

Education

University of South Florida, Tampa: Master of Science, Artificial Intelligence and Business Analytics	05/2025
Pune Institute Of Computer Technology: Bachelor of Engineering, Information Technology	04/2021

Technical Skills

Data Analytics & Visualization: SQL (MySQL, PostgreSQL, SQL Server, T-SQL), **Power BI(DAX, Power Query)**, Tableau, Excel (**Pivot Tables, VLOOKUP, INDEX/MATCH, Data Tables, Advanced Formulas**), Qlik View

Programming & Data Processing: Python (Pandas, NumPy, SciPy, Matplotlib, Plotly, Scrapy), R, SQL, SAS

Data Management & ETL: Data Cleaning, Transformation, **Power Automate, AWS, Azure, Airflow, Snowflake, SSIS, ASP.NET**

Modeling & Analysis: Statistical Analysis, A/B Testing, Time Series Forecasting (**ARIMA, Prophet**), Machine Learning

Tools & Platforms: MySQL Workbench, Jupyter Notebook, Postman, GitHub, Visual Studio, Microsoft Access, Docker, BigQuery, Looker

Experience

Software Engineer (SQL Developer) | Winjit Technologies | July 2021 - May 2023

- Optimized SQL query performance across enterprise databases, reducing response time by 40% improving data throughput by 30%
- Developed RESTful APIs for automated data extraction, transformation, improving reporting cycle efficiency
- Built Power Automate workflows to streamline repetitive tasks, cutting manual data handling time by 20%
- Led cross-functional data integration initiatives, consolidating siloed data sources to improve accessibility and enable centralized reporting enhancing team efficiency by 15%
- Conducted A/B testing to fine-tune query logic and indexing strategies, accelerating critical analytics workloads
- Documented data sources and query logic to support data governance and ensure standardized reporting workflows

Data Analyst Intern | SpecSavi Technologies | Jan 2020 - Apr 2020

- Scraped and cleaned 10,000+ raw data entries, boosting data quality by 25% for downstream analytics
- Executed data wrangling, validation techniques to prepare high-integrity structured datasets with 99% accuracy
- Assisted in validating and transforming structured data using advanced Excel formulas and data tools
- Developed and optimized SQL queries to extract, join, and transform data for business intelligence reporting
- Applied A/B testing to compare preprocessing methods, improving model input quality and overall data usability

Data Analyst Intern | L3Cube | Jul 2020 - Apr 2021

- Processed 16,000+ social media records in Marathi to build a sentiment analysis dataset for NLP applications
- Utilized Python (Pandas, NumPy) to clean and preprocess linguistic data for training deep learning models
- Contributed to predictive modeling efforts and pattern identification for text classification
- Implemented and evaluated CNN and LSTM models using TensorFlow and PyTorch
- Contributed to research published at EACL 2021, showcasing expertise in text data annotation, feature engineering, and model evaluation for low-resource language processing

Project Experience | 2023-2025

ETL Pipeline for Weather Data: Python, Astro CLI, Apache Airflow, SQLite

- Built an automated ETL pipeline to process weather data from APIs and load it into SQLite for analysis.
- Cleaned and transformed JSON data with Pandas, loading it into SQLite for structured querying and reporting
- Deployed Airflow using Astro CLI in Dockerized environment, and simulating production-level orchestration and modular (Directed Acyclic Graph) DAGs for maintainable pipelines

Swiggy Data Engineering Pipeline - Snowflake, Snowpark Python

- Developed full ETL flows replicating delivery operations, integrating datasets into Snowflake for real-time pipeline reporting and opportunity analysis by Ingesting, transforming, validating datasets using Snowpark Python to support downstream dashboard
- Optimized Snowflake SQL queries, designed efficient schema design patterns to improve query performance, storage scalability
- Applied data cleansing, validation, partitioning strategies to ensure data integrity, accuracy, readiness for business insights

Hospitality Revenue Analysis Dashboard: Power BI, MySQL

- Developed interactive Power BI dashboard to monitor KPIs like RevPAR, ADR, and occupancy across hotel chains
- Utilized MySQL to perform advanced joins, filters, and aggregations, enabling granular business segmentation
- Used DAX and Power Query for custom metric calculations and data transformation
- Uncovered promotion performance insights that contributed to a 12% revenue increase through optimized pricing strategies

Air Quality and Power Generation Insights: Excel, Tableau, SQL

- Analyzed PM2.5 concentrations, AQI trends across regions to identify pollution hotspots and environmental risks
- Correlated air quality data with energy production types (fossil vs renewable) to assess public health impact
- Created executive dashboards in Tableau for stakeholders to assess energy and pollution trends

Publications

Springer: [Experimental Evaluation of Deep Learning Models for Marathi Text Classification](#)

Evaluated CNN, LSTM, and BERT using TensorFlow and PyTorch; FastText embeddings enhanced performance in low-resource contexts

European Chapter of ACL: [L3CubeMahaSent: A Marathi Tweet-based Sentiment Analysis Dataset](#)

Co-developed first sentiment dataset for Marathi tweets, boosting social media NLP capabilities
