SUMMARY

Data Engineer and Analyst with 5+ years of experience designing and optimizing data pipelines, implementing ETL/ELT workflows, and delivering actionable insights through cloud-native, scalable solutions. Proven expertise across AWS, GCP, Python, SQL, and Apache Spark to drive data-driven decision-making and support machine learning and analytics initiatives. Skilled in data modeling, statistical analysis, and interactive dashboard development using Power BI and Tableau. Adept at working with cross-functional teams to ensure data integrity, governance, and performance across diverse data platforms, including Redshift, BigQuery, and Snowflake. Passionate about building end-to-end data systems that support business growth, enhance operational efficiency, and enable intelligent automation. Certified in Google Data Analytics and AWS Cloud Essentials.

SKILLS

- **Programming and Libraries:** Python, R, SQL, Numpy, Pandas, Apache Spark
- **Databases:** MySQL, Postgres SQL, MS SQL Server, Oracle, MongoDB, AWS redshift, Teradata
- **Data Visualization:** Tableau, Power BI, Excel, Google Sheets, Power Query
- **Data Analysis:** KPI tracking, Statistical Analysis, Data Modeling, Regression Analysis, Forecasting, A/B Testing, Data Warehousing, Trend Analysis, Data Quality, Data Mining, Predictive Modeling (Regression), Machine Learning, Data Integrity Validation
- **Cloud & ETL:** AWS(S3, EC2, Redshift, Glue, Lambda, EMR, IAM), Azure, Alteryx, Apache Spark, Data Pipeline Development
- **Security & Privacy:** End-to-End Encryption Awareness, Data Protection, Security Tooling Review, Privacy Compliance
- **Project Management & Tools:** Agile, Scrum, Trello, Jira, Kanban

WORK EXPERIENCE

Cortracker Inc

Apr 2025 - Present

Data Engineer

Irving, Texas

- Engineered and maintained scalable, fault-tolerant data pipelines for batch and real-time ingestion using Apache Spark, Scala, Python.
- Built scalable ETL/ELT workflows that reduced data latency by 40%, enabling real-time analytics and streamlined integration across diverse data sources into cloud data platforms.
- Optimized SQL and NoSQL data stores (PostgreSQL, MongoDB, DynamoDB) for performance, scalability, and high availability.
- Developed cloud-native data solutions using AWS (Redshift, S3, Glue), and GCP (BigQuery, Dataflow).
- Enabled advanced analytics and ML by partnering with data science and BI teams to ensure accessible, high-quality data delivery.
- Improved query efficiency by 30%+ through data partitioning, indexing, and storage format optimization.
- Automated pipeline monitoring and alerting, reducing downtime and resolution time via Airflow, Kornshell Scripts and custom logging.
- Ensured data governance, security, and compliance through metadata cataloging, access controls, and audit-ready logging.

Agile Datapro Inc.

Aug 2024 – Present

Data Analyst

Campbell, CA

- Developed Power BI dashboards using DAX, enhancing real-time insights and boosting decision-making efficiency by 20%.
- Designed a network performance dashboard, reducing mean time to resolution by 30% through early detection of critical issues.
- Created four Power BI dashboards using Power Query, and DAX, analyzing job trends, skills, and demographics for a skill matrix.
- Implemented a STAR schema data model, improving system performance by 40% and optimizing reporting efficiency.
- Optimized database queries, reducing data access times by 30%, and improving reporting efficiency.

V4 Tech Solutions

Jan 2021 – Jul 2022

Junior Data Analyst (FedEx Project)

India

- Engineered data-driven forecasting models and robust statistical techniques, significantly enhancing project planning precision and optimizing resource allocation.
- Developed ETL pipelines using Alteryx to automate data workflows, improving processing efficiency.
- Enhanced data quality management resulting in a 40% decrease in data discrepancies through clean and standardized data shaping.
- Extracted and transformed transactional data from Teradata, standardizing date formats for seamless reporting.
- Validated data integrity before integrating with Tableau for visualization, enhancing executive decision-making.
- Created interactive dashboards using Tableau, providing actionable insights to stakeholders, demonstrating skills in data visualization.
- Collaborated with cross-functional teams to ensure seamless data governance and reporting accuracy.

