

GEETHA BOMMAREDDY
DATA ENGINEER | DATA ANALYST

Marietta, GA | +1 (470)-923-3125 | geetha.8298@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data-driven professional with 5 years of progressive experience in data engineering, data analysis, and business intelligence. Proficient in leveraging cloud platforms (AWS, Azure), big data technologies (Spark, Kafka), and data visualization tools (Power BI, Tableau) to optimize workflows and support data-driven decision-making. Demonstrated expertise in building scalable ETL pipelines, data integration, and automation of data processes to ensure seamless access to high-quality insights. Known for consistently delivering impactful solutions that drive business growth, improve data management, and enhance operational efficiency.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, Java

Data Processing & Analysis: Apache Spark, Kafka, Pandas, NumPy

Cloud Platforms: AWS (Redshift, S3, Glue, Lambda), Azure

ETL Tools: Apache NiFi, Talend, AWS Glue

Data Visualization: Power BI, Tableau

Databases: PostgreSQL, MySQL, MongoDB

Operating Systems: Linux, Windows

EXPERIENCE

Data Engineer

Grant Thornton

February 2025 – Present

- Led the development and optimization of **ETL pipelines** using **AWS Glue**, **Apache Spark**, and **Python**, automating the data integration and transformation process, improving data pipeline efficiency by 35%.
- Designed and implemented **data models** in **AWS Redshift** and **SQL**, reducing query times by 40%, improving the overall performance of reporting systems.
- Worked closely with cross-functional teams to build interactive **Power BI** and **Tableau** dashboards, enhancing real-time business insights and decision-making, leading to a 20% improvement in operational efficiency.
- Automated and optimized data extraction and transformation tasks using **Python**, reducing manual processing by 50% and increasing data consistency.
- Conducted data validation and profiling, ensuring the accuracy and reliability of business-critical data used for high-level decision-making.
- Collaborated with stakeholders to define business requirements and translate them into effective data solutions that aligned with strategic goals.

Data Analyst

Acer America

February 2024 – February 2025

- Extracted, transformed, and analyzed large datasets from multiple sources using **SQL**, **Python**, and **Excel** to generate actionable insights that drove marketing, product, and operational strategies.
- Developed and maintained real-time **Power BI** and **Tableau** dashboards, allowing stakeholders to track KPIs and performance metrics, improving decision-making processes by 25%.
- Designed and automated complex reporting processes, reducing time spent on manual reporting by 50% and ensuring timely delivery of key insights.
- Enhanced data quality and consistency through rigorous validation and data cleaning procedures, contributing to improved decision-making accuracy.
- Collaborated with cross-functional teams to provide actionable data insights that led to a 15% increase in customer engagement and 10% growth in sales conversion rates.
- Used advanced statistical analysis techniques in **Python** to identify trends, predict customer behavior, and inform business decisions.

Junior Data Analyst

Mindtree

May 2020 – July 2022

- Assisted in building and optimizing **data pipelines** using **Apache Kafka** and **Apache Spark** to streamline real-time data processing and reduce latency.

- Conducted **data extraction** and **data cleaning** using **SQL** and **Python**, ensuring data was accurate, consistent, and ready for analysis.
- Developed automated reports and visualizations in **Power BI** and **Tableau**, helping senior teams track key metrics and improve overall business performance.
- Collaborated with business teams to define data needs and ensure timely access to insights for improved decision-making.
- Supported the creation and optimization of **ETL processes**, enabling seamless data integration across multiple platforms and systems.
- Participated in the implementation of data governance and security practices, ensuring compliance with industry standards and best practices.

Data Operations Coordinator

July 2019 – April 2020

- Coordinated the processing and analysis of large-scale datasets using **SQL** and **Python** to support business operations and decision-making.
- Developed automated systems for generating reports, saving over 100 hours per month in manual data handling and improving data reporting accuracy.
- Assisted in the design and optimization of **data models**, leading to a 20% improvement in data retrieval and reporting times.
- Provided valuable data insights and actionable recommendations that helped improve operational workflows and efficiency.
- Implemented best practices in data cleaning and transformation, ensuring data integrity and reliability for downstream analysis.
- Contributed to the development of business intelligence dashboards, enabling leadership to make more informed and data-driven decisions.

CERTIFICATIONS

AWS Certified Data Engineer – Associate

EDUCATION

Master of Science in Information Studies

Trine University | *August 2022 – December 2023*

KEY ACHIEVEMENTS

- **Grant Thornton**: Automated **ETL pipelines**, improving data integration efficiency by 35% and delivering more timely and accurate insights.
- **Acer America**: Developed and maintained **Power BI** dashboards, improving data-driven decision-making by 25% and providing executive teams with real-time business performance metrics.
- **Mindtree**: Implemented **real-time data pipelines**, reducing data processing time by 30% and increasing system efficiency.
