

Gayathri Poojitha Nibhanupudi

Data Analyst

Dallas, TX | (346) 481-7878 | gayathripoojitha.n@gmail.com | [LinkedIn](#)

SUMMARY:

Experienced Data Analyst with over 4 years of expertise in Business and Data Analysis. Managed 300+ backlog items, bugs, and features in Jira & Azure, ensuring efficient story tracking within the Agile Scrum framework. Developed 50+ dashboards and reports using Tableau and Power BI, enhancing data-driven decision-making. Led BI report development, achieving 15% faster report generation times with MicroStrategy and Teradata teams. Proficient in ETL processes and UML diagramming. Skilled in Python, SQL databases, and BI tools.

SKILLS:

Languages:	Python (Pandas, NumPy, Matplotlib), R, Java, SQL
Databases:	MySQL, PostgreSQL, Oracle Database, MS SQL Server
Visualization Tools:	Tableau, Power BI, MS Visio, Advance Excel
ETL/Reporting Tools:	SSIS, SSRS, Informatica, AWS Glue, Tableau, Power BI
Cloud Platforms:	AWS S3, AWS EC2, AWS Glue, Amazon Redshift, Microsoft Azure
Data Management:	BRD, FRD, SRS, RTM, EDA, Data Warehousing, Data Mining, Data Manipulation, Data Cleaning, Data Migration, Data Wrangling, Data Visualization, Data Structure and Algorithms
SDLC Methodologies:	Agile, Waterfall, Scrum, Jira, Confluence
Core Competencies:	Business Requirements, UAT/Functional testing, GAP Analysis, UX Designing, Wireframes, Project Management, Business Process Mapping, Risk and Stakeholder Management, Digital Marketing, Communication

EXPERIENCE:

PNC Financials | *Data Analyst*

Jan 2023 – Present

- Managed backlog items, bugs, and features in Jira and Azure DevOps, achieving a 20% reduction in resolution time. Streamlined story tracking in Agile Scrum, boosting sprint efficiency by 15% and on-time delivery by 10%.
- Leveraged SQL in ETL processes to extract data from multiple sources, transform it through data cleaning and aggregation, and load it into target databases, facilitating efficient reporting processes.
- Extracted raw log data from AWS S3 using AWS Glue, transformed it on AWS EC2, and loaded it into Amazon Redshift. Generated performance reports with SQL queries, improving data processing efficiency by 30%.
- Developed interactive dashboards and reports using Tableau and Power BI, significantly improving data-driven decision-making capabilities across the organization, and documented requirements with MS Visio's Use Case, Data Flow, and Sequence Diagrams within sprint cycles.
- Led BI report development initiatives, collaborating with MicroStrategy and Teradata teams to achieve a 15% reduction in report generation times, enhancing operational efficiency.
- Conducted thorough UAT tests, achieving a 95% issue resolution rate, coordinated with stakeholders to define test cases, identified critical issues early using Jira, and implemented effective solutions, thereby reducing post-release defects, and increasing overall product reliability.
- Designed and implemented logical and physical data models supporting Data Marts and Data Warehouse infrastructure, aligning with organizational data architecture standards.
- Analyzed business requirements in collaboration with stakeholders, providing critical insights to support strategic decision-making processes.

ACL Digital, India | *Data Analyst*

June 2018 – July 2021

- Managed Agile and Scrum processes for the events planner feature, achieving a 30% reduction in cycle time, thereby accelerating feature delivery.
- Implemented ETL processes with SSIS, accelerating data migration by 20%, and responded swiftly to ad hoc data requests, reducing extraction and analysis time by 20% using SQL and Excel.
- Developed and maintained statistical dashboards in Tableau to track bi-weekly sprint task progress based on KPIs, increasing team efficiency by 20%.
- Analyzed and optimized complex SQL queries for various products, reducing total execution time by 13% across all products.
- Enhanced efficiency by 25% through improved Power BI data visualization techniques in portfolio design, which reduced report generation time by 40% and improved data accessibility and usability.
- Successfully led the migration of a legacy project, resulting in a 50% reduction in customer support tickets and improved system stability.
- Created a CI/CD pipeline using Azure DevOps for automating application deployment, reducing deployment time by 25% and enhancing development efficiency.
- Conducted GAP analysis exercises aligning AS-IS and TO-BE systems, and implemented solutions, improving operational efficiency by 30% through streamlined processes and workflows.
- Automated tasks using Excel VBA macros, enhancing overall efficiency by 40% and reducing processing time by 50%, contributing to operational cost savings.

EDUCATION:

Master in Business Analytics <i>The University of Texas at Dallas</i>	Aug 2021 – May 2023
Bachelor in Computer Science and Engineering <i>SRM University, India</i>	July 2015 – May 2019
