

SUMMARY

Results-driven Data Analyst with 2 years hands-on experience designing scalable ETL pipelines, building predictive models, and optimizing cloud infrastructure to deliver business impact. Adept in tools like Python, SQL, BigQuery, Tableau, and SAP S/4 HANA, with a proven track record of automating workflows, enhancing system performance and enabling real-time insights through dynamic dashboards.

WORK EXPERIENCE

Element 6 Solution, Data Analyst Intern

May 2024 – July 2024

- Engineered scalable ETL pipelines in BigQuery and Dataflow to process 50+ GB of semi-structured data monthly, boosting processing efficiency by 35% and reducing GCP costs by 22% (\$20K annually) through resource optimization and query tuning.
- Designed and deployed predictive models using Python (scikit-learn, TensorFlow), enhancing sales pipeline forecasting accuracy, supporting retail and B2B sales initiatives, and contributing a 15% uplift in quarterly revenue, contributing over \$30,000 in additional sales.
- Automated data extraction from Ads API, Firebase, GA4, CRM, and GCP logs, cutting manual reporting time by 15 hours per week and enabling real-time insights through Looker dashboards integrated with Google Workspace

IBM , Data Specialist Engineer

December 2022 – July 2023

- Streamlined SAP S/4 HANA implementation at IBM by coding, testing, and customizing modules to meet client needs, while maintaining 80% system uptime for public and private broadcast services, ensuring robust stability and business continuity.
- Ensured functional accuracy and code quality by conducting unit testing, developing test plans, debugging program logic, and performing peer code reviews, while concurrently developing Power BI dashboards that streamlined stakeholder reporting.
- Enhanced system performance by 50% through kernel updates and replacing outdated folders, improving security, and resolving potential bugs.

Falcoor Commercial, Data Analyst Intern

March 2022 – September 2022

- Built and automated ETL pipelines using Microsoft SQL, Python, and PostgreSQL to process 30+ GB of data monthly, improving efficiency by 20% and reducing storage and compute costs by ₹2,500 per month.
- Reduced supply chain waste by building time series forecasting models (ARIMA), optimizing inventory management, and reducing stockouts.
- Designed interactive Tableau dashboards to visualize sales, inventory turnover, and procurement KPIs, enabling real-time data-driven decisions.
- Utilized tools such as Excel (VLOOKUP & PivotTables) and Jupyter Notebooks for analysis and reporting. Collaborated with cross-functional teams to translate business needs into analytical solutions.

PROJECTS

Predictive Analytics for Conagra Brands (Tools used: Jupiter notebook)

- Conducted in-depth analysis of more than 150+ Linear and Logistic Regression models to determine the impact of volume drivers on revenue growth for a prominent Fortune 500 company.
- Designed and deployed a predictive model for meat substitute demand forecasting, integrated with a Power BI dashboard to guide product positioning, enhance merchandising, and boost retail sales performance.

HR Dashboard (Tools used: Tableau)

- Created an HR Analytics Dashboard in Tableau to track and analyze more than 1,000 employees, 5+ departments, and 10+ geographies, enhancing HR reporting efficiency by 40%.
- Developed interactive HR dashboards of key HR metrics like number of employees, attrition rate, departmental staff, male to female split, educational levels, and age groups of 18-65.
- Built a real-time, filterable staff records system that equipped HR teams to conduct targeted searches and streamline performance analysis.

TECHNICAL SKILLS

Certifications: SAP s/4 Hana Administration, Azure(AZ-900), Machine Learning & AI, and IDMC Foundation.

Data Analysis & Visualization Tools: SQL Server, MySQL, Python (Pandas, NumPy, Scikit-Learn, Matplotlib), AWS, PySpark, Power BI, Tableau, Power Automate, MS-Excel, Oracle SQL, Powershell, Kafka,

Software: SAP HANA, Tableau, Microsoft SQL, MySQL Workbench, R Studio, MongoDB, Microsoft, SCCM, Power BI.

EDUCATION

THE UNIVERSITY OF TEXAS AT DALLAS

May 2025

Master of Science in Business Analytics & AI

GPA – 3.4

AMRITA VISHWA VIDHYAPEETHAM

June 2022

Electrical and electronics engineering

GPA – 3.0

INITIATIVE

Led the centralization of data sources from legacy systems to cloud-based tools, improving data accessibility for real-time retail sales reporting, reducing extraction time, and accelerating B2B analytical workflows.
