

SOUJANYA GODUGU

+1 6235659510 | soujanyagodugu82@gmail.com

SUMMARY

- Full-stack developer with **5+ years of experience** designing and building scalable, high-performance web applications using **Java, Spring Boot, Node.js, React.js** across enterprise and academic projects.
- Proven expertise in the **banking and insurance domain**, delivering robust web solutions for policy management and claim processing at **Computershare**; implemented secure, modular architectures that enhanced backend reliability and UI responsiveness.
- Hands-on experience with **microservices, RESTful API development**, and **cloud-native deployments** using **Docker, AWS (Lambda, EC2, S3, RDS)**, and **CI/CD pipelines** with Jenkins and AWS Code Pipeline.
- Strong frontend capabilities using **React.js, Redux, Vue.js, Bootstrap, SASS**, and **Tailwind CSS**, with a focus on building responsive, accessible, and high-performance user interfaces.
- Skilled in working with both **relational (PostgreSQL, MySQL)** and **NoSQL (MongoDB, Vector DBs like FAISS/Pinecone)** databases, optimizing data flows and improving fetch latency in real-time applications.
- Collaborative and Agile-driven, experienced in **Scrum ceremonies, TDD**, and using tools like **Git, GitHub, JIRA, Swagger**, and **Jasmine** to support iterative development and high-quality releases.

SKILLS

Programming Languages: Java, Python, SQL, C++, C.
Frontend Technologies: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Bootstrap, Flex, jQuery, Vue.js.
Backend Technologies: Java, Spring Boot, Spring MVC, Spring Security, Hibernate, Microservices, RESTful APIs, Node.js, Express.js.
Database Management: SQL, MySQL, PostgreSQL, MongoDB, Hibernate, Query Optimization.
Cloud & DevOps: AWS (Lambda, S3, EC2, RDS), Docker, Jenkins, CI/CD Pipelines.
Testing & Debugging: JUnit, Postman, Selenium, Performance & Load Testing.
Version Control & Agile Tools: Git, GitHub, JIRA, Agile (Scrum, TDD, SDLC).
Other Tools & Technologies: Figma, Swagger, Axios, RESTful Web Services, MVC Architecture.
IDEs: Visual Studio Code, IntelliJ IDE, Eclipse.
Reporting Tools: Tableau, Power BI.
Soft Skills: Team Collaboration, Stakeholder Communication, Problem-Solving, Leadership, Issue Resolution.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (2024, AWS)

EDUCATION

<i>Master of Science, Information Technology</i> Arizona State University, Tempe, Arizona.	JAN 2023 – DEC 2024
<i>Bachelor of Technology, Electronics and Computer Engineering</i> SNIST, JNTUH, India.	JULY 2017 - JUNE 2021

PROFESSIONAL EXPERIENCE

Junior Software Developer EPICS at ASU, Remote.	JAN 2025– Present
--	--------------------------

- **Developed scalable backend services** using **Node.js** and **Spring Boot**, contributing to 30% faster feature delivery across microservices architecture.
- **Engineered and optimized databases** using **PostgreSQL, MongoDB**, and **Hibernate**, reducing data fetch latency by 45% and improving system responsiveness.
- **Built modular front-end components** with **React.js, React Hooks, SASS**, and **Bootstrap**, improving load times by 35% and reducing bundle size by 40%.
- **Implemented containerization** using **Docker** and orchestrated deployment on **AWS EC2**, enhancing scalability and simplifying environment consistency.
- **Configured CI/CD pipelines** with **AWS CodePipeline, CodeDeploy**, and **Git**, reducing deployment time by 50% and ensuring seamless integration workflows.
- **Leveraged AWS services** including **Lambda, S3**, and **RDS** to support backend operations and data storage in a cloud-native environment.
- **Integrated RESTful APIs** using **Axios** and backend frameworks, enabling real-time data interactions and improving API performance by 45%.
- **Maintained version control** and branching strategies using **Git** and **GitHub**, streamlining collaboration across distributed teams.

Software Developer Arizona State University, Tempe, Arizona	FEB 2023 – DEC 2024
--	----------------------------

- **Led full SDLC execution** for a web-based enterprise dashboard using **Agile** and **TDD** methodologies; facilitated **Scrum ceremonies** including sprint planning, retrospectives, and code reviews.

- **Developed responsive front-end interfaces** using **React.js, Redux, JavaScript, HTML5, CSS3, Bootstrap**, and **SASS**, delivering modern, user-friendly UI for business intelligence applications.
- **Refactored legacy jQuery codebase** into **React** with functional components and state management, reducing bundle size by 40% and improving browser performance by 35%.
- **Built reusable, scalable components** using **React Hooks, Virtual DOM**, and **Flux**, incorporating **WCAG 2.1 AA-compliant** accessibility practices to expand user base by 15%.
- **Integrated RESTful APIs** with **Axios**, optimizing front-end data flow and eliminating redundant backend endpoints through close collaboration with backend developers.
- **Implemented AWS S3 integration** to dynamically fetch and render media content, enhancing UI functionality with scalable cloud-based asset management.
- **Managed version control** using **Git** and **GitHub**, and maintained Agile workflows via **JIRA**, improving sprint tracking, bug resolution, and team productivity.

