Skills & Tools

- **Regulations & Standards:** ISO 13485, FDA 21 CFR Part 820, cGMP, GLP, GDP
- **Quality Systems:** CAPA, Non-Conformance, Deviations, Change Management
- **Audit Experience:** Internal & External Audit Support, Audit Readiness, Regulatory Inspections (Internal and external MDSAP, FDA, TUV, IVDR, UL Solutions), GEMBA
- **Documentation:** ECOs, Batch Records, RODI logs, Validation Protocols, COAs, SOPs
- **Systems:** Salesforce, SAP, LN OneERP, MasterControl, Windchill, Microsoft Platforms, Google Workspace
- **Soft Skills:** Interpersonal skills, Analytical Thinking, Time Management, Adaptability, Goal Oriented, Open To Feedback

Professional Experience

MARCH 2025 - PRESENT

QuidelOrtho, San Diego, CA - Quality Operations Analyst

- Development and implementation of quality system procedures to ensure compliance with regulatory standards and support organizational quality objectives.
- Oversee monitoring and reporting of quality metrics across site quality reviews, tier meetings, and business units to enable data-driven decision-making.
- Performed trend analysis of deviation and CAPA data using Excel pivot tables and statistical methods to drive root cause identification and process improvements.
- Lead GEMBA and 5S audits across QC, warehouse, and production floor to identify quality gaps and drive operational improvements.
- Coordinate preparation and participation in internal and external audits, including FDA and Notified Body inspections.
- Serve as system SME during audits, representing CAPA, NC and Deviation processes; maintain audit-ready documentation and guide teams through inspectional observations and remediation.
- Lead and coordinate review board meetings addressing deviations, CAPAs, NCs, raw materials, and finished goods to ensure timely resolution of quality concerns.
- Direct cross-functional collaboration on Engineering Change Orders (ECOs), driving process improvements while ensuring regulatory compliance.
- Review data logs and quality documents to identify discrepancies and implement corrective actions that enhance manufacturing quality.
- Design and lead QMS training programs on CAPA, NC, and deviation best practices; mentor cross-functional stakeholders to strengthen system ownership and compliance mindset.
- Actively contribute as a member of the site's GMP Excellence Team, leading administration of continuous improvement projects to elevate overall site quality.

JULY 2023 - MARCH 2025

Genomatica, San Diego, CA - Quality Control Specialist

- Oversee quality compliance across manufacturing processes by managing quality records and change control documentation to ensure adherence to GMP standards.
- Monitor production timelines, ensuring adherence to specified parameters and quality standards during manufacturing.
- Review pre-production master batch records and executed batch records and COAs, ensuring compliance with GMP and FDA standards for product release.
- Ensure accuracy and completeness in batch records to support timely product release.
- Conduct product monitoring in stability chambers and other controlled environments to ensure compliance with sterility and particulate requirements, ensuring product quality and regulatory compliance.
- Own product quality investigations involving risk analysis and potential field impact; collaborate with cross-functional teams on containment and resolution aligned with risk management procedure.
- Collaborate with production, quality control, and engineering teams to address quality issues, monitor processes, and implement process improvements.
- Facilitate communication between stakeholders to ensure timely resolution of quality concerns.
- Led audit preparation by maintaining documentation for warehouse inventory and product fulfillment.
- Investigate and resolve production-related issues, implementing CAPA to prevent recurrence and improve processes.

OCTOBER 2022 - JULY 2023

Genomatica, San Diego, CA - Quality Coordinator

- Led product release documentation including COAs, stability testing reports, and traceability records for global shipments.
- Contribute to development of quality systems, establishing SOPs, work instructions, and other procedures to facilitate QC operations
- Authored and executed IQ/OQ/PQ protocols for new laboratory and manufacturing equipment.
- Utilized Gage R&R and capability analysis to assess equipment performance and improve test method reliability.
- Collaborated with R&D and manufacturing teams during design transfer, ensuring smooth handoff by supporting process validation (IQ/OQ/PQ), documentation, and training.
- Organized and monitored internal retain storage and tracking systems, contributing to audit readiness.
- Actively participated in internal and customer audits by compiling evidence and tracking responses to audit observations.
- Led investigations into customer complaints, conducting root cause analyses and implementing CAPAs.

MAY 2021 - SEPTEMBER 2022

DSM-Firmenich, San Diego, CA - Research Associate

- Conducted lab-based testing and method development under GLP conditions; documented findings to support audits and inspections.
- Authored SOPs, performed risk assessments, and maintained audit-ready documentation.
- Collaborated with QA to align lab practices with internal quality standards and ensure compliance during audits.
- Oversee planning and purchasing of laboratory consumables.

JUNE 2020 - MAY 2021

Siemens Healthineers- Quality Staffing of America (contract), Glasgow, DE - Quality Technician

- Led and executed test method validations for various drugs against new line of analyzers.
- Collaborated with manufacturing and R&D to ensure methods aligned with GMP and GDP standards.
- Investigated OOS results and data deviations, ensuring prompt resolution and complete documentation in compliance with 21 CFR Part 820 and ISO 13485
- Supported internal audits by compiling quality metrics, updating controlled documents, and maintaining inspection-ready records.

SEPTEMBER 2019 - MAY 2020

Food and Drug Administration (FDA), Jamaica, NY - Analyst (Intern)

- Quality inspection for international food products prior to commercial release.
- Assisted in preparing and organizing materials for FDA inspections and audits, maintaining accurate and up-to-date records of compliance reviews.
- Assisted in the preparation of regulatory reports and communications for submission to various stakeholders, ensuring clarity and compliance with FDA standards.
- Gained hands-on experience in FDA compliance, documentation practices, and regulatory processes that strengthened overall knowledge of the regulatory landscape.

Education

Master of Science (MS) in Microbiology

Wagner College, New York

Bachelor of Science (BS) in Biotechnology

Amrita School of Biotechnology, India