Reezanorp IT Services

Mar 2019 - Dec 2020

Data Analyst

India

- Designed and implemented business intelligence solutions, including 17 Power BI dashboards and 45+ ad hoc reports, to address business challenges and support data-driven decision-making.
- Conducted advanced data analysis and ROI reporting using Excel (Pivot Tables, VLOOKUP, Regression), Python (Pandas, matplotlib) and R (ggplot), transforming raw data into actionable insights.
- Automated data workflows and improved processing efficiency using SQL and Python, supporting scalable analytics operations.
- Led data quality initiatives by enforcing metadata standards and tracking data lineage, ensuring consistency across structured data models.
- Identified business risks and improved process efficiency using statistical techniques, decision trees, and RFM analysis, with insights visualized through Tableau and Python.
- Played a key role in a data cleanup project that recovered over \$1.5M in inventory through effective reconciliation and reporting.

EDUCATION

Cleveland State University

Master of Science, Information Systems

Aug 2022 – May 2024

Jawaharlal Nehru Technological University

B.Tech, Electronics and Communication Engineering

June 2014 – Apr 2018

PROJECTS

Data Analysis and Insights

Aug 2024 – Jan 2025

- Designed and developed the TALENT ANALYTICS Power BI Dashboard, streamlining the resume screening process for hiring recruiters, reducing manual screening efforts by 60%.
- Built 4 interactive pages to analyze HR analytics, candidate skills, certifications, experience, and project mapping, increasing hiring efficiency by 40%.
- Implemented filters, slicers, and KPI cards to enhance data-driven decision-making, improving recruiter productivity by 35%.
- Integrated drill-through capabilities to provide deeper insights into candidate experience and skills, reducing time-to-hire by 25%.
- Explored GenAI chatbot integration to enable quick insights for HR teams; currently working on full implementation.
- Proposed Row-Level Security (RLS) to maintain candidate data privacy and access control.

Data Modeling and EV Insights Analysis Project

Aug 2023 – Dec 2023

- Designed and implemented relational SQL data models and stored procedures to analyze electric vehicle emissions and population data, ensuring data accuracy and performance optimization.
- Utilized advanced SQL techniques, including window functions and complex joins, to perform trend analysis, anomaly detection, and pattern recognition.
- Developed and deployed a web-based analytics application using PHP, SQL, and HTML to support data visualization and user-driven insights through search and filtering functionalities.
- Created interactive dashboards and visual reports using data storytelling techniques to communicate key insights to stakeholders and support data-driven decision-making.
- Demonstrated expertise in data cleaning, transformation, and exploratory data analysis (EDA) to extract meaningful insights from raw datasets.

Advanced Systems Analysis and Design Project

Jan 2023 - May 2023

- Implemented integrated AR technology into the "Furnivision" mobile application, allowing users to visualize and interact with furniture in their own space before purchasing.
- Enhanced user engagement and decision-making through real-time, interactive product previews.
- Developed a Comprehensive Budget Planner tool within the "Furnivision" app, enabling users to manage and allocate finances for furniture purchases. This feature helps users stay within budget, reducing financial stress and improving purchasing decisions.
- Utilized Agile Methodology for Project Management and Collaborated with a cross-functional team to develop the "Furnivision" app using Agile principles.
- Managed user stories, conducted regular sprint reviews, and ensured timely delivery of both functional and non-functional requirements, leading to successful project completion.

Smart Helmet

Jan 2018 - Apr 2018

- Developed cutting-edge smart helmet with alcohol detection capabilities; prevented bike ignition for intoxicated individuals, ensuring road safety and legal compliance, anticipated to slash DUI-related incidents by 25%.
- Designed an accident detection unit using an accelerometer and GPS to notify emergency contacts with real-time location information, improving response time and potentially saving lives.
- Implemented a user-friendly interface for real-time helmet status monitoring and accident notifications. This involved handling GPS data and sending SMS alerts using Python.

CERTIFICATIONS

- **Google Data Analytics** : Certified by Google
- **AWS Cloud Essentials Practitioner**: Certified by AWS
