SUMMARY

Analytical and results-driven Data Analyst with 2+ years of experience translating operational, risk, and business data into actionable insights. Proficient in SQL, Python, Power BI, Tableau, and cloud-based analytics, with expertise in ETL pipelines, KPI tracking, and statistical modeling. Strong communicator skilled at transforming complex datasets into clear, data-driven strategies that improve business performance. Currently pursuing AWS Cloud Practitioner Certification to expand expertise in cloud-based analytics and data engineering.

SKILLS

Methodology: SCADA, Agile, Waterfall

Programming Languages: SQL, Python, R, C

Database Management and Querying: SQL, MySQL, PostgreSQL, Oracle, Snowflake

Data Science Tools: Excel, Pandas, NumPy, matplotlib, Seaborn

Computer Vision and Visualization: OpenCV, Data Visualization (Tableau, Power BI, matplotlib)

Machine Learning Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras

Cloud Platforms: AWS (S3, EC2, SageMaker), Azure, Google Cloud

Big Data Technologies: Hadoop, Spark, Apache, Kafka

Soft Skills: Data Storytelling, Stakeholder Communication, Problem Solving, Critical Thinking

EXPERIENCE

Reach Medical Systems Private Limited | Hyderabad, India | January 2024 - April 2024 | Data Analytics Engineer Intern

- Developed a Machine Learning model for email fraud detection leveraging TF-IDF, N-grams, and text normalization, achieving 97.3% accuracy and reducing false positives in fraud classification.
- Owned end-to-end data pipeline, including cleansing, validation, and structured storage, automating workflows with Python & SQL to ensure high-quality training data, which enhanced model reliability and reduced preprocessing time by ~20%.
- Designed comprehensive FAA-style model documentation and dashboard user guides, translating complex NLP outputs into business-friendly insights, aligning with end-user requirements, and driving wider adoption across cross-functional teams.
- Collaborated with cross-functional stakeholders to define analytical requirements, prioritize deliverables, and present actionable findings in executive-level reporting sessions, strengthening alignment between technical teams and leadership.
- Led weekly knowledge-sharing meetings with peers and mentors, improving communication flow between technical teams and business units.
- Delivered business-aligned insights by interpreting NLP model outputs and mapping them to fraud detection KPIs, enabling leadership to make data-driven operational decisions.

PROJECTS

Sales Performance Dashboard

- Designed & deployed a dynamic **Power BI dashboard** using **DAX & Power Query** to track sales KPIs, customer segmentation, and regional revenue, accelerating executive reporting by **30%**.
- Extracted & cleaned multi-source sales data with **SQL**, enabling deep-dive analysis of revenue trends, conversion funnels, and retention, delivering insights that optimized sales strategies.

Time Series Analytics and Forecasting of U.S. Monthly Electricity Prices

- Built and benchmarked multiple **time-series models** (Deterministic, Exponential Smoothing, Regression, ARIMA/ARIMAX) to forecast U.S. monthly electricity prices with ~2% hold-out error.
- Engineered 27 years of macroeconomic and seasonal features, delivering insights on long-term pricing trends, cycles, and inflationary impacts for energy sector decision-making.

Enterprise Risk Analytics Projects – Hindustan Unilever

- Conducted risk assessment using annual reports & KPIs to identify top 10 critical risks; built **risk matrix, heat map, and Monte Carlo simulations** (Python, R, Excel) to quantify exposure and scenario outcomes.
- Designed an **interactive Power BI dashboard** to monitor real-time risks and visualize mitigation strategies, improving contingency planning accuracy by 25% and enabling leadership to prioritize high-impact risks.

EDUCATION

Master of Science in Business Analytics

George Washington University, Washington D.C, United States

August 2024 – December 2025

GPA: 3.7/4.0

Bachelor of Technology in Artificial Intelligence

Mahindra University, Hyderabad, India

August 2020 - August 2024

GPA: 3.8/4.0

CERTIFICATIONS

- AWS Certified Cloud Practitioner – In Progress (Expected 2025)**
- [Deloitte Data Analytics Job Simulation](#)
- [Hackerank SQL Advanced Certification](#)
