PROFESSIONAL SUMMARY

Analytical and detail-oriented Health Informatics Graduate and Lab Informatics Specialist with a PharmD and hands-on experience integrating and validating LIMS, ELN, and middleware systems across healthcare environments. Skilled in designing and optimizing HL7/FHIR-based data workflows that improve interoperability between analyzers, middleware, and EHR platforms. Experienced in configuring Thermo Fisher Sample Manager and Espresso systems, defining user roles, and ensuring compliance with HIPAA, CAP/CLIA, GxP, and 21 CFR Part 11 standards. Adept at creating API-driven lab integrations, performing interface testing, and authoring technical SOPs to enhance traceability, data integrity, and audit readiness. Known for improving lab efficiency through data automation, validation scripting, and real-time result synchronization.

EDUCATION

Master of Science in Health Informatics (2025)

New England College, Henniker, New Hampshire. USA

- Relevant Coursework: Clinical Informatics, Healthcare Data Analytics, EHR Systems

Doctor of Pharmacy (PharmD) (2022)

Chaitanya College of Pharmacy Education and Research, Warangal, India

- Research Focus: Retrospective and Prospective Study on Prescription Patterns in Heart Failure Patients
-

WORK EXPERIENCE

Clinical Informatics Intern / Physician Assistant Intern

Sri Lakshmi Nursing Home, Warangal | Aug 2018 – Dec 2022

- Managed patient health records using **Electronic Health Record (EHR)** systems to ensure accurate clinical documentation and data traceability.
- Supported **data validation, audit preparation, and digital record maintenance** in alignment with **HIPAA** and local healthcare regulations.
- Collaborated with interdisciplinary teams to improve **data interoperability between pharmacy, laboratory, and clinical units**.
- Assisted physicians in patient assessments, medication reconciliation, and therapy follow-ups while maintaining digital case files.
- Enhanced workflow efficiency by identifying documentation gaps and recommending **EHR-based standardization** for treatment entries.
- Participated in developing and maintaining **clinical data logs** that improved reporting accuracy and compliance tracking.

Clinical Data & Workflow Intern – Cardiology Department

Ajara Hospital, Warangal | Sep 2021 – Aug 2021

- Oversaw **data entry, validation, and integration** of laboratory and diagnostic information into **EHR systems** for multi-department units.
- Monitored and analyzed **cardiology, general medicine, and gastroenterology data** to improve record accuracy and reduce documentation errors.
- Assisted in configuring **EHR templates** for departments to standardize clinical data capture and reduce redundancy.

- Worked with healthcare IT staff to enhance **interoperability between EHR and laboratory systems**, ensuring real-time updates of test results.
- Prepared **clinical summary reports** for audits and quality reviews, contributing to system readiness and compliance with **CAP/CLIA** standards.
- Coordinated between clinicians, pharmacists, and lab staff to support **data-driven clinical decisions and workflow optimization**.

Clinical Data & Workflow Intern – Gynecology Department

Ajara Hospital | November 2021 – December 2021

- Assisted in prenatal care, labor monitoring, and postnatal management.
- Worked with fetal monitoring reports and hormonal therapy treatments.

Clinical Intern – Gastroenterology Department

Ajara Hospital | January 2022 – February 2022

- Assisted in diagnosing and treating digestive disorders (GERD, liver diseases, IBD).
- Observed and documented endoscopic procedures and medication interventions.

Clinical Intern – General Medicine Department

Ajara Hospital | March 2022 – August 2022

- Diagnosed and treated chronic and acute illnesses.
- Managed EHR documentation and collaborated with healthcare IT teams for digital records management.

ACADEMIC PROJECTS

LIMS Integration and Data Validation for Clinical Informatics Lab

New England College, Henniker, NH | Capstone Project, 2023

- Designed and implemented a **Laboratory Information Management System (LIMS)** workflow to manage sample data, test tracking, and result validation.
- Configured **HL7/FHIR message structures** for bidirectional data exchange between LIMS and simulated EHR platforms.
- Developed and tested **REST API connections** to automate result synchronization and error handling across multiple endpoints.
- Ensured data accuracy and traceability by incorporating **validation scripts, access controls, and audit trail logging** compliant with **HIPAA** and **GxP** standards.
- Created **data flow diagrams and SOPs** to document integration steps, ensuring reproducibility and alignment with **CAP/CLIA** quality requirements.
- Reduced simulated data latency by **30%** through asynchronous data transfer and JSON-based payload optimization.

TECHNICAL & DIGITAL SKILLS

Healthcare & Compliance Frameworks:

HL7, FHIR, HIPAA, CAP/CLIA, GxP, ALCOA+, 21 CFR Part 11

Lab Informatics & Systems:

Thermo Fisher Sample Manager LIMS, Espresso Analyzer, Empower, ELN, CDS, Quality Control Systems

Data Integration & Automation:

RESTful APIs, JSON/XML Data Exchange, Middleware Configuration, System Mapping, Interface Validation, Data Parsing & Transformation

Programming & Database:

SQL, Python, API Querying, Data Modeling, Validation Scripts

Data Analytics & Reporting:

Power BI, Microsoft Excel (Advanced), KPI Dashboards, Data Auditing, Root-Cause Analytics

Pharmacy & Clinical Expertise:

Therapeutic Drug Monitoring (TDM), Pharmacokinetics, Drug–Lab Interaction Validation, Medication Safety Reviews

Documentation & Communication:

Technical SOP Authoring, Change Control Management, Audit Trail Review, Interdisciplinary Collaboration, Clinical Documentation

Tools & Platforms:

Microsoft Office Suite, Quality Management Systems (QMS), Git Version Control

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Telugu
 - **Work Authorization:** Eligible for **OPT (Optional Practical Training)** in the USA
-
