Professional Summary

- Data Analyst with 3+ years of experience in data analytics, business intelligence, and reporting, delivering insights that improve decision-making, optimize processes, and increase ROI.
- Proficient in SQL, Python, Power BI, Tableau, and Excel for building interactive dashboards, automating workflows, and performing advanced analytics.
- Experienced in data governance, ETL pipeline development, data modeling, and KPI tracking to support compliance, scalability, and performance monitoring.
- Strong background in predictive analytics, statistical modeling, and time-series forecasting to enhance accuracy of business planning and customer engagement strategies.
- Skilled at collaborating with cross-functional teams to translate complex datasets into actionable recommendations, supporting stakeholders across corporate, academic, and non-profit environments.
- Recognized for delivering measurable impact through data storytelling, improving executive decision-making speed and alignment with business goals.

Education

Master's in Data Science and Applications

Jan 2023 – June 2024

State University of New York

Relevant Coursework: Machine Learning, Python and R programming, DBMS, Data Structures and Algorithms, Data Visualization, Tableau, Generative AI, Large Language models, Prescriptive Analytics, Spreadsheet Modeling and Analytics, Deep Learning, Natural Language Processing.

Certifications

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Power BI Data Analyst Associate
- IBM Data Science

Technical Skills

- **Data Analysis & BI Tools:** SQL, Power BI, Tableau, Excel (VLOOKUP, PivotTables, Charts, VBA), Google Analytics
- **Programming & Statistical Modeling:** Python (pandas, numpy, scikit-learn), R, Regression, Clustering, Time-Series Forecasting
- **NLP:** SpaCy, Hugging Face Transformers, BERT, GPT-2/3/4, Text Classification, Text-to-Speech (TTS), Sentiment analysis, Topic extraction
- **Machine Learning & Automation:** Predictive Modeling, A/B Testing, KPI Tracking, ETL Pipeline Development, Reporting Automation
- **Cloud & Databases:** Microsoft Azure (Machine Learning, Data Lake, Microsoft Fabric), Databricks, MySQL
- **Automation & Tools:** Reporting Automation (Power BI & Excel), GenAI (LLM APIs for Chatbot), Power Query
- **Collaboration & Methodologies:** Agile (Sprint Planning, User Stories, Documentation), Cross-Functional Communication, Data storytelling, Stakeholder engagement
- **Platform Integrations & CRM:** Salesforce, Salesforce Marketing Cloud, Microsoft 365 Copilot, Agentforce, Apex Data Loader, REST APIs, OpenAPI/Swagger, JSON, YAML
- **Version Control & DevOps:** Git, GitHub, Bitbucket
- **Tools & Environments:** Jupyter Notebook, VS Code, PySpark, PyCharm

Professional Experience

Data Scientist, DreamStudio

Sep 2024–June 2025

Atlanta, GA

- Increased environmental impact prediction accuracy by 10% using XGBoost and Random Forest, supporting data-driven policy decisions for regional projects.
- Automated multi-source data integration with Python and SQL, improving scalability of predictive models and reducing manual processing time by 18%.
- Built Power BI dashboards enabling real-time monitoring, cutting manual reporting time by 12% and improving stakeholder visibility on outcomes.

Graduate Assistant, School of Law, State University of New York at Buffalo

Aug 2023 - May 2024

Buffalo, NY

- Supported strategic planning by analyzing enrollment and academic data, identifying trends that informed curriculum adjustments for 300+ students.
- Collaborated with faculty and institutional research teams to improve data quality, reporting, and documentation for compliance and accreditation purposes.
- Designed reports and visualizations in Excel and Tableau that simplified complex academic datasets for leadership decision-making.

Data Analyst, Tata Consultancy Services

Dec 2021 – Dec 2022

Hyderabad, India

- Enhanced executive decision-making by delivering insights from financial, CRM, and ERP data, driving a 20% improvement in business process efficiency across multiple departments.
- Increased customer trend forecast accuracy to 85%, enabling marketing to reduce churn and optimize campaigns, resulting in improved customer engagement.
- Designed and deployed 20+ executive dashboards in Power BI and Tableau that provided real-time visibility into sales, inventory, and customer KPIs, accelerating leadership decision cycles by 15%.
- Performed ad hoc analyses using SQL and Python to answer urgent business questions, uncover trends, and provide data-backed recommendations for cross-functional teams.
- Applied Python(pandas, numpy, scikit, nltk) for data transformation and exploratory data analysis (EDA), contributing to effect optimization and self-expression enhancements in product experience.
- Built and optimized ETL pipelines using Python and SQL to extract sales, inventory, and customer data into a centralized data warehouse, enabling real-time retail performance tracking and analytics.
- Developed data marts and associative data models that optimized data storage and retrieval, reducing query processing times by 40%.
- Automated cross-platform data flows via APIs, eliminating manual reporting bottlenecks and ensuring accurate, real-time data availability for stakeholders.

Academic Projects

Sales Forecasting Dashboard for Retail Chain

- Designed a dynamic Power BI dashboard for comprehensive sales performance analysis, enabling executive-level insights into KPIs, trends, and regional comparisons.
- Automated data aggregation, transformation, and visualization workflows, reducing manual reporting overhead and accelerating delivery cycles. Built responsive, mobile-optimized dashboards with interactive features like drill-downs and slicers for on-demand, real-time decision-making.

AI-Driven Job Search Assistant

- Developed a Gradio/Streamlit application using a RAG pipeline to query and retrieve job descriptions from a Huggingface dataset.
- Enabled personalized job recommendations by matching user skills and preferences with available job postings, simulating an AI recruitment agent.
