

Gayatri Awate | Data Analyst

Location: NY, USA | **Phone:** (551)-343-8304 | **Email:** awategayatri1@gmail.com | **LinkedIn** | **GitHub**

SUMMARY

Experienced Data Analyst with 3 years of experience in healthcare analytics, specializing in data modeling, ETL pipelines, and statistical analysis to drive data-driven decision-making. Proficient in Python, SQL, Tableau, Power BI, and AWS, with expertise in data visualization, cloud technologies, and machine learning techniques. Skilled in collaborating with cross-functional teams to optimize data storage, automate reporting, and enhance data accuracy while ensuring compliance with HIPAA and industry standards. Passionate about leveraging data to uncover insights, improve operational efficiency, and support strategic business decisions in dynamic environments.

SKILLS

Language:	Python, SQL, R (Visualization)
Python Libraries:	Pandas, NumPy, Seaborn, Matplotlib, Transformers, Beautiful Soup, Selenium, Dask
ML Libraries:	Scikit-Learn, TensorFlow, PY Torch, Keras, Docker, Kubernetes
Databases:	Snowflake, AWS Redshift, MySQL, MongoDB, SQL Server, PostgreSQL
Data Visualization:	Tableau, Power BI, Excel (Advanced Charts, VBA, Macros)
Cloud Technologies:	AWS (S3, Lambda, RDS, EC2, Redshift), GCP
Tools & Technologies:	Apache Nifi, Apache Airflow, SPSS, Excel (Pivot Tables, Macros, VBA), ETL Tools
Others:	Data Modeling, Data Cleansing, Data Warehousing, Statistical Analysis, HIPAA Compliance

EXPERIENCE

Xelay Acumen, CA | Data Analyst

June 2024 – Present

- Utilized Python and Tableau to analyze large healthcare datasets, building interactive dashboards that improved decision-making by 40%, focusing on patient demographics, trends, and key performance indicators.
- Conducted statistical analysis using Excel and SPSS (t-tests, ANOVA, covariance analysis), improving data accuracy and providing actionable insights related to healthcare outcomes and patient data.
- Developed and optimized SQL scripts integrated into ETL pipelines for streamlined data ingestion and storage, reducing data discrepancies and saving up to 30% in data management time.
- Collaborated with 2 clients across 5 projects, delivering business and medical analytics solutions, documenting design specifications, and ensuring high-quality deliverables.
- Leveraged AWS and GCP cloud services for data storage, processing, and visualization, improving scalability and real-time accessibility of healthcare insights.

QBE Insurance, NY | Automation Team Intern

Jun 2023 – Aug 2023

- Designed and implemented a robust logging automation framework using Pega Robotic Automation 22.1, Python, and SQL, enhancing reusability and streamlining automation development across multiple projects.
- Deployed an optimized code execution logging, reporting, and monitoring solution within the Pega environment, significantly reducing debugging and troubleshooting time for end-users.
- Collaborated with cross-functional teams to integrate the logging solution into existing automation workflows, improving system transparency and error resolution efficiency by 30%.
- Gained hands-on experience in developing and managing scalable automation assets, ensuring compatibility with future enhancements and reducing development effort for similar use cases.
- Utilized Docker and Kubernetes to containerize and deploy automation solutions, improving scalability and reducing infrastructure dependencies.

Philips Healthcare, India | Data Analyst

May 2020 – July 2022

- Conducted in-depth data analysis using Python libraries like Pandas and NumPy, performing complex data cleansing and transformation to resolve discrepancies, achieving 95% data quality standards.
- Created advanced Tableau dashboards and Excel visualizations, improving cross-departmental decision-making by 20% through actionable insights and clear data trends representation.
- Optimized SQL queries for faster execution, reducing data retrieval time by 40% and enhancing the efficiency of data-driven processes.
- Leveraged AWS tools (S3, Lambda, RDS, EC2, Redshift) to implement real-time data analytics solutions, enabling near-instantaneous insights and reducing decision-making time by 30%.
- Designed and implemented robust ETL pipelines for MongoDB datasets, ensuring high-quality data extraction, transformation, and loading processes with consistent accuracy and uniformity.

EDUCATION & CERTIFICATIONS

Masters in Computer Science

May 2024

Stevens Institute of Technology, NJ

Bachelor of Technology, Computer Science & Technology

May 2022

MIT World Peace University, Pune, India

- Learning Snowflake DB**
- SQL for Data Analysis**
