

Gayathri Rani Laveti

Data Analyst

Location: Indiana, USA | Mail: gayathrilaveti07@gmail.com | Ph: 219-316-1072

Professional Summary:

- Results-driven Data Analyst with 7+ years of experience delivering data-driven insights across healthcare, finance, and e-commerce domains. Proven expertise in building predictive models, engineering ETL pipelines, and developing interactive dashboards to support critical business decisions. Adept in Python, SQL, Power BI, Tableau, Qlik Sense, and cloud platforms like Azure, AWS, and GCP.
- In the healthcare sector, contributed to reducing patient readmissions by 15% and improving data quality by 25% through machine learning, root cause analysis, and robust data governance aligned with HIPAA compliance. In the financial domain, optimized credit risk assessments and compliance reporting, resulting in reduced false positives and enhanced regulatory adherence (Basel III, IFRS 9). Delivered a 22% uplift in e-commerce customer conversion through behavioral analysis and real-time data processing using Spark and Kafka.
- Demonstrated ability to collaborate cross-functionally with clinical, risk, marketing, and engineering teams in Agile environments using Jira and Confluence. Recognized for automating workflows, reducing reporting efforts by up to 60%, and aligning data science solutions with strategic business objectives.

Technical Skills:

Programming Languages:	Python, SQL, Java
Machine Learning:	Scikit-learn, TensorFlow, K-Means, ARIMA, Prophet
Data Visualization:	Tableau, Power BI, Qlik Sense, Matplotlib, Seaborn
Database Management:	MySQL, PostgreSQL, Snowflake, Azure Synapse Analytics
Data Engineering:	Apache NiFi, Apache Spark, Hadoop, SSIS
Statistical Tools:	SAS, WEKA
Data Analysis:	Advanced Excel (Pivot Tables, Macros), A/B Testing
ETL & Automation:	Apache Spark, SSIS, Python Scripts, AWS Cloud Platform
Version Control:	Git, GitHub
Project Management:	JIRA, Confluence, Agile (Scrum, Kanban)
Regulatory Compliance:	HIPAA, FinCEN Guidelines, Basel III Standards
Business Intelligence:	Dashboards, KPIs, Competitive Benchmarking
Statistical Methods:	Exploratory Data Analysis (EDA), Time Series Analysis, Hypothesis Testing, Regression Analysis
Data Quality:	Data Cleaning, Transformation, Quality Control Mechanisms
E-commerce Analytics:	Cart Abandonment, Customer Lifetime Value, Conversion Optimization
Healthcare Analytics:	Patient Flow, Resource Allocation, Compliance Standards (HIPAA)

Professional Experience:

Tenet Healthcare, TX | May 2023-Present

Data Analyst

- Developed predictive models using Random Forest and Logistic Regression in Python, leading to a 15% reduction in patient readmissions within the first year.
- Designed and implemented ETL workflows using SSIS to extract and transform data from EHR platforms like Epic and Cerner, improving data processing efficiency by 30%.
- Conducted A/B testing and statistical hypothesis analysis to evaluate new clinical procedures, which streamlined operations and reduced patient wait times by 20%.
- Performed root cause analysis to identify data discrepancies and deployed automated validation tools, improving data quality by 25%.
- Established and enforced a robust data governance framework to ensure data accuracy, privacy, and security—achieving 100% HIPAA compliance. Optimized data warehouse management using Azure Data Factory, decreasing ETL processing time by 25%.
- Partnered with clinical, IT, and operations teams to translate analytical insights into actionable strategies, enhancing patient care and operational efficiency.
- Managed Azure Data Lake to support scalable storage and real-time processing of healthcare datasets, enabling immediate access to critical patient information.
- Delivered insightful ad-hoc reports using Tableau and SQL to empower executive decision-making.
- Built APIs using FHIR and HL7 standards to integrate external healthcare data sources, significantly improving system interoperability. Designed data quality checks that cut dataset error rates by 20%.
- Applied regression analysis to predict patient outcomes based on demographic and clinical data, achieving 85% model accuracy. Deployed machine learning models for patient risk stratification, resulting in a 10% drop in high-risk readmissions.
- Utilized Jira to manage tasks and streamline collaboration with cross-functional teams in an Agile environment, ensuring consistent and timely project execution.

