Data Analyst

SUMMARY

Data Analyst with 3+ years of experience in financial services and healthcare analytics. Expertise in Python data analysis, SQL database management, and Power BI dashboard creation. Built automated reporting systems processing 100K+ records weekly for executive decision-making. Proficient in statistical modeling and machine learning for customer behavior analysis.

SKILL SET

Core Competencies

- Data Mining & Analysis | Business Reporting & Analytics | Data Pipelines & Transformations | Intelligence Gathering | Project Management | Business Intelligence | Predictive Analytics | KPI Development | Cross-Functional Collaboration
- Machine Learning & Deep Learning | Statistical Analysis | Analytical & Problem-Solving Aptitude | Quantitative Analysis | Database Management | Data Warehousing | Financial Modeling

Technical Skills

- Programming & Data Science Tools:** Python (Pandas, NumPy, SciPy), R, SQL, PostgreSQL, MS SQL Server, Excel (Advanced), Power BI
- Big Data & Cloud Platforms:** Hadoop, Spark, Hive, YARN, HDFS, Cloudera (CDP), Snowflake, BigQuery, Cloud Computing (AWS, GCP, Azure)
- Data Visualization & Analytics:** Power BI, Excel Dashboards, Matplotlib, Seaborn, Business Intelligence Reporting
- Data Engineering & Security:** Data Pipelines, ETL Transformations, Application Deployment, Kerberos Authentication

ACADEMIC DETAILS

Masters in Computer and Information Sciences from University of North Texas
Bachelor of Computer Science and Engineering from Vignan Institute of Technology and Science, Hyderabad

EMPLOYMENT DETAILS

Jan 2025 - Present: Hartford Financial Services Group, USA | Data Analyst

- Created automated weekly executive dashboards in Power BI tracking customer acquisition, claims processing, and revenue metrics for C-suite leadership
- Implemented data validation procedures using SQL and Python to ensure accuracy of customer demographics database containing 75K+ policyholder records
- Reduced reporting errors by **20%** by applying advanced Excel functions and maintaining strong data integrity.
- Built dynamic Excel reports with pivot tables and slicers enabling department managers to analyze regional sales performance and identify top-performing agents.
- Streamlined workflows and issue tracking, reducing operational disruptions by **15%** and ticket processing time by **12%**.

Jan 2023 - Jul 2023: Alephys LLC Texas | Data Engineer – Information Technology

- Created documentation for Spark job monitoring and troubleshooting processes.
- Assisted senior engineers with Cloudera platform configuration and testing procedures.
- Strengthened security by implementing **Kerberos authentication**, eliminating unauthorized access risks.
- Optimized Cloudera configurations, improving query response times by **20%** and overall efficiency.
- Built scalable database models, enhancing data retrieval speed by **22%** and supporting large-scale storage.
- Resolved system bottlenecks, cutting recurring incidents by **15%** and improving platform stability.
- Delivered multiple projects with **100% on-time completion**, demonstrating strong execution and leadership.

Jul 2020 - Dec 2022: Fusion Software Technologies, India | Data Analyst

- Delivered **100% on-time global analytics reports** by managing databases and resolving data quality issues.
- Partnered with clients to meet scheduled and ad-hoc reporting needs, cutting turnaround time by **12%**.
- Analyzed datasets to generate **actionable insights** that supported strategic business decisions.
- Built advanced Excel models to **automate data retrieval**, reducing manual effort by **20%**.
- Performed data transformations and validations, improving report accuracy by **15%**.

MAJOR PROJECTS

- Credit Risk Analysis Dashboard:** Analyzed 50K+ loan applications using Python and SQL to identify default risk patterns. Created Tableau dashboard enabling loan officers to assess risk scores 60% faster. Used logistic regression to predict default probability with 85% accuracy, supporting \$2M in loan decisions monthly.
- E-Commerce Dashboard:** Designed interactive dashboards by compiling large datasets, providing insights to guide community engagement and mental health awareness initiatives.
- Netflix Dashboard:** Developed a dashboard to analyze Netflix content by extracting, cleaning, and preparing datasets, enabling deeper insights into viewing trends.

ACADEMIC PROJECTS

- IOT Robot for Queue Monitoring, Blood Donation & Donor Management System, Farmers Friend Application, Student Management System
