Software Engineer

Dell Technologies - Austin, TX | Aug 2019 - Feb 2025

- Launched cross-browser and mobile-friendly features that increased customer satisfaction survey scores by **30%**.
- Guided and mentored intern engineers, resulting in successful delivery of React components that shipped to production.
- Drove quality improvements by ensuring **95% unit test coverage**, reducing regression issues and improving release confidence.
- Coordinated performance optimization initiatives that improved page load speed by **40%** and reduced user-facing incidents.
- Refactored major UI Components for better quality assurance testing as well as better automation testing.
- Delivered two internal iOS applications to **3,000+** employees as the sole developer, ensuring reliable adoption across teams.
- Defined feature requirements in collaboration with stakeholders, ensuring alignment with business goals and user needs.
- Integrated third-party APIs (authentication, cloud storage, and analytics), expanding app functionality and improving user workflows.
- Delivered modernization of mobile applications by contributing to the transition from Objective-C to Swift, improving maintainability and scalability.
- Achieved a **4.5-star** rating on the company's internal App Store, reflecting strong employee satisfaction with the product.
- Collaborated across departments to launch and maintain four iOS projects, aligning app features with internal team needs.

Computer Science Tutor

The University of Texas at San Antonio - Austin, TX | Aug 2018 - May 2019

- Tutored **500+** students in systems programming, programming languages, and database management, strengthening technical understanding and fostering collaborative problem-solving.

Software Engineer Intern

LogicMonitor - Austin, TX | May 2018 - Aug 2018

- Delivered data integration pipelines using Groovy that consolidated metrics from IBM Storage hardware and MySQL databases, providing actionable insights to **200+** enterprise clients.
- Collaborated in Agile Scrum teams to deliver features on time, contributing to sprint planning, daily stand-ups, and reviews that improved delivery consistency.