Senior Systems Engineer (Role: Full Stack Developer) | Infosys Limited, India

DEC 2020 – JAN 2023

(Client: Computershare)

- **Delivered high-quality software solutions** for a suite of **insurance and banking web applications** within a **Java EE environment**, supporting key processes like policy management and claims processing.
- Took ownership of full-cycle development using **Agile practices** including **SCRUM** and **Test-Driven Development (TDD)** to drive continuous improvement and ensure on-time delivery.
- **Structured application architecture** using the **MVC (Model-View-Controller)** design pattern to create maintainable and scalable UIs, enhancing code quality and long-term system reliability across enterprise-grade systems.
- **Designed and developed responsive, user-centric applications** using **HTML5, CSS3, JavaScript, Bootstrap, SASS, React.js, Redux, Flex**, and **MongoDB**, enabling seamless interaction for various stakeholders including policyholders, agents, and administrators in the insurance domain.
- **Enhanced performance of React applications** through use of **Virtual DOM, code splitting, lazy loading, reusable components**, and **predefined NPM packages**, resulting in a 60% reduction in page load time and smoother user experience.
- **Built interactive and state-managed components** using **React.js** and **Redux**, supporting real-time updates for high-frequency features such as policy renewals, insurance claims, and customer data views.
- **Integrated RESTful APIs** on the frontend via **Axios**, handling backend interactions related to **policy management, claims processing**, and **customer data retrieval**, and optimized response handling for improved application responsiveness.
- **Built scalable and secure RESTful APIs** using **Spring Boot**, incorporating core **Spring Framework** features such as **dependency injection** and **transaction management** to boost backend reliability and maintainability.
- **Enhanced API performance and data integrity** by implementing data access layers using **SQL** and **Hibernate**, ensuring efficient storage/retrieval of claims history, policy details, and user records within relational databases.
- **Developed microservices architecture** to support modular and scalable system deployment; used **Swagger** for comprehensive **API documentation**, simplifying developer onboarding and third-party integrations.
- **Wrote and executed 100+ unit tests** using **JUnit**, applying **TDD principles** to validate backend logic related to premium calculations, policy issuance, and claims validation, thereby increasing functional accuracy.
- **Collaborated with UX designers** to deliver accessible web interfaces, implementing **WCAG 2.1 AA** standards, which contributed to a 15% growth in user base by making the applications accessible to users with disabilities.
- **Deployed serverless solutions** using **AWS Lambda**, and integrated **AWS S3** for secure storage and delivery of documents like policy PDFs and customer uploads, enabling a cost-effective and highly available infrastructure.
- **Utilized Git and GitHub** for version control, and maintained progress tracking, task management, and bug resolution through **JIRA**, ensuring seamless collaboration and workflow within an Agile development environment.

Web Developer - Intern | Barelogics Solutions Pvt Limited, India.

MAR 2020 – DEC 2020

- **Converted Figma designs into fully functional web pages**, ensuring they looked just as intended and worked well on all devices.
- Created **clean, responsive layouts** following **W3C standards**, making the website easy to use, maintain, and accessible to all users.
- Built **interactive and dynamic web pages** using **JavaScript, jQuery, HTML5, and CSS3**, closely following the Figma design.
- Made sure the website worked smoothly across **Chrome, Firefox, Edge, and Safari**, fixing any layout or functionality issues.
- Added **form validations using JavaScript and jQuery** to help users enter the correct information and improve their experience.
- Worked with the **QA team to find and fix UI bugs, layout issues, and performance problems**, ensuring smooth user experience.
- Created **user-friendly page layouts, navigation, buttons, and icons**, making sure they stayed true to the original Figma mockups.
- Developed backend APIs using **Node.js and Express.js** to handle user authentication, data processing, and business logic efficiently.
- Integrated **MongoDB and PostgreSQL** databases to store and manage user data, ensuring secure and scalable backend operations.
- **Deployed the application on AWS (EC2, S3, RDS, Lambda)**, ensuring **high availability, scalability, and performance** with **Load Balancers, Auto Scaling Groups, and CloudFront CDN**.
- Configured **AWS CodePipeline and CodeDeploy** for seamless **CI/CD automation**, enabling efficient deployment, version control, and continuous integration.
- Implemented **IAM roles, security groups, and AWS Lambda** to enhance **security, access management, and cost-effective serverless backend operations**.