TCS, India | June 2018 – July 2022

Data Analyst

- Utilized advanced Python libraries such as Pandas and NumPy to analyze large-scale financial datasets, improving data accuracy by 25% and reducing processing time by 20%, which accelerated data-driven decision-making.
- Built and deployed predictive models using Scikit-learn, increasing credit risk assessment accuracy by 15% and reducing false positives by 10%, thereby enhancing lending strategies.
- Developed comprehensive financial reporting systems aligned with Basel III and IFRS 9 regulations, mitigating compliance risk by 12% and maintaining strong financial governance.
- Designed and optimized ETL pipelines using SSIS, improving data integration efficiency by 40% and ensuring seamless data flow across multiple financial systems.
- Created dynamic, interactive Power BI dashboards that delivered real-time financial insights, boosting stakeholder engagement by 50% and supporting more informed strategic decisions.
- Collaborated with the risk management team to integrate Anti-Money Laundering (AML) analytics into operational workflows, resulting in a 5% drop in flagged suspicious transactions and strengthening regulatory compliance.
- Deployed scalable ETL solutions using AWS Glue to ensure secure and efficient financial data transformation in compliance with RBI data localization requirements.
- Embraced Agile project management practices using JIRA and Confluence, improving team collaboration and accelerating project delivery by 25%.
- Applied K-Means clustering for customer segmentation, identifying high-value customer groups that drove an 8% increase in sales and informed targeted marketing efforts.
- Automated routine financial reporting tasks using Excel VBA, reducing report generation time by 60% and significantly boosting operational efficiency.

Capgemini, India | May 2017 – June 2018

Data Analyst

- Analyzed clickstream and transactional data using Python and Pandas, driving a 22% boost in customer conversions through data-informed marketing strategies.
- Designed and managed ETL pipelines with SSIS to automate data ingestion from diverse sales and inventory systems, cutting manual processing time by 35%.
- Built predictive models for customer churn and purchase intent using Random Forest and Logistic Regression in Scikit-learn, contributing to an 18% increase in customer retention.
- Conducted A/B testing and statistical hypothesis testing in R and SQL to evaluate promotional campaign effectiveness, enabling optimized, data-driven pricing decisions.
- Developed interactive Qlik Sense dashboards connected to MySQL databases to visualize product performance, inventory trends, and customer segmentation insights.
- Utilized Apache Kafka and Apache Spark for real-time analysis of user behavior during flash sales, improving inventory distribution and reducing cart abandonment rates.
- Applied clustering techniques using Scikit-learn and Seaborn to segment customers by behavior and demographics, leading to a 20% improvement in personalized recommendation systems.
- Performed keyword extraction and sentiment analysis on customer reviews using SpaCy and BERT, uncovering actionable insights that shaped product development initiatives.
- Created automated reporting solutions using VBA and PostgreSQL, cutting weekly report generation time by 40% for marketing and logistics teams. Optimized SQL queries in PL/SQL and Microsoft SQL Server to enhance data retrieval performance.
- Contributed across the full software development lifecycle (SDLC) to deploy scalable and cost-efficient machine learning solutions within the Google Cloud Platform (GCP) environment.

Education:

Master of Science in Information Technology – Valparaiso University, Indiana, USA.

Bachelor of Electronics and Communication Engineering – Andhra University, Visakhapatnam, AP, India.

Certifications:

Microsoft AI Skills Challenge – Microsoft.

Certified Scrum Master (CSM) – Scrum Alliance

Google Analytics Certified – Google
