SUMMARY

Data Engineer with 3+ years of experience in building scalable pipelines, optimizing ETL workflows, and managing cloud data warehouses. Looking for opportunities to apply my skills in building impactful, data-driven solutions.

EDUCATION

University of Dayton, Dayton OH USA

Aug 2023 – May 2025

Master of Science | Computer Science | CGPA – 3.7/4.0

JNTUA College of Engineering, Pulivendula, India

June 2017 – July 2021

Bachelor of Science | Electronics and Communication Engineering | CGPA – 3.61/4.0

TECHNICAL SKILLS

Languages & Scripting: Python, SQL, PySpark, SparkSQL

Cloud & Platforms: AWS (S3, Glue, Lambda, Redshift), Snowflake

ETL, APIs & Automation: Apache Airflow, REST API, Datastage, SQL-based ETL, Automation Scripts and Pipelines, Kafka, Hadoop

Data Modeling & Warehousing: Star/Snowflake Schema, Data Vault, Snowflake, Redshift, MySQL, Teradata

BI & Reporting Tools: Tableau, Reporting, KPI Dashboards, Data Validations

Certifications: AWS Certified Solutions Architect – Associate (2024–2027)

Expertise: Building data pipelines, ETL optimization, SQL performance tuning, BI dashboards, Data modeling

PROFESSIONAL EXPERIENCE

University of Dayton, Dayton, Ohio, United States: Data Research Assistant

Apr 2024 – May 2025

- Analyzed and resolved database issues to optimize data management and performance in university library system.
- Provided troubleshooting support and guided students in database design, data modeling, and SQL query writing.

Tata Consultancy Services (TCS), Bangalore, India: Data Engineer

Aug 2021 – Aug 2023

- Built 15+ internal ETL pipelines using Airflow, Datastage, and SQL on AWS, automating reporting and enabling real-time insights.
- Migrated workflows to AWS (S3, Lambda, Glue), improving scalability and reducing latency by 40%.
- Optimized Snowflake queries, procedures, reducing execution time by 60% & enhancing dashboard performance.

Everest Engineering, Hyderabad, India: Data Engineer Intern

Apr 2019 – Aug 2019

- Optimized batch data pipelines with Apache Spark on AWS EMR, cutting processing time by 48%.
- Designed and maintained scalable ETL pipelines to process large volumes of shipping data, including tracking.

ACADEMIC PROJECTS

Stock Market Real-Time Data Analysis

Dec 2024 – Feb 2025

Technology: Apache Kafka, AWS S3, Glue Crawler, Athena, Lambda, Python

- Built an end-to-end real-time pipeline for streaming stock market data using Kafka, AWS S3, Glue, and Athena with Lambda integration for partition refresh and alerts.

Retail Sales Data Warehouse and Analytics Platform

Mar 2024 – June 2024

Technology: Apache Airflow, Snowflake, Tableau, Scikit-learn, SQL

- Developed a Snowflake-based data warehouse for retail sales analysis, built ETL pipelines in Apache Airflow, and created Tableau dashboards for real-time reporting.

Real-Time Product Recommendation Engine

Aug 2023 – Oct 2023

Technology: Apache Spark, PySpark, Spark MLlib, Kafka, Delta Lake, AWS S3, Parquet, Structured Streaming

- Developed a real-time recommendation engine using Apache Spark Streaming and Kafka for personalized suggestions based on user clickstream events.
