

SUMMARY

Data Analyst with 3+ years of experience leveraging advanced analytics to drive strategic decision-making. Proficient at transforming complex datasets into actionable insights using SQL, Python, and R. Expertise in implementing BI solutions, optimizing data pipelines, and conducting predictive analytics to boost operational efficiency and marketing effectiveness. Skilled in agile methodologies, stakeholder management, and translating technical findings into business value across diverse industries.

SKILLS

Methodologies: SDLC, Agile (Scrum, Kanban), Waterfall, Business Process Modeling, Use Case Development

Programming Languages: Python (NumPy, pandas, scikit-learn, Matplotlib, Seaborn), SQL, R

Data Visualization and BI Tools: Tableau, Power BI (DAX), Excel (advanced functions, pivot tables, VLOOKUP), Looker

Database Management: MySQL, PostgreSQL, Microsoft SQL Server

Big Data Technologies: Hadoop, Hive, Apache Spark

Data Processing and ETL: dbt (data build tool), Alteryx, Talend, Airflow

Statistical Analysis: Exploratory Data Analysis (EDA), Descriptive analytics, A/B Testing, Regression analysis, Hypothesis Testing

Cloud Platforms AWS (EC2, S3, SageMaker, Redshift), Google Cloud Platform, Microsoft Azure Data Factory, Databricks, Snowflake

Version Control: Git, GitHub

Project Management Tools: Jira, Confluence, Stakeholder Management, Change Management, Requirements Gathering

Soft Skills: Critical thinking, Problem-solving, Attention to detail, Data storytelling, Collaboration with cross-functional teams

EDUCATION

Master of Science in Information Systems | Northeastern University

May 2024

Masters in Mathematics | University of Mumbai

December 2021

Bachelors in Mathematics | University of Mumbai

May 2017

PROFESSIONAL EXPERIENCE

Data Analyst | Epsilon Boston, MA

January 2024 - Current

- Leveraged **SQL**, **VBA Macros**, **Pivot Tables & Pivot Charts** in **Excel** for advanced reporting (4 reports a month) and performance analysis of email campaigns, to effectively communicate findings to both technical and non-technical stakeholders.
- Conducted **A/B testing** on email content and design elements using **Python**, resulting in optimized messaging that contributed to an 11% increase in conversion rates.
- Developed interactive **Power BI** dashboards and **PowerPoint** decks for executive-level reporting, visualizing app download trends, email campaign performance, KPIs, churn, and conversion rates to drive data-driven strategic decisions.
- Led a predictive analytics project using **R** and **Exploratory Data Analysis (EDA)** to forecast customer churn, resulting in the implementation of targeted retention strategies that decreased churn rate.
- Managed **stakeholder** expectations by effectively communicating data limitations and potential outcomes through data storytelling, increasing project success rate.
- Collaborated with cross-functional teams such as the marketing team and managed stakeholder expectations through data storytelling, communicating data limitations and potential outcomes to drive informed decision-making and enhance project success rates by 4%.

Data Analyst | Trigent Software, India

January 2019 - July 2022

- Implemented data quality assurance process using **SQL** and **Excel (advanced functions, pivot tables)** that reduced errors in monthly reports, enhancing the reliability of insights presented to senior management through **Tableau** dashboards.
- Conducted statistical analysis using **Python (pandas, Scikit-learn)** to uncover consumer behavior patterns and market trends, generating tags and cleaning data to optimize a recommendation system model, resulting in a 20% increase in effectiveness.
- Streamlined ETL processes with **SQL**, reducing processing time by 30% and improving data quality through efficient cleansing, enrichment, and standardization for accurate analysis of an E-commerce Platform.
- Implemented data integration processes using ETL tool Alteryx, incorporating various data sources (3 sources) including Google Analytics and CSV files resulting in a centralized data repository for a global child mobility products leader.
- Led a market analysis initiative using **Exploratory Data Analysis (EDA)** and **descriptive analytics**, which identified three emerging trends, informing the company's strategic planning process.
- Optimized the reporting workflow by automating routine data tasks with **Python** scripts and **SQL** stored procedures, freeing up more time for in-depth analysis and **stakeholder** consultations, and utilized **Git** and **GitHub** for version control of analysis scripts.
- Utilized **requirements-gathering** techniques to identify key **stakeholder** needs and built interactive **Tableau** dashboards aligned with business objectives and significantly improved data-driven decision-making across departments.

PROJECTS

NYC Motor Vehicle Collision Analysis

- Accelerated decision-making by converting 2.05 million rows of NYC collision data into actionable insights with Tableau.
- Designed a model using ER studio with 10+ facts and dimensional entities, overcoming discrepancies within the data.
- Created ETL pipelines using Alteryx and Airflow, for 40% reduction in data load times for Azure, MySQL, and Postgres.
- Extracted data from Google Cloud- BigQuery and processed in Talend, resulting in a 30% reduction in loading time.

Lululemon Stock Analysis

- Led a team of 6, Lululemon Portfolio Management, formulated and presented an analysis on its stock value.
- Determined Lululemon as a moderate risk stock with a 10yr 291.65% percentage increase and kurtosis at 0.740.
- Built regression model, improving prediction accuracy by 15% through comparative analysis with decision tree.
- Recommended trading signals based on analysis, yielding 20% increase in successful trades.

Data Science Assistant (Gemma LLM)

- Integrated Gemma 2b-it with a Retrieval-Augmented Generation system for dynamic data science education.
- Optimized AI response accuracy and system efficiency, achieving a human evaluation score of 0.867.
- Resolved significant technical challenges, including token limitations and platform compatibility issues.
- Enhanced educational interactions through accurate and context-aware AI responses.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Validates expertise in designing distributed systems on AWS, demonstrating proficiency in core AWS services, best practices for building secure and reliable applications, and the ability to create cost-efficient, scalable solutions.
