), Java, Bash, PowerShell

Analytics & Data Expertise: Data Visualization, Data Wrangling, Predictive Analytics, Machine Learning, Forecasting, Statistical Modeling, Regression Analysis, A/B Testing, Time Series Forecasting, Business Intelligence (BI), ETL (Extract, Transform, Load), Data Mining, Reporting Automation, Data-driven Decision Making

Project Management & Tools: SDLC, Cross-functional Communication, Data Pipeline Management, Problem Solving, Workflow Optimization

Certifications: Tableau Desktop Specialist, SQL, PL/SQL, Microsoft Power BI Desktop for Business Intelligence
