

Geethika Reddy Abba

Data Analyst

✉ rgeethika880@gmail.com ☎ +1 8167499347 📍 USA 🌐 LinkedIn

PROFILE

Data Analyst with 4+ years of proven experience in designing and delivering scalable data solutions that unlock business insights, automate reporting, and drive strategic decisions. Specialized in building dynamic dashboards, robust ETL pipelines, and predictive models that support cross-functional teams across finance, consulting, and technology sectors. Proficient in SQL, Python, Power BI, Tableau, and Snowflake, with hands-on expertise in forecasting, A/B testing, and data modeling. Skilled at collaborating with stakeholders to define KPIs, translate business needs into technical deliverables, and deliver analytics with measurable impact. Experienced in modern cloud infrastructure and orchestration tools including AWS, Azure, and Apache Airflow. Known for bridging the gap between data and decision-making, with a focus on operational efficiency, governance, and growth enablement.

SKILLS

Programming & Scripting: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (T-SQL, MySQL, PostgreSQL), R (tidyverse, ggplot2)

Data Analysis & Visualization: Power BI, Tableau, Excel (Power Query, Pivot Tables, Forecast Models), Google Data Studio, Plotly, Data Storytelling

Data Management & Processing: Data Cleaning & Wrangling, Complex SQL Queries (Joins, CTEs, Window Functions), Data Modeling (Star & Snowflake Schema), ETL Development (SSIS, Alteryx), Power Query

Cloud Platforms & Data Warehousing: AWS (S3, Redshift), Azure (Data Factory, Synapse), Google BigQuery, Snowflake, Data Lake Architecture & Management

Statistical Analysis & Predictive Modeling: A/B Testing, Hypothesis Testing, Regression Analysis, Time Series Forecasting (ARIMA), Descriptive & Diagnostic Analytics, Basic ML (scikit-learn)

Automation & APIs: Web Scraping (BeautifulSoup, Selenium), REST APIs, Excel Macros, Scripted Automation (Python + SQL), Workflow Scheduling (Airflow)

Reporting & Business Intelligence: Interactive Dashboards (Power BI, Tableau), KPI Monitoring, Financial Reporting, Executive-Level Data Presentation, Business Performance Insights

Databases & Optimization: Microsoft SQL Server, MySQL, PostgreSQL, Oracle, Stored Procedures, Indexing, Query Optimization, DB Performance Tuning

Project Methodologies: Agile (Scrum, Kanban), Sprint Planning, Requirements Gathering, Jira, Confluence, Cross-functional Collaboration

Professional & Business Skills: Stakeholder Engagement, Business Acumen, Communication Skills, Strategic Thinking, Data-Driven Decision Making, Problem Solving

PROFESSIONAL EXPERIENCE

Goldman Sachs, Data Analyst

Oct 2023 – Present | Remote, USA

- Built and optimized **ETL pipelines** using **SQL, Python, and Alteryx**, transforming complex financial datasets into structured formats for high-impact analytics and decision support.
- Designed and deployed **interactive dashboards and KPIs** using **Tableau and Power BI**, enabling real-time tracking of trading performance, risk metrics, and operational efficiencies.
- Conducted comprehensive **data reconciliation and validation** across multiple internal systems and third-party sources (e.g., Bloomberg, Reuters), improving data accuracy and reporting integrity by 35%.
- Collaborated with cross-functional stakeholders to **gather business requirements**, translate them into technical solutions, and deliver scalable analytics workflows tailored to front-office and compliance needs.
- Automated manual reporting processes using **Python scripting and advanced SQL queries**, reducing turnaround time by 40% and increasing analyst productivity.
- Applied **predictive analytics techniques** including regression, time-series forecasting, and clustering to uncover trends, detect anomalies, and support strategic investment decisions.
- Maintained and enhanced **data models, metadata catalogs, and documentation** to align with internal data governance policies, regulatory standards, and audit readiness.
- Presented complex analytical findings to non-technical stakeholders via executive dashboards, concise slide decks, and structured business reports, influencing senior-level decision-making.

Tiger Analytics, Data Analyst

Feb 2020 – Jun 2022 | Hyderabad, India

- Developed and maintained **end-to-end data pipelines** using **SQL, Python, and Excel VBA**, enabling automated extraction, transformation, and loading (ETL) of high-volume structured and unstructured data from multiple sources.
- Created **interactive dashboards and drill-down reports** using **Tableau and Power BI** to track sales performance, customer behavior, and operational KPIs for Fortune 500 clients across retail and healthcare domains.
- Partnered with business stakeholders to **gather, document, and refine analytical requirements**, transforming them into actionable data solutions and visual stories.
- Performed **data profiling, cleansing, and validation** to ensure data integrity and reliability, reducing data quality issues by over 30% through proactive audits and reconciliation routines.
- Conducted **exploratory data analysis (EDA)** and applied statistical methods (hypothesis testing, correlation, trend analysis) to derive insights for business growth strategies.
- Designed and implemented **automated reporting workflows** using Python and Excel macros, significantly reducing manual effort and report turnaround time.
- Supported **A/B testing and performance monitoring** for marketing and product teams, using Python and SQL to analyze test outcomes and recommend optimization actions.
- Contributed to the creation and maintenance of **data dictionaries, process documentation, and standard operating procedures (SOPs)** to strengthen data governance and cross-team collaboration.

EDUCATION

University of Central Missouri, Masters of Science

Aug 2022 – May 2024 | Missouri, USA

Jawaharlal Nehru Technological University, Bachelors of Technology

Jun 2017 – May 2021 | Hyderabad, India

PROJECTS

Bing News Data Analytics, Microsoft Fabric

- Built a distributed data ingestion pipeline using **Microsoft Fabric, Azure Data Factory, and SQL** to collect and transform global Bing News data for real-time analysis.
- Performed **sentiment analysis and topic classification** using Python to extract insights on geopolitical trends, public sentiment shifts, and regional content patterns.
- Designed interactive **Power BI dashboards** for visualizing keyword trends, sentiment fluctuations, and region-wise news coverage, enabling data-driven decision-making.

Churn Prediction for Health Insurance

- Achieved over **85% model accuracy** in predicting member churn using behavioral and claims-based features; validated results via A/B testing.
- Automated workflow orchestration and version control with **Airflow and Git**, enabling reproducibility and deployment-readiness.
- Helped improve customer retention strategy through early churn risk identification.

Credit Risk Scoring Engine

- Built a **real-time scoring engine** that reduced loan approval turnaround time by **40%** using automated risk assessment workflows.
- Integrated scoring with SQL-based ETL pipelines, enabling dynamic credit decisions based on behavioral and historical data.
- Supported risk control teams with accurate and consistent credit profiling at scale.

IMDB Movie Recommendation Engine

- Developed a **content-based recommendation engine** using Python to suggest similar movies based on genres, cast, director, and plot keywords from IMDB metadata.
- Engineered features and calculated **cosine similarity** scores using **Pandas, NumPy, and scikit-learn** to rank and recommend relevant movies.
- Visualized movie trends and genre distributions using **Matplotlib**, providing clear insight into recommendation logic and user preferences.

CERTIFICATES

- Microsoft Certified Azure Data Engineer
- AWS Certified Developer- Associate
- Data Science with Python(DataCamp)
- ServiceNow Certified System Admin
