

Glenn Leaman

(203) 506-5982 gleaman38@hotmail.com

Cheshire, Connecticut

Professional Summary

Experienced. Reliable. Results driven.

I bring extensive hands-on expertise in software development, hardware integration, and network solutions. This is combined with strong problem solving and critical thinking skills that ensure effective support of mission critical operations and maximize system performance. I specialize in customizing technical solutions to meet organizational needs while ensuring compliance with industry standards. My background includes working closely with stakeholders to understand requirements, and collaborating with developers to create tailored, effective solutions. I take pride in supporting mission critical operations and ensuring systems perform reliably and efficiently, always with an eye toward both technical excellence and organizational needs. Beyond the workplace I invest in the future of technology as a dedicated FIRST Robotics (FRC) Mentor. For the past nine years, I have led and taught the high school team members critical engineering skills, because future great systems start with great people.

Technical Skills

- **Programming Languages:** C#, MS SQL, MySQL, JavaScript, AJAX, jQuery, PHP, VBScript, VB.NET
- **Reporting Tools:** SQL Server Reporting Services (SSRS), Report Definition Language Client-Side (RDLC), Crystal Reports,
- **Frameworks/Stacks:** LAMP, WAMP stacks, .NET Framework
- **Software Tools:** Microsoft Visual Studio, NextGen EHR, The ECHO Group's Clinician's Desktop EHR, SQL Server, Windows Scheduler, SQL Job Agent
- **Operating Systems:** Windows 10, Windows Server, Linux, Unix
- **Web Development:** Front-end development, ASP.NET MVC, Cross-browser compatibility, HTML5, CSS3, Bootstrap, Responsive design, Dynamic web pages, Smartphone applications
- **Database Management:** SQL, MySQL, Data collection, Query optimization
- **Diagnostics and Troubleshooting:** Hardware diagnostics, Software diagnostics, POS system repair.

Project Management and Problem-Solving

- **Project Management:** Agile methodologies, Custom application development, Software Development Life Cycle (SDLC), TFS, Git, DeskPro ticketing system.
- **Process Improvement & Problem Solving:** Workflow optimization through root cause analysis, Quality assurance, Data accuracy enhancement, Process automation, Documentation
- **Technical Support:** Tier-2/Second-level support with strong troubleshooting skills, End-user training, System maintenance

- **Compliance:** State funding contract compliance, Healthcare IT compliance

Professional Experience

The Connection, Inc., Middletown, CT 08/2012-12/2024 **System Developer II**

- Developed and launched web pages and reporting tools that improved client tracking accuracy by 30%, helping the agency meet key compliance benchmarks and better serve thousands of clients annually.
- Enhanced and customized NextGen Electronic Health Record (EHR) system data collection workflows, cutting staff data entry time by 20% and ensuring compliance with state and federal regulations through close collaboration with the Quality Improvement team.
- Oversaw and performed monthly data transfers to state agencies, guaranteeing on-time reporting of client outcomes and full compliance with funding contracts.
- Provided comprehensive technical support for all agency software platforms, resulting in a 15% reduction in user-reported technical issues and boosting overall staff efficiency.
- Successfully worked remotely for 5 years using Teams and WebEx, maintaining productivity and supporting geographically dispersed staff, which contributed to uninterrupted agency operations.

Norfield Data Products/Cosmic Computers, Inc., Norwalk, CT 06/2006-11/2011 **Software Engineer**

- Designed and implemented dynamic, customer-facing web pages and mobile applications, automating utility marking requests. This reduced manual processing time by up to 60%, improving turnaround for thousands of property owners and increasing client satisfaction scores.
- Developed scalable enterprise web applications, supporting over 10,000 daily transactions and enabling business growth without additional server costs.
- Resolved critical customer software issues, shortening average resolution time by 30% and minimizing Center downtime, directly improving One-Call Center operational efficiency and customer satisfaction, as reflected in higher CSAT/NPS rankings.

The Computer Merchant/CSC/Sikorsky Aircraft, Stratford, CT 09/2004-06/2006 **IT Contractor**

- Facilitated corporate-wide and international network connectivity to support staff.
- Orchestrated Moves/Additions/Changes on demand to ensure smooth project completions.
- Installed computer hardware and configured engineering software on Windows systems.

Forza-Bassett Technology Solutions, Wallingford, CT 10/2003-03/2004 **Network Consultant**

- Resolved network and workstation issues, improving client operations.
- Implemented security measures and trained clients in operating system hardening.

Modis IT/Mohegan Sun Casino, Uncasville, CT 04/2003-07/2003
Contractor

- Provided real-time support for casino monitoring systems.
- Diagnosed casino, POS hardware and printer issues, replacing or repairing when necessary to ensure limited downtime

Trak Systems, Inc., Wallingford, CT 08/1999-08/2002
Assistant Director of Technical Services

- Maintained and serviced Point of Sale and cash reporting systems.
- Evaluated and tested vendor hardware for POS applications.
- Provided second-level hardware and OS technical support.
- Administered Mandrake Linux, SCO UNIX, and Windows systems.

Micros Systems, Inc., Windsor, CT 08/1997-08/1999
Systems Integrator

- Developed and customized software applications for restaurants and retail clients.
- Extended RS232 communication using short-haul modems for remote connectivity.

Education and Professional Development

- **Bachelor of Science in Computer Engineering**
University of Hartford, Hartford, CT- One of the first five students to complete a hybrid degree program combining Electrical Engineering and Computer Science, gaining a strong foundation in both hardware systems and software development.
- **AWS Cloud Practitioner Essentials (In Progress)**
Amazon Web Services – Online Course
Expanding foundational knowledge of cloud concepts, architecture, security, and services.
- **Udemy Java Programming Course (In Progress)**
Online Course
Building skills in Java fundamentals, object-oriented programming, and application development.

Served as editor, illustrator, and contributor to *Blueprint of a LAN*, a networking book authored by Craig Chaiken. Contributed technical content, visual diagrams, and editorial feedback to help shape the final publication.

Co-Owner of On Demand Computers

This company specialized in building custom computer systems tailored to the specific needs of both residential and business clients. In addition to hardware solutions, we provided consultation services that included system design, hardware and software recommendations, network setup, troubleshooting, and ongoing technical support. Our goal was to deliver reliable, personalized technology solutions that enhanced performance, productivity, and ease of use for our customers. Even after the company was dissolved, we continued to support former clients, maintaining strong relationships and ensuring their

systems remained secure and operational.

FRC Robotics Mentor 2016-Present

Mentors high school students in design, programming, electrical systems, and problem solving in preparation for robotics competitions. Works collaboratively with students to prepare for robotics competitions by fostering hands-on learning, critical thinking, and project based problem solving. Encourages leadership, teamwork, and personal growth by helping students apply engineering principles and manage real-world challenges. Actively contributes to team strategy, organization, and competition readiness while modeling professional conduct and commitment to STEM education.
