

Gayathri Dendi

Data Analyst

(469) 901-9714 | dendigayathri97@gmail.com | Arlington, TX

Professional Summary

Experienced and detail-oriented **Data Analyst** with over **5 years** of experience in deriving actionable insights from large and complex data sets across **banking, healthcare and SaaS** industries. Adept at end-to-end data lifecycle management from extraction and transformation to visualization and strategic reporting by leveraging a comprehensive toolset including **SQL, Python (Pandas, NumPy), Excel, Power BI, Tableau** and **Shell Scripting**. Proficient in designing, automating and managing robust **ETL pipelines** using modern data platforms such as **AWS Glue, Redshift, Athena** and **Azure Data Factory, Azure SQL, Synapse Analytics**. Experienced in orchestrating workflows with **Apache Airflow**, building and deploying integrations with **Talend, Informatica** and **SSIS**, while ensuring data accuracy, integrity and compliance through rigorous **QA testing** and **data validation** practices. Hands-on experience in cloud-native data architecture with both **AWS** and **Azure** environments, supporting scalable analytics for enterprise-scale reporting.

Technical Skills

- **Data Replication & Administration:** Qlik Replicate, Qlik Enterprise Manager, Change Data Capture (CDC), Data Migration, Task Monitoring, JSON Configurations
- **Databases:** Oracle, SQL Server, PostgreSQL, MySQL, AWS Redshift, Azure SQL, Snowflake, Databricks
- **ETL/ELT & Data Integration:** Qlik Replicate Tasks, Talend, Informatica, SSIS, Apache Airflow, Azure Data Factory, AWS Glue
- **Data Warehousing & Modeling:** Star/Snowflake Schema, Dimensional Modeling, Performance Tuning
- **Programming & Scripting:** SQL (Advanced), Python (Pandas, NumPy), Shell Scripting, R (Basics), JSON, XML
- **Server & Security:** Linux/Windows Server Administration, SSL/TLS, Role-Based Permissions, Firewall Configurations
- **BI & Visualization:** Power BI, Tableau, Looker, ThoughtSpot, Excel (Advanced)
- **Cloud Platforms:** AWS (Redshift, S3, Lambda), Azure (Synapse, SQL Database), GCP (BigQuery)
- **Other Tools:** Git/GitHub, Docker, Kafka, SAP Integration, Kubernetes (Basics), CI/CD

Work Experience

Data Analyst

Mar 2024 – Present

M&T Bank | Buffalo, NY

- Installed, configured, and maintained **Qlik Replicate and Qlik Enterprise Manager**, ensuring high availability and reliability of replication environments.
- Designed and optimized **CDC-based replication tasks** for Oracle, SQL Server, and AWS Redshift, reducing data latency by **35%** for critical financial reporting.
- Automated **health checks, alerts, and monitoring** scripts using Python and Airflow, minimizing downtime by **40%**.
- Applied **security protocols** including SSL/TLS configurations, access controls, and audit logs to maintain compliance with **SOX and PCI DSS** standards.
- Collaborated with DBAs and data engineers to resolve replication bottlenecks, achieving a **25% performance improvement** in ETL pipelines.
- Developed and documented **JSON task configurations** for repeatable replication patterns, increasing deployment efficiency by **30%**.
- Integrated Qlik Replicate with **Kafka and SAP data pipelines**, enabling near real-time streaming analytics.
- Partnered with business teams to design **Power BI/Tableau dashboards** driven by replicated data, improving executive decision-making.
- Conducted **root-cause analysis and troubleshooting** of replication failures, reducing task error rate by **20%**.
- Maintained compliance reporting for replication activities and provided audit logs for internal and external stakeholders.

Data Analyst
Fresh Works | India

Jul 2021 – Nov 2022

- Implemented **Qlik Replicate-based data replication** from MySQL and PostgreSQL into AWS Redshift, supporting enterprise SaaS analytics.
- Designed replication tasks with **filters, mappings, and transformations**, improving accuracy of customer behavior datasets by **15%**.
- Configured **CDC pipelines** to capture real-time changes in transactional data, reducing reporting delays from hours to minutes.
- Administered Qlik Replicate servers, endpoints, and replication tasks across development and production environments.
- Enhanced security by applying **role-based access controls** and enabling SSL certificates for cross-system connections.
- Troubleshoot and resolved replication issues, cutting downtime by **20%** through proactive monitoring and automated alerts.
- Worked with cross-functional teams to align replication pipelines with **data warehousing best practices**.
- Delivered **executive-ready dashboards** in Power BI using replicated datasets, reducing manual reporting effort by **25%**.
- Coordinated with engineering teams to validate replication processes and conduct performance tuning on Redshift queries.
- Documented replication workflows and provided knowledge transfer to internal teams for process continuity.

Data Analyst
Healthians | India

Jun 2019 – Jun 2021

- Supported **data migrations and conversions** using Qlik Replicate and Azure Data Factory to integrate SAP and healthcare systems into centralized reporting.
- Designed and maintained **Excel/Power BI dashboards** using replicated data to monitor patient satisfaction, service efficiency, and clinical KPIs.
- Assisted in building **ETL/ELT pipelines** with Qlik Replicate for data replication from SQL Server to Azure Synapse, reducing data preparation time by **30%**.
- Performed **data quality checks and validation** on replicated data, improving consistency and accuracy by **20%**.
- Leveraged **SQL queries on Azure SQL and SAP HANA** for ad-hoc analysis, supporting operational decisions.
- Documented and standardized **replication workflows**, ensuring reproducibility and compliance with internal data policies.
- Collaborated with QA teams to identify discrepancies in replication outputs and resolve data mismatches.
- Automated simple reporting tasks using Python (Pandas) with data replicated from SAP, saving **10+ analyst hours per week**.
- Partnered with business stakeholders to design reports ensuring that replicated data aligned with organizational standards.
- Gained hands-on experience with **SAP BusinessObjects and Qlik dashboards**, presenting insights to non-technical stakeholders.

Education:

Master of Science in Computer Science from University of Texas at Arlington, TX, USA.

Bachelor of Engineering in Computer Science from Dayananda Sagar College of Engineering, India.

Certificates:

Microsoft Certified : Power BI Data Analyst Associate

Google Data Analytics Professional Certificate

MS Microsoft Office Specialist (MOS) Certification.
