

Gavini Mohan Ayyappa

Data Analyst

NJ | 201-574-7186 | gavini.m@jobsdesire.com

SUMMARY:

Data Analyst with 4 years of experience, proficient in leading data-centric projects within Agile environments and enhancing decision-making by designing dynamic analytics dashboards using Tableau and Power BI. Expert in optimizing data workflows, automating ETL processes with tools like SSIS and Databricks, and implementing cloud migrations to AWS. Demonstrated ability to deploy predictive analytics and machine learning models to drive customer engagement and business strategies. Skilled in transforming complex data sets into actionable insights, significantly improving operational and strategic outcomes.

EDUCATION:

Master in Business and Information Systems Principles

New Jersey Institute of Technology, Newark, NJ, USA

May 2024

Bachelor of Technology in Civil Engineering

Bapatla Engineering College, Bapatla, India

May 2022

SKILLS:

Methodology: SDLC, Agile, Waterfall

Programming Language: Python, R, SQL, Scala

IDE's: PyCharm, Jupyter Notebook

Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig

ETL & Data Integration: SSIS, Databricks, Snowflake

Cloud Technologies: AWS, Azure

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Reporting Tools: Tableau, Power BI, SSRS

Database: MySQL, MongoDB, PostgreSQL, Oracle

Other Tools: Git, MS Office, Data Management, Data Processing, Data Modeling, Data Preparation, Data Cleaning, Data Collection, Decision-Making, ETL, Business Analytics, Statistical Analysis, and Predictive Modeling

Operating Systems: Windows, Linux

EXPERIENCE:

McKesson, NJ | Nov 2023 – Current | Data Analyst

- Led collaboration with cross-functional teams in Agile environments, boosting project delivery efficiency by 20%.
- Engineered dynamic dashboards in Power BI, enabling executives to derive visually compelling insights, enhancing decision-making speed by 30%.
- Validated and assured data accuracy for strategic decision-making, reducing errors by 15%.
- Optimized data analysis workflows by proficiently manipulating data from relational databases with SQL and Python, cutting processing time by 25%.
- Implemented distributed data processing with Apache Spark, augmenting data handling capacity by 40%.
- Formulated predictive analytics models that identified trends and patterns, which helped business teams develop targeted strategies boosting customer engagement by 35%.
- Automated ETL pipelines using SSIS and Databricks, achieving a 30% reduction in data integration times.

Infinite Infolab, India | Sep 2019 - July 2022 | Data Analyst

- Implemented data visualizations using Tableau, enabling stakeholders to interact with real-time data and make informed decisions that significantly enhanced business processes and decision accuracy.
- Executed deep statistical analysis using R and Pandas to discover business opportunities, raising operational efficiency by 20%.
- Advanced real-time analytics capabilities by designing and implementing scalable data models on Snowflake, doubling data access speeds.
- Extracted valuable insights from unstructured data using Hadoop and Pig, boosting strategic decision-making data usability by 40%.
- Revolutionized data transformation workflows with Python automation, slashing preparation time by 35%.
- Synchronized data integration from MongoDB and PostgreSQL into unified platforms, which improved analytics performance by 30%.
- Pioneered development of machine learning models using Scikit-learn to forecast customer behavior, elevating customer retention by 25%.
- Transitioned analytics infrastructure to AWS, optimizing performance and reducing operational costs by 20%.
- Facilitated complex analytics interpretation with business teams, aligning findings with organizational goals and enhancing strategic alignment by 30%.
