

Githika Jetty Purandara

Data Analyst

Location: Ohio, USA | Mail: githikajetty@gmail.com | Ph.: (216) 474 3956 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

- 4+ years of experience as a Data Analyst with a proven track record of leveraging data-driven insights to optimize healthcare operations and enhance financial performance.
- Expertise in developing machine learning models, designing ETL pipelines and implementing A/B testing frameworks.
- Adept at integrating and standardizing data from diverse healthcare systems and ensuring HIPAA and PHI compliance.
- Proficient in utilizing Python, Scikit-learn, XGBoost, SQL, SSIS, Apache Airflow, Azure, SQL Server, EDI X12, FHIR APIs, HL7, Advanced Excel (VBA & Macros), Power Query, Snowflake, Tableau, AWS (S3, EC2) and Power BI.
- Experienced in applying statistical analysis, regression and classification techniques to build predictive models and implement fraud detection methodologies.
- Collaborates effectively with cross-functional teams, including clinical informatics, IT, financial and compliance departments, utilizing Agile and Waterfall methodologies.
- Committed to data governance and regulatory compliance, including RBI guidelines and KYC/AML regulations.

TECHNICAL SKILLS:

Programming Languages:	Python, SQL, VBA
Libraries & Frameworks:	Scikit-learn, XGBoost, Power Query, Pandas, NumPy
Data Visualization:	Power BI, Tableau, Matplotlib, Seaborn
Databases & Warehouses:	SQL Server, Snowflake, Oracle
ETL Tools & Pipelines:	SSIS, Apache Airflow, Power Query
Cloud Platforms:	AWS (S3, EC2), Azure, Azure Data Lake
EMR/EHR Systems:	Facets, EPIC, Cerner
Healthcare Standards:	ICD-10, CPT, SNOMED, LOINC, HL7 v2/v3, FHIR, EDI X12 837, EDI X12 835
Testing & Analysis:	A/B Testing, Regression Analysis, Classification Techniques, Cost-Benefit Analysis, Impact Analysis
Security & Compliance:	HIPAA, PHI, Role-Based Access Control (RBAC), Data Masking, Audit Logging, KYC, AML, RBI Guidelines
Version Control & DevOps:	Git, GitHub
Business & Productivity:	Microsoft Excel (Advanced, VBA, Macros), Microsoft Office Suite, JIRA
Data Integration:	FHIR APIs, HL7, EDI, Legacy Systems Mapping, Data Normalization
Development Methodologies:	Agile, Scrum, Waterfall
Other Skills:	Ggplot, Jupyter Notebook, decision tree, linear regression, Data Storytelling, Data Wrangling, Regression analysis, A/B testing, Data Modeling, Data Cleaning, Data Transformation, Data Visualization, Data warehousing
Operating Systems:	Windows, Linux, Mac iOS

PROFESSIONAL EXPERIENCE:

McKesson – OH

August 2023 – Present

Data Analyst

- Reduced hospital readmission rate by 17% by developing a machine learning-based risk stratification model in Python using Scikit-learn and XGBoost, incorporating patient demographics, comorbidities and historical claims data.
- Improved claims processing efficiency by 23% through optimization of complex SQL queries and seamless data integration from Facets, EPIC and Cerner systems using SSIS and Apache Airflow.
- Designed and maintained scalable ETL pipelines using SSIS and Airflow to ingest, clean and transform high-volume EHR and claims data from multiple providers for downstream analytics and reporting.
- Implemented A/B testing frameworks to evaluate policy changes related to telehealth utilization and automated appointment reminders, leading to a 12% increase in patient compliance rates.
- Collaborated with clinical informatics and IT teams to map, normalize and standardize medical codes including ICD-10, CPT, SNOMED and LOINC across fragmented legacy systems and clinical data repositories.
- Ensured HIPAA and PHI compliance by implementing data masking, audit logging and role-based access controls (RBAC) in all dashboards and automated pipelines using Azure and SQL Server.
- Developed Python and SQL workflows to ingest and process EDI X12 837 (Claims) and 835 (Remittance Advice) files, improving claims reconciliation accuracy by 30%.
- Integrated FHIR APIs and HL7 v2/v3 standards within an Azure Data Lake to enable secure, interoperable patient data exchange and enhance care coordination between primary and specialist providers.
- Automated recurring KPI dashboards and performance reports using Advanced Excel (VBA & Macros) and Power Query, reducing manual reporting time by 60%.

- Conducted cost-benefit and impact analysis of proposed EMR enhancements (patient portal upgrades, prescription auto-renewals), driving data-driven decision-making for system investments.
- Partnered with financial and compliance teams to perform claims auditing, utilization review and denial management analysis using Snowflake, Tableau and SQL, resulting in a 15% reduction in reimbursement delays.

Smart AI – India

March 2020 - July 2022

Data Analyst

- Spearheaded the creation of a sophisticated credit risk assessment model utilizing machine learning algorithms, resulting in a 30% improvement in risk prediction accuracy & a significant reduction in default rates across diverse loan portfolios.
- Engineered automated financial reporting workflows using Python and SQL, achieving a 50% reduction in report generation time and enhancing the accuracy of financial insights for strategic decision-making.
- Executed comprehensive A/B testing strategies that resulted in a 15% uplift in customer engagement metrics through tailored marketing offers, leveraging data-driven insights to refine customer segmentation.
- Designed, optimized and maintained complex SQL queries for efficient data extraction and reporting, ensuring seamless access to critical financial data for stakeholders across various departments.
- Developed and deployed interactive dashboards in Power BI, enabling real-time performance tracking and visualization of key financial metrics, thereby facilitating proactive management and strategic planning.
- Constructed advanced predictive models employing regression analysis and classification techniques to accurately forecast loan defaults, contributing to enhanced risk management strategies.
- Implemented robust fraud detection methodologies utilizing statistical analysis and machine learning techniques to identify and mitigate anomalies in transaction data, safeguarding the organization against financial losses.
- Leveraged AWS services, including S3 and EC2, for scalable data storage and processing solutions, significantly improving data accessibility and operational efficiency within the analytics framework.
- Actively contributed to analytics projects utilizing both Agile and Waterfall methodologies, ensuring timely delivery of actionable insights and analytics solutions aligned with business objectives.
- Engaged in comprehensive data governance initiatives and compliance activities, strictly adhering to RBI guidelines and KYC/AML regulations to ensure data integrity and regulatory compliance within banking operations.

EDUCATION:

Master's in Computer Science - Cleveland State University, OH, USA

Bachelor's in Computer Science - Vignan's Nirula Institute of Technology and Science for Women, AP, India
