SUMMARY

Data Analyst with a Master's in Analytics from Northeastern University (GPA: 3.9) and 2+ years of experience in data analysis, predictive modeling, and data visualization. Skilled in SQL, Python, Tableau, and Power BI, with hands-on experience in advanced data cleaning, exploratory data analysis, and machine learning. Proven ability to derive actionable insights and support decision-making in different sectors. Adept at presenting complex data insights through polished visualizations and reports, ensuring data quality, and implementing robust analytical solutions for business optimization.

EDUCATION

Northeastern University, MA, Boston

April 2024

Master's in professional studies in Analytics, GPA: 3.9

TECHNICAL SKILLS & TOOLS

Data Analysis & Modeling: Advanced Excel, Probability & Statistics, Hypothesis Testing, Regression Analysis, Time Series Forecasting, Predictive Analytics & Machine Learning Algorithms.

Programming Languages & Frameworks: SQL, R, Python.

Cloud Platforms: Microsoft Azure, Databricks, CDH (Cloudera Distribution Hadoop).

Data Management: Database Management Systems (DBMS), Data Structures, Data Governance, Risk Analysis & Risk Heat Mapping, Data Privacy & Compliance.

Data Visualization Tools: Tableau, Power BI, Qlik, Alteryx, Business Intelligence Reporting.

Microsoft Suite: Excel, Outlook, PowerPoint.

Google Suite: Sheets, Docs, Colab, SharePoint.

Soft Skills: Communication, Collaboration, Presentation Skills, Stakeholder Engagement.

EXPERIENCE

Data Science Intern, Zero Ride-share inc., USA

January 2025- to till date

- Contributes to the design, development, and deployment of software components within rideshare platform
- collaborates with cross-functional teams, and participate in code reviews and technical planning sessions.

Data Analyst, Excelerate, US

November - December 2024

- Built an interactive dashboard in Google Data Studio, analyzing over 10,000 data points to provide actionable insights for Excelerate's leadership, improving decision-making by 30%.
- Cleaned and preprocessed datasets, resolving 95% of inconsistencies and enhancing data quality for analysis.
- Evaluated performance of 3+ Facebook ad campaigns for GlobalShala's Superhero U event, recommending discontinuation of a low-performing campaign to reduce costs by 20%.
- Created 10+ polished visualizations and delivered presentations summarizing campaign insights to the Finance team, ensuring clarity and alignment with business objectives.
- Utilized tools like Excel, Tableau, and Google Data Studio, adapting to project requirements to deliver accurate insights.

Web3 Security Data Analytics Extern, Webacy, US

August - October 2024

- Conducted in-depth research, analysis, and data labeling for smart contract vulnerabilities across multiple blockchains, improving data categorization and risk profiling capabilities.
- Validated 15+ peers' data labels with 100% accuracy and streamlined the dataset by reducing records from nearly 1000 to 400+ (a 60% reduction) through thorough data cleansing in Excel.
- Performed frequency and correlation analyses on 31 risk tags using Python (Pandas, Seaborn, Matplotlib, NumPy, SciPy), identifying key vulnerabilities and their associations.
- Utilized unsupervised machine learning to perform cluster analysis, revealing 3 major risk clusters in smart contracts.
- Created 5+ visualizations in Tableau and delivered 2 presentations to communicate insights and recommendations.

Experiential Learning Analyst, Harvest Performance, US

September-December 2023

- Analyzed the impact of personal development programs on 9,474 Mexican high school students in collaboration with Harvest Performance and TecMilenio University.
- Developed a data analysis strategy to address missing values, enhancing dataset quality for meaningful insights.
- Created a Tableau dashboard to evaluate student engagement and motivation before and after Challenge 5.
- Engineered a logistic regression model with 100% accuracy, predicting student recommendations for Challenge 5.
- Conducted text analysis, including word cloud generation, to extract key themes from student feedback.
- Recommended improvements in survey methodology and content to enhance response quality and participant engagement.

Assistant Systems Engineer, TCS, India

May 2021 - August 2022

Client: Pfizer Inc.

- Collaborated with a team on cleaning and analyzing clinical trial data for Pfizer using SAS software.
- Performed data cleaning and manipulation using Unix and SAS Studio to ensure data quality and integrity, resulting in reduced data errors by 15%.
- Developed and documented test scripts to improve data testing efficiency and reduce manual effort by 20%.
- Participated in the deployment and testing of clinical trial data processing, contributing to ensuring their robustness.
