

GAYATRI SHARMA KURMATEY

San Francisco, California | 4695889006 | gkurmatey@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Data Professional with 8+ years of experience across analytics, data engineering, and automation. Proven expertise in Python, SQL, Qlik Sense, Power BI, and Spark, with a strong track record of building scalable ETL pipelines, streamlining reporting infrastructure, and delivering actionable insights for Fortune 500 companies and NASA research. Skilled in data modeling, cloud platforms, and advanced BI tools, bridging the gap between business strategy and technical execution

PROFESSIONAL EXPERIENCE

Robert Half, Fremont Unified School District, California, Data Analyst

March 2024 – Jan 2025

- Led a team of six to design scalable ETL pipelines using Qlik Sense, Power BI, and AB Testing for Aeries database migration, reducing daily ETL time by 5 hours
- Improved cross-platform data exchange efficiency by 30% through strategic API integrations and schema mapping
- Partnered with cross-functional teams to automate HR workflows using PowerApps, Power Automate, Intune, and AssetSonar, cutting 5+ hours of manual work weekly and generating \$100K in annual cost savings
- Managed device access and software deployment for 2,500+ laptops, ensuring security compliance via Azure Synapse
- Mentored team members on Power Platform, saving 2 hours daily through improved workflows and scalable BI practices

Pacific Gas and Electric Company, California, Data Analyst

May 2023 – Aug 2023

- Enhanced Qlik Sense and Power BI visualizations with data modeling and AB Testing techniques, reducing dashboard load time by 20 minutes, and resource costs by \$200K annually
- Devised data pipeline automation using SQL, Python, and Power Automate, increasing team efficiency by 2 hours
- Implemented row-level security in Azure Synapse, enhancing data governance and minimizing unauthorized access risks
- Trained teams on complex Power Query and DAX, boosting dashboard performance by 40% and analytics productivity by 25%

Tesla Inc, Fremont, California, Data Analyst

May 2022 – Dec 2022

- Optimized Qlik Sense and Power BI models across construction, finance, and invoicing using advanced Qlik Script, DAX, M Query, and AB Testing, cutting load time by 65%
- Built an interactive HR dashboard for 120K+ employees, saving over 15 hours weekly in executive decision-making, and enhancing HR data integrity through real-time employee database updates
- Developed analytics solutions using Power Apps, Power BI, and Tableau to evaluate more than 500 projects, boosting budget forecasting accuracy by 45% with prescriptive, predictive, and inferential models
- Supervised data security by implementing row-based security (RLS) with Azure Active Directory for role-based access control

Tango Analytics, Texas, Data Scientist

Jan 2022 – May 2022

- Led preprocessing of 100+ floor plan images using the Computer Vision Annotation Tool for machine learning input
- Applied OpenCV in Python to annotate floor plans, enhancing data integration for model training pipelines by 65%
- Utilized Mask R-CNN model in Python for automated blueprint labeling, increasing entity identification accuracy to 88%

Amazon, Hyderabad, India, Data Analyst

Aug 2018 – Aug 2019

- Boosted operational efficiency by 80% with ETL pipelines, Qlik Sense, Tableau, Power Automate, and Python
- Spearheaded logistics analytics with SQL, VBA, and M Query, saving \$10K weekly in last-mile operations and resource costs

Indian Space Research Organization, India, Data Analyst

May 2017 – Mar 2018

- Devised a conference hall booking system for ISRO using Sybase, MySQL, and Java, improving processes by 17 hours weekly
- Developed multidimensional models for procurement data in MySQL and a web app, enhancing decision-making by 75%

RESEARCH EXPERIENCE

NASA Ames Research Center, California, Open-Source Collaborator

Feb 2024 – Present

- Engineered atomic-level graph embeddings from PDB data and used geometric GNNs to uncover clusters of protein functional states

Jet Propulsion Laboratory, NASA, California, Volunteer Research Assistant

May 2023 – Aug 2023

- Compiled insights through advanced data analysis, utilizing LLMs, PyPDF2, and Haystack for knowledge extraction

The University of Texas at Dallas, Research Assistant

Jan 2022 – May 2022

- Coded a containerized Open Data Cube project for NASA, automating data ingestion of over 500 satellite images

SKILLS

Automation: Power Apps, Power Automate, ChatGPT, Airflow, Spark, Microsoft Copilot

BI & Data Visualization: Tableau, Qlik Sense, Power BI (DAX, Power Query), DAX Studio, Google Analytics

Cloud Computing: Vast.ai, Google Colab, Docker, Azure, Snowflake, Jupyter Notebook, Microsoft Intune, AssetSonar, Spark

Database Management: Microsoft SQL Server, MySQL, PL/SQL, SQLdbx, MariaDB, PostgreSQL, BigQuery, Snowflake

Microsoft Excel: Pivot Tables, Macros, Advanced Functions, Visual Basics for Applications

Programming: Python (NumPy, Pandas, Scikit-Learn, TensorFlow, OpenCV, Matplotlib, NetworkX, BioPython, NLTK)

Project Management: JIRA, Confluence, Microsoft Project, Monday.com

EDUCATION

Master of Science - Information Technology & Management, University of Texas at Dallas

Jan 2021 – Dec 2022

Bachelor of Technology - Computer Science, Jawaharlal Nehru Technological University

Sep 2014 – Jun 2018
