

Gokkul Eraivan Arutkani Aiyanathan

Data Analyst

New York - 14214 | +1 716-970-9133 | gokkuleraivan08@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

- 3+ years of professional experience as a Data Analyst with strong communication, leadership, and interpersonal skills.
- Proficient in data analysis, visualization, and statistical modeling using Python, R, SQL, Tableau, and Power BI.
- Hands-on experience in data wrangling, data exploration, data warehousing, and machine learning techniques.
- Skilled in building and managing ETL pipelines, with knowledge of SDLC methodologies.
- Experienced with cloud platforms including AWS and Azure.
- Proven ability to translate complex datasets into actionable business insights across financial, research, and retail sectors.

SKILLS

Languages:	Python, R, SQL, SAS, Java, C, C++
Databases:	MS SQL, SQLite, Hive, MongoDB, MySQL, SQL Server
Python Packages:	NumPy, Pandas and SkLearn
Visualization Tools:	Tableau, Power BI, QlikView, Matplotlib, Seaborn, GGplot2
Platform/IDE:	Jupyter Notebook, PySpark, RStudio, R Shiny
Cloud Platforms:	AWS (S3, EC2, Lambda), Azure
Data Analysis Techniques:	Data Visualization, Data Mining, Warehousing, A/B Testing, Regression
Version Control & Workflow Tools:	Git, GitHub, JIRA, Airflow
Methodologies:	Agile, SDLC and Waterfall
Operating System:	Windows, Linux and macOS

EDUCATION

University at Buffalo NY, USA	Aug 2023 - Dec 2024
Masters in Data Science	
Anna University India	Jul 2019 – May 2023
Bachelors in Computer Science and Engineering	

PROJECTS

- Loan Risk Assessment Platform

 - Automated financial risk evaluation using Python, SQL, and Tableau.
 - Integrated UAT and QA practices to ensure compliance.
- GenAI Assistant for Research Lab

 - Deployed cloud-native GenAI model with AWS SageMaker.
 - Built interactive interface for researchers and automated experiment logs.

EXPERIENCE

Northern Trust, USA

Aug 2024 to Present

Data Analyst

- Analyzed large financial datasets to identify trends and anomalies, supporting risk management and investment strategy decisions
- Developed and maintained automated ETL processes to ensure accurate and timely data integration across multiple business units.
- Created interactive dashboards and visual reports using Tableau and Power BI, providing executives with actionable insights into portfolio performance and client metrics.
- Collaborated with cross-functional teams to translate business requirements into technical data solutions, improving operational efficiency.
- Conducted detailed market and competitor analysis to inform strategic planning and enhance product offerings.
- Improved data quality and consistency by implementing rigorous validation and cleansing procedures within the data pipeline.
- Supported regulatory reporting requirements by preparing precise, audit-ready datasets in compliance with financial industry standards.

The Research Foundation for SUNY, University at Buffalo, NY

May 2024 to Jul 2024

AI & Cloud Research Assistant

- Developed and deployed a cloud-based platform to facilitate remote research experiments, enhancing accessibility and collaboration across geographically distributed teams.
- Designed and implemented backend architecture using Node.js, AWS Lambda, Docker, Kubernetes, and Terraform, ensuring scalable and reliable system performance.
- Created and executed rigorous testing procedures to validate platform stability and optimize user experience throughout research workflows.
- Built analytics frameworks to capture and analyze user interactions, delivering insights that informed ongoing platform improvements and user engagement strategies.
- Automated data processing pipelines to streamline the collection, transformation, and integration of research data for comprehensive analysis and reporting.
- Generated detailed usage reports and visual dashboards using Amazon QuickSight, enabling stakeholders to monitor key metrics and make informed decisions.
- Collaborated with cross-functional teams to align technical solutions with research objectives and operational requirements.

Intex Technologies, India

May 2021 to Jul 2023

Data Analyst

- Analyzed sales and customer data to identify trends, seasonal patterns, and growth opportunities, supporting strategic decision-making in a highly competitive consumer electronics market.
- Developed and maintained automated ETL pipelines to ensure timely and accurate data integration from multiple sources, improving data reliability for reporting and analysis.
- Created interactive dashboards and reports in Tableau and Power BI, enabling marketing and sales teams to track product performance and customer engagement metrics in real-time.
- Conducted segmentation analysis using SQL to target marketing campaigns more effectively, resulting in increased customer engagement and higher conversion rates.
- Collaborated with cross-functional teams to translate business goals into data-driven insights, improving inventory management and reducing stock-outs.
- Performed competitor benchmarking and market trend analysis to support product positioning and promotional strategies.
- Automated weekly and monthly performance reports using Python, reducing manual effort by 40% and improving accuracy and reporting speed.
